TERMS OF SALE

1. All bids are to be per Lot; no lots will be broken. In the event of identical bids on the same Lot, the Lot will be awarded to the first bid received. In the event of a dispute during floor bidding the auctioneer may at his discretion immediately put the Lot up for sale again.

2. All sales are strictly for cash in U.S. funds and must be paid for promptly upon receipt of the auction invoice and/or the coins. Lots delivered in California are subject to state sales tax unless a resale permit is on file with us. Shipping, handling, and insurance charges will be added to invoices for Lots delivered by mail.

3. Bidders not known to us must furnish satisfactory references or a deposit equal to 25% of the bids submitted (which will be applied to purchases; any difference will be billed; any overage will be refunded). We reserve the right to obtain payment in full before delivery of the Lots.

4. No "buy" or unlimited bids will be accepted. No bids will be accepted from minors. The auctioneer and/or the cataloguer reserves the right to refuse any bid which, in our opinion, is not made in good faith.

5. All items are guaranteed genuine.

6. We cannot be responsible for your errors in bidding, so check your bid sheet carefully.

7. Auction sales are not approval sales. Any Lot may be examined before bidding. No Lot may be returned by a mail bidder without our permission in writing. Requests to return coins must be made in writing within 3 days of receipt of the coins.

8. No lots may be returned for any reason by floor buyers (including those acting as agents for others). All floor sales are final.

9. Any claims involving errors in the catalogue or for other reasons must be made within 3 days of receipt of the coins. The American Auction Association acts as agent for the various consignors and does not own the coins. For this reason, no claims of any kind can be considered after settlements have been made with the consignors. Any dispute after the settlement date is strictly between the bidder and the consignor, without involvement or responsibility of the American Auction Association and/or the cataloguers. In the event of a typographical error or attribution error or other error the cataloguer reserves the right to withdraw any item from sale or, if the error is discovered at a later date, to refund the buyer's money without further obligation.

10. Printed prices, catalogue values, etc. are only estimates. Higher or lower valuations may prevail.

11. Your submitting of bids in our sale constitutes your acceptance of the foregoing terms.

Index to the Sale is at the end of the catalogue.

The Austin Collection

A few words from the cataloguers...

Welcome to our combined public auction sale and mail bid sale of the Austin Collection and other important properties. Whether you attend the sale in person or bid by mail you will receive some truly beautiful pieces if your bids are successful.

The Austin Collection was formed over a period of years by one of America's most prominent numismatists. For a long time it was our pleasure to supply coins for this fine collection—including pieces purchased by the consignor from our Armand Chanpa Collection sale, Robert Marks Collection sale, Terrell Collection sale, and other memorable offerings. And now it is our great pleasure to be able to catalogue these coins again.

Quality and rarity were important precepts when the Austin Collection was formed. In addition, several other fine consignments with the same emphasis were acquired. The result is a catalogue which has few equals in numismatics: a catalogue with rare, important, and significant offerings in many different fields—areas as diverse as silver dollars, American gold coins, tokens, British crowns, and Spanish issues. Indeed, if divided into major parts the Austin Collection would make *several* definitive catalogues! As such, this offering is one of the most important of our time.

The Austin Collection sale begins with one of the nicest collections of silver dollars ever to be offered on the auction block. Bidding will begin with Lot 1, an attractive 1794, and will continue on through many other choice early issues—including a number of pieces in Uncirculated grade or close to it. Then come several Gobrecht dollars. Then a superb collection of Liberty seated dollars is offered. A superlative 1851, choice examples of 1852 and 1858, early Proofs, Carson City issues, and other highlights will be long remembered. Morgan dollars include the rare 1895, choice Carson City pieces, and other landmarks. Later in the catalogue another stellar group of Morgan dollars appears. These popular issues, the “cartwheels” of western lore, have always been collectors' favorites. The Austin Collection catalogue offers one of the most extensive selections of Morgan dollars—including duplicate specimens of important rarities—we've seen in a long, long time!

Colonial coins include several scarce varieties, popular issues, plus the opportunity to bid on starter collections and sets. A lovely AU 1793 half cent, several attractive 1793 chain and wreath cents, a 1794 Starred Reverse cent, an exceptional 1799 cent, and a Proof 1857 large cent highlight early coppers. The offering of small cents is definitive and includes the “rarest of the rare” as well as lower-priced issues. A total of three (yes, three!) choice 1856 flying eagle cents (Lots 280, 281, and 313) are indicative of the quality offered. Also on the block is a choice Proof 1864-L and one of two known Uncirculated 1888/7 overdates. Two-cent pieces include a coin we've never seen in any auction before: an Uncirculated 1869/8, a coin which is the finest known of its variety. Nickel five-cent pieces include choice shield, Liberty, and Buffalo issues, with an indescribably beautiful 1918/7-D among the latter.

American silver coins comprise several really choice early half dimes and, among the later dates, a rare 1846 Proof of the same denomination. Dimes begin with an Uncirculated 1796 and then an Uncirculated 1797. Soon after that a stellar run of choice pieces in the 1820's will come up for bidding. Later-date dimes include many rarities as well. Twenty-cent pieces are represented by a number of Uncirculated and Proof pieces. Quarters begin with the Terrell Collection 1796—certainly one of the finest early American silver coins in existence today. Top-grade specimens of 1804, 1806/5, 1807, and quite a few dates in the 'teens, twenties, and thirties make this one of the finest quarter dollar offerings of recent times. Then come later pieces, including rarities in the Barber and Liberty standing series. Half dollars begin with a choice 1794 and continue to modern issues. Along the way are many prizes, including the fantastic 1797 acquired earlier from the Terrell Collection sale.

United States gold coins range from \$1 to \$20 issues. The quarter eagles include a number of very rare issues from the late 18th and early 19th centuries. Three-dollar gold pieces are presented in date sequence. The emphasis was on quality, and the number of really beautiful Uncirculated pieces (plus a few Proofs) is really remarkable. Half eagles begin with the first year of issue, 1795, and include many scarcities and rarities. The 1834 with motto is especially desirable, as are several early issues from the 1790's. Eagles include rare issues from 1795 to 1804 plus several important later pieces. Double eagles feature the important 1861-S Paquet and the MCMVII High Relief, as well as other desiderata. A number of scarcities and rarities in the territorial gold series will attract attention as well.

Among other United States coins there are several very important patterns—including a unique \$5 issue and the marvelous, majestic, and magnificent 1877 \$50. Paper money includes a number of important single notes plus a unique presentation fractional currency shield signed by Francis E. Spinner and bearing official Treasury Department ribbons and a wax seal, not to mention several additional notes not seen on regular shields! United States tokens and store cards include quite a few major rarities. In fact, we recommend this section of the catalogue for your close study for it contains many really fascinating things!

Ancient coins are represented by a small but select group of gold, silver, and bronze pieces. Later in our listings you'll encounter a listing of silver and minor coins of the world—listed in order by country. Canadian specialists will have the chance to bid on a number of Proof pieces of King George V, including nine different cents and a superb Proof 1925 nickel.

The Spanish and Spanish colonial coins in the Austin Collection catalogue comprise a very important offering. Prime among these is the massive 50-real "cinequentines" piece of 1620. A large listing of high grade Mexican, Central, and South American crowns will also attract interest.

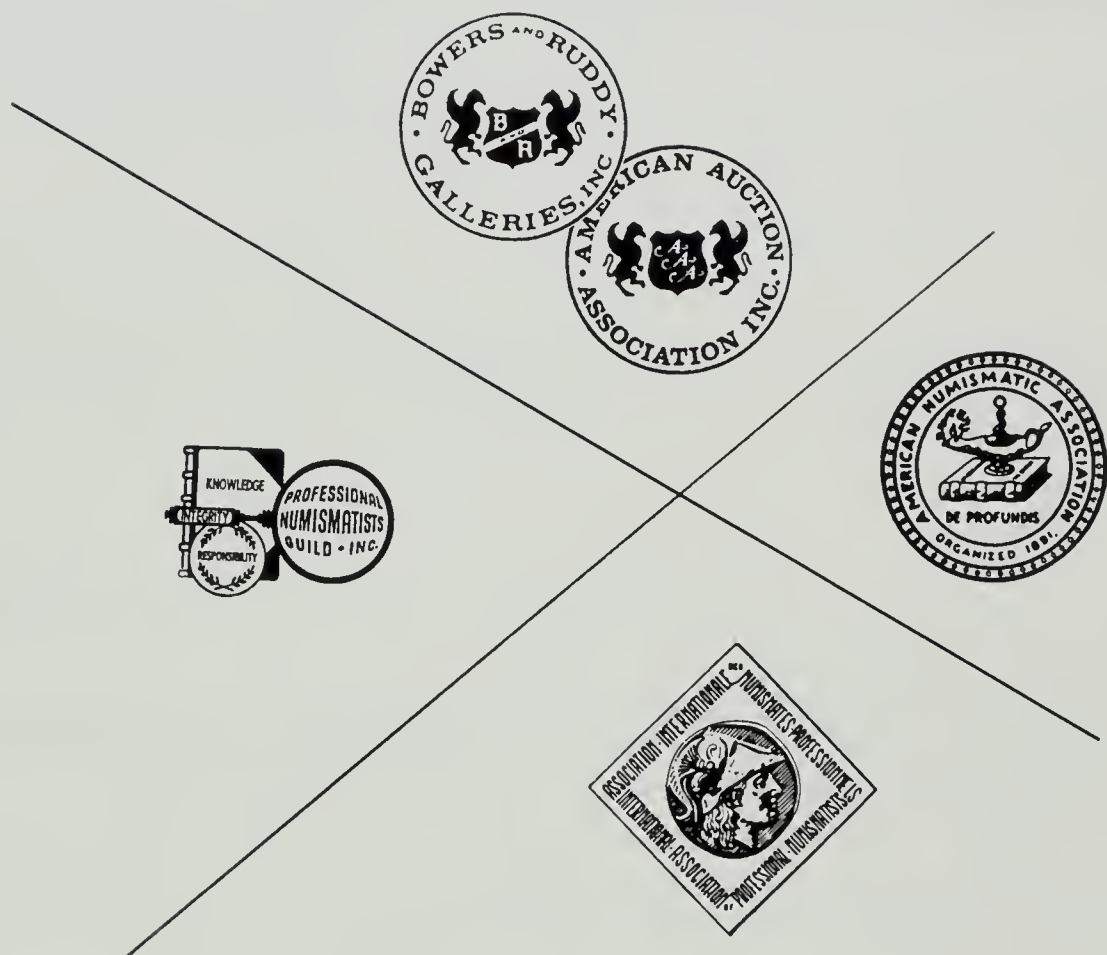

Among European rarities there are interesting pieces from many different countries. The British crowns are worthy of close attention as are the coins of Germany. Among the latter is a collection of Weimar 3-mark pieces and a large offering of scarce porcelain coins and medals. Rounding out our presentation of world coins are a number of interesting and important gold issues.

We invite you to attend the sale in person. You will enjoy participating in one of the outstanding numismatic events of our time. At the same time you will have the opportunity to bid on one of the largest, most diversified, and most interesting selections of coins we've ever presented. There are enough major scarcities and rarities to command the attention of collectors everywhere. There are enough collections, groups, and lots to make the sale important to our dealer friends as well. Los Angeles is but a few hours from any point on the globe. Plan to attend the Austin Collection sale in person. You will enjoy the event, hopefully you will acquire some really fine coins, and you will have the lifetime memory of having participated in person in one of the most important sales of our time.

Bidding by mail is a convenient way to participate if you cannot attend personally. In fact, most of our clients buy this way. With this catalogue you will find a bid sheet and airmail envelope for your use in this regard. If you bid by mail we will act as your agent and will represent your interest.

We have enjoyed cataloguing the Austin Collection. We hope that you derive enjoyment, but to an even greater degree, by successfully bidding on and owning some of the pieces listed here. We wish you the best of luck and success in obtaining those Special Pieces you've been wanting. Check our catalogue carefully—and then submit your bids, either in person or by mail. A wonderful sale is about to take place. Thank you for your participation!

FIRST SESSION

Friday Evening, May 31. 7:00 p.m. Sharp. Lots 1 to 674

UNITED STATES SILVER DOLLARS

We offer for sale one of the finest collections of United States silver dollars ever to be offered at auction. With relatively few exceptions all major varieties from the first year of issue, 1794, through the last year of the Peace type dollar, 1935, are included.

Dollars of the 1794-1803 years are attributed to *The United States Early Silver Dollars*, by M.H. Bolender.

A History of the Silver Dollar Series

During the 18th century silver-dollar size coins in circulation in America were comprised of Mexican, Spanish, and other 8-real pieces, British crowns, and other issues. Although the 1776 Continental U.S. dollar, struck primarily in pewter metal, may have been an official issue (complete information is lacking in this regard), no regular silver dollar was made until 1794.

In 1794 the Philadelphia Mint produced silver dollars for the first time; the beginning of a denomination which was to continue, with many lapses, to our own time. Dollars of 1794 and the first part of 1795 are of the flowing hair style, a design also used on contemporary half dimes and half dollars. From late 1795 through early 1798 the draped bust dollars with small eagle reverse were made. Most 1798 dollars and all of the 1799 through 1804 years are of the heraldic eagle reverse style.

No dollars were minted with dates from 1805 through 1835. In 1836 Christian Gobrecht produced a series of beautiful pattern issues. Varieties of the Gobrecht dollars were also struck in 1838 and 1839. In 1840 the Liberty seated design, a type which was continued until 1873, made its initial appearance. Dollars of the 1840-1865 years are without motto. Later issues have IN GOD WE TRUST.

Morgan type silver dollars were made from 1878 through 1904 and again in 1921. In the latter year the Peace dollar made its debut. Peace silver dollars were struck intermittently through 1935.

The following collection of silver dollars is one of the finest ever assembled. The emphasis was on quality, and Uncirculated and Proof pieces are the rule from 1840 onward. Among early dollars there are a number of AU and Uncirculated grades as well—conditions rarely seen in these 1794-1803 years. The purchase opportunities afforded by this collection may not recur for many, many years.

Attractive 1794 Silver Dollar

- 1 1794 silver dollar. First year of issue of the silver dollar denomination, and a coin long regarded as one of the rarest issues of the series. According to the Philadelphia Mint's

records only 1,758 dollars were issued this year. It has been estimated that of this number only 60 to 80 specimens survive today. Most are in lower grades. The presently-offered Austin Collection 1794 is Extremely Fine with adjustment marks, particularly around the reverse border. There is some slight and normal weakness of striking on the left side, as always seen with this issue. (Cf. *Scott's Encyclopedia of U.S. Coins* page 121: "Always weakly struck at the left on both sides.")

Of the 1794, M.H. Bolender notes: "Only one pair of dies was used in striking the silver dollars in 1794. Only 1,758 pieces were coined. Usually found with the impression weak on the lower part of the date and the stars on the left, and sometimes the border milling on the left does not show up. The corresponding portion of the reverse, particularly the word STATES will therefore also appear weak. Very rare."

The Austin Collection 1794 is particularly sharply struck at the centers, and nearly all of the hair detail on the obverse is sharp. It is certainly among the top twenty finest known examples of this rarity.

Uncirculated 1795 Silver Dollar —Flowing hair type—

- 2 1795 Bolender 6. Flowing hair type as used in '94. With three leaves under each wing on the reverse. Brilliant Uncirculated. A lovely specimen which has virtually flawless fields. There is some slight friction on the very highest points, caused no doubt by normal contact with other coins in a mint bag. The piece is exceptionally well struck and has exquisite detail. This piece, one of the finest 1795 silver dollars in existence, should attract spirited interest from silver dollar specialists as well as type set collectors. Only rarely is a silver dollar of the 1794-1795 design offered in such an outstanding degree of preservation.

Beautiful AU 1795 Silver Dollar

- 3 1795 B-5. Flowing hair design as preceding. With three leaves under each wing on the reverse. A lovely AU specimen with beautiful light iridescent toning. A truly outstanding specimen of a truly classic coin. Worthy of a generous bid!

- 4 1795 B-1. Flowing hair type of '94. Reverse with two leaves under each wing on the reverse. Extremely Fine overall grade. Under a glass some very light adjustment marks can be seen, but this is normal for a silver coin of this period. The coin is well struck, well centered, and has especially sharp denticles around the rim. It is a choice 1795 dollar worthy of inclusion in the finest collection.
- 5 1795 B-5. Flowing hair type of '94. Reverse with three leaves under the eagle's wing. Very Fine or slightly better, but with evidence of retooling in the obverse field.

Uncirculated 1795 Silver Dollar
—Draped bust type—

- 6 1795 B-15. Draped bust type with small eagle reverse. Bolender notes that "the bust is well-centered in the die work." The presently-offered example is a lovely Uncirculated specimen with slight rubbing. The fields have prooflike surfaces. The extraordinarily choice condition of this piece, the cameo-like design, and the extraordinary sharpness make this a prize equal to few if any other specimens known of this variety. A rare opportunity to acquire one of the most important early silver dollars to come on the market in recent decades.

Lovely AU 1795 Silver Dollar

- 7 1795 B-15. Duplicate of preceding. Draped bust obverse; small eagle reverse. Sharply struck AU condition. A very desirable specimen of this scarce early issue.

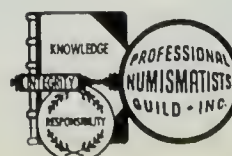

- 8 1795 B-15. Duplicate of foregoing. Draped bust obverse. Reverse with the small eagle design as used in 1796. Attractive Very Fine. A nice coin for a type set.
- 9 1795 B-14. Draped bust style. Reverse with small eagle. One of the most interesting 1795 dollars, this variety has the bust not properly centered on the obverse. It is placed too far to the left and crowds the left-side stars. Very Fine grade. Some light adjustment and rim marks do not detract from the overall desirability of this scarce issue.
- 10 1795 B-15. Draped bust obverse; small eagle reverse. Very Fine. Some light retooling in obverse field, perhaps an effort to remove some adjustment marks.

Beautiful Uncirculated 1796 Dollar
—Small date, large letters—

- 11 1796 B-4. Small date. Large letters on reverse. Uncirculated, with light friction on the very highest parts. Beautifully toned an iridescent gray color. Only when old-time collections are marketed does one have the opportunity to acquire such a magnificent coin.

- 12 1796 B-4. Small date. Large letters on reverse. Sharp EF-AU grade. Many tiny pinpricks, scarcely perceptible to the unaided eye, are visible with a glass, as are some exceedingly minor adjustment marks. Worth, in our estimation, what a nice Extremely Fine coin might bring. Sharply struck and quite attractive.

Exceptional 1796 Silver Dollar
—Large date, small letters—

- 13 1796 B-5. Large date. Small reverse letters. 6 of date recut at top. Several leaves in the reverse wreath touch letters of the legend, a feature which distinguishes this reverse from all others of this year. Tiny die break or lump at I of AMERICA, as always seen. A very beautiful AU specimen. Attractive light toning. Desirable in all regards.

Outstanding 1797 9x7 Stars, Small Letters
—only 342 minted—

- 14 1797 B-2. Obverse is of the draped bust type with the stars arranged 9 to the left and 7 to the right. The reverse is of the small letters style and was struck from the same die used on the reverse of 1795 B-14, 1796 B-1, B-2, and B-3, and, later, 1798 B-2. Its use in 1797 was ephemeral, and only 342 pieces were minted of this variety. As such it is one of the classics among early silver dollar issues.

The present specimen is in choice Extremely Fine grade. Adding to the desirability is its exceptional strike. The reverse of this variety is characteristically weakly struck (cf. the Scott notation "reverse always flatly struck"). Scott further notes that the coin is unknown in mint condition. This specimen is one of the finest known examples and is finer than one listed as "AU" in 1973. The value of this coin, unpriced in the *Guide Book* in grades better than Very Fine, is hard to determine. We would estimate it to be worth in the \$5,000 to \$10,000 range.

Attractive 1797 9x7 Stars, Large Letters

- 15 1797 B-1a. Obverse is of the draped bust design with the stars arranged 9 left and 7 right. The reverse is of the large letters style. Fairly early state of the dies. Attractive Extremely Fine grade. 1797 silver dollars of all varieties are scarce. In fact, as a year the 1797 issues are more elusive than any other year from 1795 through 1803. The present specimen is worthy of a good bid.

Splendid Uncirculated 1797 Dollar
—10x6 stars variety—

- 16 1797 B-3a. Obverse with draped bust and with the stars arranged 10 to the left and 6 to the right. Reverse with large letters. Choice Brilliant Uncirculated. A simply fantastic, nearly indescribable coin! Never have we ever seen a specimen which even approaches this one in quality, and our experience includes having handled some of the very finest silver dollar collections ever formed.

The coin, as noted, is in choice Brilliant Uncirculated grade. A few normal adjustment marks are visible upon close scrutiny, but otherwise the coin is a gem. The fields are fully frosty. The piece possesses excellent sharpness of design detail.

This classic 1797 is one of the highlights of the Austin Collection. When sold, chances are nearly certain that an equal specimen will never appear on the market again. Here is an opportunity for the connoisseur!

Rare 1798 Small Eagle Silver Dollar

- 17 1798 B-1a. Small eagle reverse. Of the over 30 die varieties and combinations known for 1798, B-1 is the only one with the small eagle reverse (reverse style of '96 and '97). The die is the same used to strike 1797 B-1 and has large letters. Very pleasing and sharp Extremely Fine. Acquired from us long ago.

In 1950, when M.H. Bolender wrote his classic *The United States Early Silver Dollars*, he noted of the 1798 small eagle: "this variety is rare and also in good demand for type sets." In the nearly quarter century which has elapsed since then the demand has increased many times over. The Austin Collection offers an unusual opportunity to acquire an exceptionally nice specimen of one of the rarest major varieties among early silver dollar issues.

Gem Uncirculated 1798 Silver Dollar

- 18 1798 B-27. Close date. Final digit 8 high. From our sale of the Robert Marks Collection (November 1972), Lot 75, where it was described as:

"1798 Silver dollar. 13 arrows. Brilliant Uncirculated, sharply struck. A gem coin. Actually, no amount of wording could adequately describe the quality of this coin. The former owner wrote 'Gem, Gem, Gem' on its envelope, and perhaps that description is as good as any. Suffice it to say that in the course of buying and selling millions of dollars worth of coins over the years and in attending countless conventions and auction sales the cataloguer has never seen a comparable specimen. Whatever price the new owner pays for it he will be buying a bargain; a fantastic coin that twice the amount he pays will not secure another specimen of. Enough said!"

Here is a coin for the connoisseur, a coin which is certainly one of the finest silver dollars to come on the market in our lifetime.

Beautiful Uncirculated 1798 Silver Dollar

- 19 1798 B-23. Large or heraldic eagle reverse as foregoing. 13 arrows. Acquired by the owner from our great Terrell Collection sale (May 1973), Lot 901, where it was described as:

"1798 Heraldic eagle. Uncirculated. With light mottled iridescent toning. Some minor marks visible with a glass. Only a few 1798 silver dollars equivalent to this in condition exist today. A rare, rare opportunity for the type set collector or the silver dollar specialist."

This rare opportunity has knocked twice, and here's another chance at this lovely early dollar!

- 20 1798 B-6. Knob 9. 8 very nearly touches bust. Reverse with heraldic eagle design, 10 arrows (and two headless sticks) in eagle's talons. EF-AU, struck off-center to a very slight degree, with the result that the milling (as viewed from the obverse side) is deep and pronounced at the lower left and is missing at the upper right. The off-centering, which does not

affect the coin's value one way or the other in our opinion (although mint errors among early dollars are rare), does not involve the lettering or design.

- 21 1798 B-25. Heraldic eagle. Identifiable by a "whisker" on the chin and a die dot in the field under the chin. B-25 is rare in all grades. The present specimen is a very desirable Extremely Fine example.

- 22 1798 B-24a. Heraldic eagle. From later state of the dies with crack through 12th star to border and several other cracks, including a prominent break from the die stem to the milling on the reverse. Extremely Fine. One small weak area at upper right of reverse, as struck.

- 23 1798 B-27. Heraldic eagle. Lovely VF-EF. Small weak area on reverse as struck.
- 24 1798 B-6. Heraldic eagle. Reverse with 10 arrows and 2 headless sticks. Nice EF. A desirable specimen in all respects.

Choice Uncirculated 1799/8 Dollar
—15 stars on reverse—

- 25 1799/8 Overdate. B-3. So-called *15-star reverse*. There are two stars almost hidden in the clouds, with just the points showing. Choice Brilliant Uncirculated. Some microscopic marks are visible with a glass, but to mention this is nit-picking, for not one in ten early dollars offered as "Uncirculated" in the numismatic marketplace comes even within a country mile of this beauty. Certainly it is one of the finest known specimens, if not *the* finest known, of its variety. Worthy of a generous bid.

AU 1799/8 Silver Dollar

- 26 1799/8 Overdate. B-1. 13 reverse stars. Noted as *very rare* by Bolender. AU grade, but with small planchet flaw at the right side border (but not extending into the design) and with some shallowness of strike, as is usually the case with this variety. Scott notes this variety is *extremely rare in Uncirculated*. This AU specimen certainly is one of the finer examples known of this issue.

Beautiful Uncirculated 1799 Silver Dollar

- 27 1799 B-18. A beautiful Uncirculated specimen which traces its pedigree to our Terrell Collection sale where it was described as:

"1799 Uncirculated. A magnificent coin with lovely light iridescent toning. Some very minor rubbing. Only rarely does a 1799 dollar of this calibre appear on the market. A prize coin!"

A Second Uncirculated 1799 Dollar

- 28 1799 B-9a. A beautiful Brilliant Uncirculated specimen with just minimal evidence of having been in a bag with other coins. Full brilliant mint frost just beginning to tone a subtle light iridescent brown. One of the finest 1799 silver dollars known to exist. Another prize coin for the silver dollar specialist.

Beautiful AU 1799 Silver Dollar

- 29 1799 B-21. A lovely dollar which possesses nearly full original mint frost in the fields. Well struck AU. Well centered, and quite desirable in every respect.

- 30 1799 B-9a. Attractive EF-AU grade. Mint lustre remains between the star points, in the letter spaces, and in other protected areas of the coin's design. Another desirable early dollar.

- 31 1799 B-16. A beautiful EF-AU specimen with subtle light toning. Especially sharply struck. A perfect coin for a choice type set!

- 32 1799 B-11a. Originally called the *no berries* variety, this reverse die does have a vestigial berry which is visible under magnification on the upper side of the branch between the second and third pairs of leaves. Beautiful Extremely Fine grade.

- 33 1799 B-16. Extremely Fine.

- 34 1799 B-23. Stars arranged 8 left and 5 right. Very scarce. An attractive Extremely Fine specimen of this moderately priced but nevertheless quite elusive variety. This variety is many dozens of times rarer than the usual 7x6 star arrangement.

- 35 1799 B-12b. Late striking from a nearly shattered obverse die which displays a multitude of fine hairline breaks. Interesting! VF-EF.

- 36 1799 B-7. Very Fine, cleaned.

Exceptional 1800 Silver Dollar

- 37 1800 B-15. Variety with just 10 arrows in the eagle's talons on the reverse. A very attractive Uncirculated coin, with some evidence of rubbing—caused no doubt by contact with other silver dollars in a mint bag of long ago. Very light iridescent toning adds to the beauty of this exceptional 1800 silver dollar. Worthy of a top bid.

Sharp 1800 "AMERICA" Dollar

- 38 1800 B-19. The famous "AMERICA" silver dollar; so-called due to an I-like die break after the final A in AMERICA. The specimen offered here has the full sharpness of AU or better and is properly graded AU, but just AU, for someone carelessly cleaned the coin long ago, perhaps to make it appear "Uncirculated." Still it is certainly one of the finest known examples of this popular variety.

Beautiful AU 1800 Silver Dollar

- 39 1800 B-18. A lovely EF specimen. Much original mint lustre remaining in protected areas of the coin's surface. A very attractive specimen, and a rarity so fine! Another prize for the silver dollar specialist.

- 40 1800 B-5. Attractive EF grade. Uncommon in this high grade.

Uncirculated 1801 Silver Dollar

- 41 1801 B-3. Brilliant Uncirculated, with some rubbing, particularly

on the obverse. Light brown toning just beginning to form. Only rarely is an 1801 dollar in better than EF grade offered.

42 1801 B-1. Boldly struck and very desirable EF grade. Quite elusive in this condition, or even near it!

43 1802/1 Overdate. B-4. Close overdate. A desirable EF-AU specimen of one of the boldest and most sharply defined overdates in American numismatics.

44 1802/1 Overdate. B-4. Duplicate of the preceding. Another nice EF-AU specimen of this popular early dollar variety.

Choice Brilliant Uncirculated 1802 Dollar

5 1802 B-6. Choice Brilliant Uncirculated. A few very minor marks

are visible with a glass, and we mention this only to please the perfectionist. We doubt if a finer 1802 silver dollar exists, and doubt that if more than two or three equal coins are known. Here is one of the most important, most significant, silver dollars in this sale. The importance of the 1802 in this superlative grade cannot be overemphasized. Worth a run-away price!

Lovely AU 1802 Dollar

46 1802 B-6. Close date. Lovely AU with olive and iridescent toning. A very beautiful 1802 dollar. Exceedingly rare in such high condition.

Rare 1836 Gobrecht Silver Dollar

47 1836 Gobrecht silver dollar. From our fabulous sale of the Armand Champa Collection (May 1972), Lot 276, where it was described as:

"1836 Gobrecht silver dollar. C. GOBRECHT F. on base; reverse with eagle flying left in a field of 26 stars. Impaired Proof which still retains traces of the Proof surface, especially in protected areas of the coin's fields. Although intended as a pattern issue, most of the coins of this design were released into circulation to serve as a medium for commerce. As a result nearly all specimens known today show evidence of use. The presently-offered example is sharp and desirable in all respects. Consider it for your type set."

Now the chance to own this prize coin presents itself anew.

A Second 1836 Gobrecht Dollar

48 1836 Gobrecht silver dollar. Design as preceding. Extremely Fine or better, with full sharpness of detail on the eagle's feathers and other areas. Skillfully plugged near the top of the obverse; expertly done and hardly noticeable. Worth perhaps 50% or more of what a perfect (i.e., not repaired) coin might bring.

Very Rare 1839 Gobrecht Silver Dollar

- 49 1839 Gobrecht silver dollar. Purchased by the consignor from our Armand Champa sale, Lot 1119. The coin is of the reeded edge variety, with plain reverse field. It is one of only 300 struck. Proof, with rubbing in the fields. A nice item for the type set collector or silver dollar specialist.

Rare 1840 Proof Dollar

- 50 1840 Brilliant Proof. Cleaned long ago, and some hairlines are visible. Authentic Proofs of the 1840-1850 decade are exceedingly rare. Fewer than two dozen specimens are known of any date in this range. The presently-offered coin is of exceptional significance: it is the first year of the Liberty seated design. It has been many, many years since we've had a Proof 1840 in one of our sales. This beautiful coin should sell for a record price.

- 51 1841 Brilliant Uncirculated, prooflike. A very select specimen of this scarce early date. Rarely seen in this grade or even close to it.
- 52 1841 Uncirculated. Deep blue and purple toning as acquired over a long span of years. A prize coin from our Robert Marks sale (November 1972).

- 53 1842 Choice Brilliant Uncirculated, prooflike. A splendid specimen of this scarce (in this grade) issue. As the silver dollar specialist knows, with the exception of just a few dates (for example, 1859-O, 1860-O, and 1871), Uncirculated Liberty seated dollars are all exceedingly scarce. Most specimens advertised as "Uncirculated" are what should be correctly graded as AU. In any event, the Austin Collection gives you the chance to bid on many rare prizes—highlights obtained by the consignor from some of the most important rare coin sales of the past decade.

- 54 1842 Brilliant Uncirculated, some bagmarks. From our Robert Marks Collection sale, Lot 658.

- 55 1843 Brilliant Uncirculated, prooflike. Some usual bagmarks, but far above average in overall quality.

Very Rare Proof 1844 Dollar

- 56 1844 Proof. A beautiful coin with attractive light toning. Fewer than two dozen 1844 Proof dollars are known to exist. Compounding the desirability of this issue is the fact that 1844 dollars are rare in any grade (only 20,000 were made for circulation). A find for the silver dollar specialist!

- 57 1844 Uncirculated. From our Robert Marks Collection sale, Lot 660, where it was described as follows:

"1844 Uncirculated. Attractively toned. Prooflike surfaces. Some usual light bagmarks which do not detract from the beauty of this coin."

- 58 Pair of dollars: 1844 VF; 1860 F-VF. (Total: 2 pieces)

- 59 1845 Brilliant Uncirculated. Exceedingly rare in this condition. Only 24,500 dollars of this date were struck for circulation. It is our estimation that fewer than 50 truly Uncirculated 1845 silver dollars still exist. Very Choice!

60 1846 Choice Brilliant Uncirculated. An attractive and far above average example. Much prooflike surface.

61 1846-O Brilliant Uncirculated, minor hairlines. A very attractive specimen of the first New Orleans Mint silver dollar. 1846-O is rarely seen in mint state. We estimate that fewer than 50 Uncirculated examples are known to exist.

2 1847 Choice Uncirculated with beautiful rainbow-colored toning as acquired over a long period of years. Rare in this condition. From our Robert Marks Collection sale, Lot 663.

3 1848 Brilliant Uncirculated, prooflike. A few normal handling marks and one minor edge dent do not detract from the beauty of this coin. Only 15,000 1848 silver dollars were minted. Only rarely does an Uncirculated piece appear on the market. Scott notes that the issue is "very rare in Uncirculated grade." An 1848 dollar this nice is offered for sale not more than once every year or two. A great opportunity for the silver dollar specialist.

1849 Brilliant Uncirculated, prooflike. A very beautiful specimen of one of the scarcer (in this grade) issues of the 1840's. Another prize for the specialist.

65 1849 Choice Brilliant Uncirculated. A specimen which certainly is one of the top dozen finest known 1849 Uncirculated silver dollars. A rare, rare coin in this grade!

66 1850 Uncirculated. Lightly toned. Some usual light bagmarks visible with a glass. A very, very beautiful and far above average specimen of this rare date, a date of which only 7,500 were minted. From the Robert Marks Collection sale, Lot 664.

67 1850 Brilliant Uncirculated. Another attractive specimen of one of the scarcer dates in the series. Seldom does the chance to buy even a worn 1850 occur. The offering in this sale of two mint state examples is outstanding! Choice!

Superb Prooflike 1851 Original Dollar

68 1851 Original silver dollar. Prooflike gem Brilliant Uncirculated grade. The 1851 original silver dollar, distinguished by the date high in the field and close to the base of Liberty, is one

of the rarest of all silver dollars. Fewer than 30 or 40 pieces exist in all grades, and even this estimate may be on the high side. Certainly there are many more 1794 dollars offered, for instance, than there are 1851 pieces. The presently offered coin was acquired from us by private treaty. Our description of the coin at the time is given herewith:

"1851 silver dollar. Original with date high in field; entirely different-appearing than on the usually-seen restrikes of this date. The specimen we offer is a prooflike gem Brilliant Uncirculated example of this issue. Only 1,300 specimens of 1851 were originally coined. It is our estimate that of this number fewer than a dozen strictly Uncirculated pieces survive today. Of these, none could exceed the presently-offered specimen in quality and few could come even close to matching it. A splendid 1851; a coin which will be one of the most prized coins in the collection of its next owner."

One can review the great sale catalogues of the past century and find few coins the equal of this. Will probably sell in the \$10,000 range, but potentially worth far, far more.

Gem Proof 1852 Silver Dollar

- 69 1852 Gem Brilliant Proof. A beautiful specimen of the second rarest (after 1851) silver dollar among Philadelphia Mint Liberty seated issues. The coin, a gem, has a lightly toned surface which enhances its beauty. Finding an 1852 silver dollar is difficult. Finding one equal to the present specimen is nearly impossible. A rare opportunity for the connoisseur.

- 70 1853 Choice Brilliant Uncirculated. Quite rare in Uncirculated condition, as are all silver dollars of the 1850's. Another rare opportunity for the alert collector or investor.

Choice Brilliant Proof 1854 Dollar

- 71 1854 Choice Brilliant Proof. A superb specimen of this great rarity. Fewer than two dozen Proof 1854 dollars are known, and of

that number no more than a half dozen or so could equal the quality of the Austin Collection coin offered here. Should bring a record price.

Note: Like all authentic 1854 Proof dollars the present example has a triangular-shaped mark in the field at the upper right of the 5 in the date. This hallmark was caused by a number punch—perhaps the tip of the 1 or 4 numeral.

Choice Brilliant Proof 1856 Dollar

- 72 1856 Choice Brilliant Proof, with subtle light toning. From our Robert Marks Collection sale, Lot 669. Fewer than two dozen 1856 Proof silver dollars are known to exist. Of these, no more than ten can equal the present coin.

- 73 1857 Choice Brilliant Uncirculated, prooflike. A prize coin from the fabulous Robert Marks Collection sale, Lot 670.

Choice Rare Proof 1858 Silver Dollar

- 74 1858 Beautiful Proof, brilliant surfaces with light iridescent toning. A very attractive specimen which traces its pedigree to the Robert Marks Collection sale (Lot 671) sold by us in 1972. One of the most desired of all silver dollars, the 1858 was minted just to the extent of 80 specimens, according to the *Guide Book of U.S. Coins*. Should sell for a record price.
- 75 1859 Choice Brilliant Uncirculated. An attractive specimen of the last year of the 1850's. Rare in this grade.
- 76 1859-O Choice Brilliant Uncirculated. Some minor surface marks, but far, far above average for 1859-O which is usually seen with severe bagmarks. The only New Orleans Mint silver dollar of the 1850's.

Exceptional 1859-S Silver Dollar

- 77 1859-S Brilliant Uncirculated, prooflike. From the Robert Marks Collection sale, Lot 674. Only 20,000 pieces were minted of the 1859-S. During the past 20 years we have handled fewer than a half dozen Uncirculated examples of this date! Scott notes that the issue is "very rare in Uncirculated grade." In our opinion the 1859-S in Uncirculated condition is one of the most underrated coins in American numismatics. While "tradition" will probably keep it from realizing this much, it certainly would not be overpriced if it were to sell for several thousand dollars.

- 78 1860 Gem prooflike Uncirculated. A most unusual coin: apparently the 1860 was struck from regular Proof dies, but as it lacks certain characteristics of an 1860 Proof (specifically, not all of the stars are fully struck up and there are almost subliminal traces of mint lustre) we imagine that it was prepared by striking the Proof dies on a regular circulation-intended planchet. A really unusual and very beautiful early dollar.
- 79 1860 Choice Brilliant Uncirculated. A lovely specimen. Rare in this grade.
- 80 1860-O Brilliant Uncirculated. Bagmarks in the fields, as usually seen on 1859-O and 1860-O.

- 81 1861 Choice Brilliant Uncirculated. With a lightly toned lovely satin surface. Beauty and rarity combined!
- 82 1862 Choice Brilliant Uncirculated. Another really beautiful specimen of an exceedingly rare coin (in this grade). Generally, Uncirculated specimens of Philadelphia Mint silver coins of this era are far rarer than Proofs. The reason for this is that Proofs were deliberately saved by collectors, whereas the survival of Uncirculated pieces is a matter of incident or chance. Concerning this year, 1862, for example, there were 550 Proofs made and 11,540 Uncirculated pieces. Probably

250 to 350 Proofs still survive today. However, of the business strikes we would estimate that only 30 to 50 survive today in Uncirculated grade. The frequency of Uncirculated vs. Proof pieces of this era can be easily verified by checking auction catalogues and sale lists. The owner of the Austin Collection liked the challenge of seeking out Uncirculated pieces, and that is why preference was given to these.

- 83 1862 Brilliant Uncirculated, but with rubbing and bagmarks.
- 84 1863 Brilliant Uncirculated. Attractive light toning enhances the appearance of this rarity.
- 85 1864 Proof, but mishandled and now with numerous marks and rubbing in the fields.
- 86 1864 Proof. Or perhaps *former Proof* would be a better description. Struck as a Proof, this coin spent a few years in circulation. Worth perhaps what an "AU" coin might bring.
- 87 1864 Proof. With some hairlines and a few marks. The finest of the three 1864 Proofs offered here, this coin is worth perhaps 60% to 80% of what a perfect Proof sells for.
- 88 1865 Brilliant Uncirculated. Exceedingly rare in this condition. The last year without motto. Flawless surfaces but slightly weak strike.
- 89 1866 Impaired Proof. A coin which spent a year or two in circulation.
- 90 1867 Uncirculated. With a beautiful light iridescent surface. One of the most attractive dollars imaginable!
- 91 1868 AU.
- 92 1869 Choice Brilliant Uncirculated. A superb coin which should sell for a record price. Exceedingly rare in this grade.

- 93 1870 Proof. With beautiful light toning. Some minor hairlines, but still very beautiful.
- 94 1870 Impaired Proof. Minor handling marks.

- 95 1870-CC Brilliant Uncirculated, some rubbing. Prooflike surfaces. The first silver dollar issue of the famed Comstock Lode. Only 12,462 pieces were minted.
- 96 1871 Gem Uncirculated. Deep purple and iridescent toning as acquired over a long period of years. Very rare in this grade.
- 97 1871 Choice Uncirculated. With very beautiful smoky gray and yellow iridescent toning. A coin which must be seen to be appreciated. Rare in this grade.
- 98 1872 Brilliant Uncirculated. Prooflike obverse with some minor handling marks. Reverse fully frosty. Perhaps made as a "one-sided Proof." It is fairly certain that the obverse was made from the die used to coin Proofs for sets this year.
- 99 1872 Fine.

Superb Uncirculated 1872-CC Dollar

- 100 1872-CC Gem Brilliant Uncirculated. This coin, without a doubt the finest known specimen of this rare issue, should break all records. Probably struck as a presentation piece, this 1872-CC was kept for many years in the family of a government official. We acquired the coin several years ago and sold it into the Austin Collection. The piece is a magnificent sharply-struck gem coin of which we've never seen an equal. Only 3,150 1872-CC dollars were struck, making this coin a rarity in all grades. In the magnificent condition offered here, this coin is one of America's most desirable silver rarities.

Beautiful 1872-CC Dollar

- 101 1872-CC. The Robert Marks Collection specimen, Lot 677, sold by us several years ago and described as:

"1872-CC Brilliant Uncirculated. With some usual bagmarks in the field and with a tiny lintmark at the 3rd star. A sharply-struck and fully brilliant coin and, as such, a classic. Carson City Liberty seated dollars are rarely seen in conditions even approaching this."

PRICES REALIZED LIST

A list of prices realized, ready 4 or 5 weeks after the sale, is available for \$1 postpaid. Check the space on the back of your bidsheet.

- 102 1872-CC EF-AU. A sharply struck and very desirable specimen of this rarity.

Choice Uncirculated 1872-S Dollar

- 103 1872-S Brilliant Uncirculated. A beautiful specimen of this rare issue. Only 9,000 1872-S dollars were minted. Mint state examples are exceedingly rare.

- 104 1873 Gem Uncirculated. With very beautiful smoky gray and iridescent toning as acquired over a long period of years. Last of the Liberty seated silver dollars.

Note About Morgan and Peace Dollar Grading:

We grade the following Morgan and Peace dollars according to the Mint State system. Mint State 60 (MS-60) refers to an Uncirculated coin with usual bagmarks acquired in normal contact with other coins in a mint bag. MS-65 refers to a silver dollar with only a few bagmarks; a far above average coin. MS-70 refers to a hand-selected dollar of exceptionally choice quality; the type of coin of which there may be only 5 or 10 pieces in a mint bag of 1000. Bagmarks are minimal. Such a coin is the finest of its kind.

In instances in which the obverse grades, for example, MS-65 and the reverse grades MS-70 a diagonal mark is used to indicate the grades of each side, with the obverse given first, as: MS-65/70. In instances in which the entire coin is midway between two grades, MS-65 and MS-70, for example, the grade is stated as MS-65+.

Exceptional 1889-CC Uncirculated Dollar

- 125 1889-CC Brilliant Uncirculated. MS-65. Prooflike surfaces. This coin, from our celebrated sale of the Armand Champa Collection (May 1972), is certainly one of the finest specimens of this rare issue in existence. 1889-CC is, of course, the most desired of all Carson City Morgan dollars. A tiny bagmark on 9 of date does not mar the beauty of this coin.

A Second Uncirculated 1889-CC Dollar

- 126 1889-CC Brilliant Uncirculated. MS-65. A duplicate specimen of this elusive and highly desired Carson City issue. A remarkable opportunity for the Morgan dollar specialist.
- 127 1890-CC MS-65.
- 128 Group of dollars representing the coinage of 1891: 1891 MS-60; 1891-CC MS-65+; 1891-O MS-65; 1891-S MS-65/70. (Total: 4 pieces)
- 129 1892 MS-70. Exceptional! Light toning. Rare so choice.
- 130 1892 AU; 1892-O MS-65. (Total: 2 pieces)
- 131 1892-CC MS-65+. A hair's breadth from a full MS-70. One of the finest known examples of this scarce Carson City issue.

Uncirculated 1892-S Dollar

- 132 1892-S Brilliant Uncirculated, some handling marks. Obverse is MS-60; reverse is MS-65. One of the scarcer San Francisco Mint issues. A prize coin which the consignor purchased at our Armand Champa Collection sale (Lot 936).
- 133 1893 MS-60. Scarce Philadelphia Mint issue.

- 134 1893-CC MS-65. A very choice specimen of the last Carson City Mint silver dollar, and one of the most desired pieces in the entire Morgan series. Worth a premium price.

- 135 1893-O MS-65+. Close to MS-70. One of the finest known specimens of this rare New Orleans issue.

Choice Uncirculated 1893-S Dollar

- 136 1893-S Choice Brilliant Uncirculated. MS-65.

The 1893-S has always been considered to be the rarest of all Morgan dollars in this grade. It is presumed that most of the 100,000 pieces minted were subsequently melted as part of the Pittman Act of 1918, which saw the conversion into silver bullion of 270,232,722 silver dollars of earlier dates. (It is also presumed that the 12,000 business strikes of the 1895 Philadelphia dollar met the same fate.)

No 1893-S dollars are represented in the U.S. Treasury holdings, nor were any part of the recent releases of silver dollars.

- 137 1894 Brilliant Uncirculated. MS-65. A very attractive specimen of this rare Philadelphia Mint issue.

- 138 1894-S MS-65+. A really outstanding specimen of this elusive issue. Certainly few specimens the equal of this exist. A prize for the specialist!

Choice Proof 1895 Dollar

- 139 1895 Morgan dollar. Choice Brilliant Proof. This is one of the very finest 1895 Proof Morgan dollars in existence anywhere. 90% of the specimens known today cannot match it in quality.

The 1895 has always been the "king of the Morgan dollars." Although mint records report that 12,880 were coined, we can trace no record whatever of a specimen in Uncirculated grade (i.e., one from the 12,000 mintage of business strikes) having ever been offered. All known genuine specimens are either Proofs or impaired Proofs, to our knowledge. It is presumed that the aforementioned Pittman Act (cf. our notice under Lot 136) caused the melting of these 12,000 pieces.

The net mintage of just 880 Proofs remains the sole source of supply for 1895 Philadelphia Mint dollars. Of the 880 Proofs minted, we doubt that more than 500 survive today. As noted, the Austin Collection specimen is one of the finest known pieces from this group. A prize 1895 dollar worthy of a record bid!

- 140 1895-O Scarce issue. Extremely Fine with light retouching on cheek.

Choice Uncirculated 1895-S Dollar

- 141 1895-S Choice Brilliant Uncirculated. MS-65. A very attractive and outstanding specimen of one of the rarest branch mint Morgan silver dollar issues. Only rarely does a specimen this choice appear on the market.

- 142 Group of dollars: 1896 MS-65; 1897 MS-65; 1897-S MS-65; 1898 MS-70; 1898-O MS-65. (Total: 5 pieces)

Note: The Austin Collection sale catalogue gives one of our era's greatest opportunities to bid on choice Uncirculated Morgan and Peace type silver dollars. The rarities are here—both in this section and later on in this catalogue—as well as common issues. Over the years these large and beautiful coins have been collectors' favorites. As numismatic interest increases year by year, interest in Morgan and Peace dollars, already at a high level, will increase further. Many of the pieces in the Austin Collection represent the finest quality obtained in many years of looking through auction sales, dealers' stocks, and so on. The landmark Austin Collection contains many opportunities which may never be repeated.

- 143 1896-O MS-60/65. Scarce.

- 144 1896-S MS-65, obverse; MS-60, reverse.

- 145 1897-O MS-65. Rare so fine.

- 146 1898-S MS-65.

- 147 Group of dollars: 1899 MS-70; 1899-O MS-65; 1900 MS-65;

1900-O MS-65/70; 1901-O MS-65/70. A nice grouping, with emphasis on *quality*—the guiding precept of the Austin Collection. (Total: 5 pieces)

148 1899-S MS-65. A lovely specimen of this rare issue.

149 1900-S MS-65/70. One of the finest of its kind.

150 1901-S MS-65. A splendid coin!

151 Group of dollars: 1902 MS-65; 1902-O MS-65/70; 1903 MS-65; 1903-O MS-65/70. (Total: 4 pieces)

152 1902-S MS-65. Beautiful.

Choice Uncirculated 1903-S Dollar

153 1903-S Choice Uncirculated. MS-65+. Close to or perhaps even MS-70. With very, very beautiful light rainbow colored toning as acquired over an extended period of time. A classic coin from a classic collection. Worthy of a premium bid!

Another Choice Uncirculated 1903-S Dollar

154 1903-S Choice Brilliant Uncirculated. MS-65+. A match for the preceding coin, except that the surface of the present example is brilliant rather than toned. A very important opportunity for the Morgan dollar specialist.

155 Group of dollars: 1904 MS-65; 1904-O MS-65; 1921 Morgan MS-65+; 1921-D MS-60+; 1921-S MS-65. (Total: 5 pieces)

156 1904-S Choice Brilliant Uncirculated. MS-65. An outstanding specimen of this rare issue.

PLAN TO ATTEND THE SALE!

Choice Proof 1921 Morgan Dollar

157 1921 Morgan dollar. Choice Brilliant Proof with very attractive light lilac toning. A splendid coin with full Proof fields and exquisite sharpness of strike. Over the years we have handled several specimens of the rare 1921 Proof, but none has been finer than this example, an especially choice piece which we sold into the Austin Collection years ago.

The 1921 Proof Morgan dollar is listed but unpriced in the *Guide Book* (as are the rare Proofs of the 1921 and 1922 Peace dollars). The piece is also listed in *Scott's Encyclopedia of U.S. Coins* (cf. p.268) and is priced at \$5,500. It is further noted that *there are only 7 to 9 specimens known to exist*. The Scott book, prepared in 1970 and bearing a cover date of 1971, is far out of date so far as the prices of many of the listed issues are concerned. The market has advanced sharply in the four years since then.

No finer 1921 Proof Morgan does or could exist. The coin is at least fifty times rarer than an 1895 Proof dollar and is, in fact, one of the very rarest of all American Proof silver coins. What it brings is up to you, of course, but we would consider any price in the \$5,000 to \$10,000 range to be an exceptionally favorable purchase for the coin is potentially worth far more.

158 1921 Peace dollar. Brilliant Uncirculated. MS-65. A better than average strike, with much hair detail sharp.

Note: The 1921 Peace dollar is a distinctly different design type in its own right. The obverse and reverse, especially the obverse, are in very high relief—reminiscent in a way of the MCMVII \$20 gold. It was found that under normal coinage operations the high parts of the design did not strike up properly. So, beginning in 1922 the design was redone, this time in much shallower relief.

Set of 1921-1935 Peace Dollars

159 Complete set (except for the easy-to-find and inexpensive 1923-S) of Peace type silver dollars, 1921 to 1935 inclusive, one of each date and mint. This set, gathered together over a long period of years, is exceptional in its quality. Grades range from MS-60 to MS-70, with the average being MS-65. This lovely set is housed in an attractive "Capital" brand plastic display holder. A premium-quality set of one of America's most popular coin series. (Total: 23 pieces)

Uncirculated 1875-S/CC Trade Dollar

- 167 1875-S over CC Brilliant Uncirculated. One of the most interesting varieties in the trade dollar series, the 1875-S/CC contains vestigial traces of a tiny "CC" mintmark near the regular "S" mintmark (cf. page 157 of the *Guide Book* for a close-up illustration.) Minor bagmarks. Rare and interesting!

Another Uncirculated 1875-S/CC

- 168 1875-S/CC Brilliant Uncirculated. Duplicate of the preceding. Some minor surface marks. Rare, and seldom offered for sale. An important opportunity for the trade dollar specialist.

- 177 1883 Proof. Beautiful light gun-metal blue toning. Some very minor hairlines visible with a glass. A very attractive coin overall.

UNITED STATES COLONIAL COINS

We present a selection of United States colonial issues, coins of the states, and pieces honoring President George Washington. Note particularly our listing of interesting groups and starter collections at the end of the colonial series.

- 178 1652 Pine Tree threepence. Sharp Extremely Fine. Noc variety no. 36. Without berries; legend spelled correctly as NEW ENGLAND. This beautiful Extremely Fine specimen has all design details crisp and sharp. A prize coin for the colonial specialist!
- 179 1652 Pine Tree shilling. Small planchet variety. Noc-28. Abt. Fine.
- 180 1652 Pine Tree shilling. Small planchet. Noc-16. Very Good.

- 181 (1658) Mark Newby or St. Patrick's farthing (1/4 penny). Rare variety with martlet (bird) under King David (cf. *Scott's Encyclopedia of U.S. Coins*, page 27, listing no. 289). Attractive VF-EF grade. An important coin for the specialist.

**Important Variety of 1723 Wood's Farthing
—with D.G. REX legend—**

- 82 1723 Wood's farthing. Exceedingly rare variety with legend spelled as D.G. REX (instead of the normal DEI GRATIA REX). Obverse die of 1722. Exceedingly rare. Considered to be a pattern by Scott (cf. page 28, listing no. 302, in that reference) and noted as being Rarity 7 — just 7 to 9 specimens known to exist. The D.G. REX variety is listed in the *Guide Book of U.S. Coins* (cf. p. 21) and is noted as being "extremely rare." The presently-offered coin, a sharp EF-AU example, cost \$700 years ago. Considering the extreme rarity of this variety plus the condition of the example we offer we would not be surprised to see this break the \$1000 mark now.

- 83 1760 Voce Populi halfpenny. The "VOOE" variety. Nice Extremely Fine.

- 84 1766 Pitt halfpenny. Copper metal. Attractive Extremely Fine. Rare and popular issue.
- 85 1766 Pitt halfpenny as preceding but struck in brass. Probably originally tin plated (cf. Scott, page 29, listing no. 315A). Very Fine. Rare. Unlisted in the *Guide Book of U.S. Coins*. Unpriced in Scott in grades above Fine.
- 86 1773 Virginia halfpenny. With period after GEORGIUS. AU or better, with full sharpness of design detail; exceptionally sharp, in fact.
- 87 1876 Vermont copper. Ryder-6. Sun-over-mountains motif; VERMONTENSIVM spelling on the obverse. G-VG.

- 88 1788 Connecticut. *Horned Bust* variety. Miller 4-L. Extremely Fine. Some planchet striae on cheek. Well centered and sharply struck. From the late state of the dies, which is desirable in this instance for the distinctive "horn" feature (caused by progressive die failure) is unusually prominent.

- 189 Collection of Connecticut coppers. A nice start on a specialized collection; a group containing some of the most fascinating varieties in the series: 1785 Miller 4.4-C. Bust right. F-VF; 1786 Miller 4.1-G. Mailed bust left. Fine; 1786 Mailed bust left, another. VF; 1786 Mailed bust left. Rare variety, Miller 5.10-P. Ex. Bryant Collection. G-VG; 1787 Draped bust left, 6 varieties in the following grades as individually noted: VG; VG; Fine; F-VF; VF; VF-EF; 1787 *Horned Bust* variety. Miller 4-L. VF-EF. Intermediate die state with distinctive "horn" appearing as a cusp-shaped object in the field; 1787 Draped bust left, INDE/FUDE variety. Miller 32.5-aa. Engraver thought he was working on a Fugio cent die, cut FU of FUGIO, realized his blunder, and then overcut the work with the correct INDE. Fine; 1788 Mailed bust right. Miller 3.1-B.1. Struck 10% off center, and over a Nova Constellatio copper, the Nova undertype being still visible in areas, especially in the otherwise blank off-center cusp!; 1788 Mailed bust left. G-VG. A very attractive collection of Connecticut pieces, and one which should attract spirited bidding! (Total: 14 pieces)

208 1795 Grate cent as preceding. Reeded edge. Large buttons. AU.

209 Washington funeral medal. Silver. Baker-166. Struck by noted silversmith Jacob Perkins of Newburyport, Massachusetts, this issue was produced in early 1800 (Washington died December 14, 1799) and is pierced at the top (as usual) for suspension on a small ribbon. Such commemorative pieces

were worn in the numerous mourning parades held in President Washington's honor. The obverse depicts the bust of Washington surrounded by the legend HE IS IN GLORY, THE WORLD IN TEARS. The reverse shows a monogrammed funeral urn with abbreviated biographical statistics surrounding. Attractive VF-EF. One of the most interesting and most sentimental Washington pieces.

UNITED STATES HALF CENTS

Beautiful AU 1793 Half Cent

- 218 1793 Half cent. Cohen-1. A sharply struck and well centered AU example. A few minor surface marks must be mentioned for accuracy. A rim break occurs over FAME of OF AMERICA on the reverse. 1793 half cents are rarely seen in condition so choice as this. Here is a coin which will be a prize acquisition for the type set collector or the half cent specialist. A truly beautiful piece!

UNITED STATES CENTS

Exceptionally Sharp 1793 Chain Cent

- 225 1793 Chain AMERICA cent. Period after date and legend. Sheldon-4. Extremely Fine. Exceptionally sharp for a chain cent. Small flat spot on left edge; otherwise perfect. Deep matte gray surfaces. A really beautiful 1793 chain cent of a

quality seldom offered. A prize item for the cent specialist or the type set collector.

Attractive 1793 Wreath Cent

- 226 1793 Wreath cent. S-8. Vine and bars edge. Extremely Fine or better. Sharply struck and possessing excellent detail. Deep brown matte-like surface which highlights the relief portions of the coin. A splendid 1793 cent!

Sharp 1793 Wreath Cent

- 227 1793 Wreath cent. S-9. Vine and bars edge. With the full sharpness of EF or AU, but with burnished surfaces and with some strengthening of details. A very beautiful coin; one which should be seen in person to appreciate its attractiveness.

- 228 1793 Wreath cent. S-9. Vine and bars edge. Well struck and of a pleasing deep brown color. A very desirable specimen of this elusive issue. Ideal for a high-quality type set of United States coins. VF+.

- 229 1793 Wreath cent. S-10. Vine and bars edge. Scarce die variety. Abt. Fine, but struck on a porous planchet. Attractive light brown color.

Rare 1793 Liberty Cap Cent

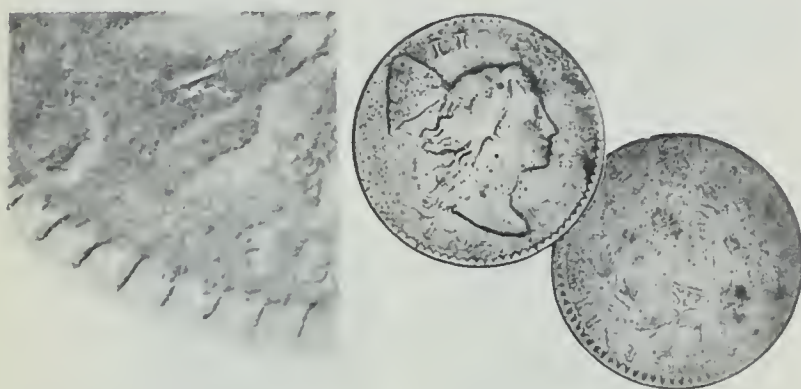

- 231 1793 Liberty cap cent. S-13. Rarest of the three major (chain, wreath, cap) 1793 types. Fine overall. Actually the coin could be graded VF, but a light surface granularity reduces the grade to Fine.

- 232 1794 S-31. *Second Marred Field* variety. Beautiful Extremely Fine. Perfect, save for some light rim bumps. Pleasing chocolate color.

Very Rare 1794 Starred Reverse Cent

- 233 1794 Starred Reverse cent. S-48. With circle of 94 minute 5-pointed stars on the reverse. The *Starred Reverse* is one of the most interesting and most enigmatic coins in American numismatics. Dr. William H. Sheldon considers the variety to be the result of an idle hour at the mint, of a diecutter "trying his hand" to make something distinctive and different. *Scott's Encyclopedia of U.S. Coins* considers the piece to be a pattern issue. In any event, it is one of the most curious—and most rare—issues of the 1790's.

The present specimen has an obverse which grades Very Good. The reverse is Abt. Good, with about half of the design still visible. The 5-pointed stars are distinct along the rim in the lower left quadrant. A desirable coin for the large cent collector who does not want to spend thousands of dollars for a sharper specimen (the finest known example of S-48 sold for \$25,000; a record for a U.S. one-cent piece).

- 234 Group of large cents: (1) 1794 S-44. Very Good; (2) 1796 Draped bust. S-110. Good obverse; Abt. Good reverse; (3) 1797 S-138. Good; (4) 1798/7 Overdate. S-152. Very Good; (5) 1800/179 S-196. Abt. Fine; (6) 1803 Small date, small fraction. S-246. Abt. Fine; (7) 1839 *Booby Head* variety. Extremely Fine; (8) 1853 AU. A nice group, and one with some scarce pieces. (Total: 8 pieces)

- 235 Group of large cents: (1) 1794 S-67. Abt. Fine; (2) 1798 S-185. Fine; (3) 1800 S-212. Fine, some marks; (4) 1802 S-227. Very Good; (5) 1803 Small date, large fraction. S-257. Fine; (6) 1806 Scarce date. S-270. Fine; (7) 1807/6 Overdate. S-273. Very Good. (Total: 7 pieces)

- 236 1795 Plain edge. ONE CENT high in wreath. S-76b. Lovely AU with a chestnut and reddish coloration. An exceptionally well struck example of S-76b, and unlike many of its contemporaries, this piece has full obverse denticles sharp. A prize acquisition for the large cent specialist.

- 237 1796 Liberty cap. S-81. Very Fine.

- 238 Group of cents: (1) 1796 Draped bust. S-97. Fine, some pitting; (2) 1807 S-276. Fine. Some black corrosion; (3) 1807 *Comet* variety. S-271. VG+; (4) 1821 Very Fine. (Total: 4 pieces)

- 239 1797 S-138. Late state of the dies with swelling at S OF A on reverse. Very Fine.

- 240 1798 S-187. Beautiful Extremely Fine.

Exceptional 1799 Cent

- 241 1799 Cent. Perfect date. S-189. Very Fine to Extremely Fine. The obverse is VF-EF and has the date full and bold, and much hair detail. The reverse is Very Fine or close to it. The coin has a smooth and even surface of a pleasing medium dark brown color. 1799 is the most desired date in the large cent series. This specimen is certainly one of the finest 1799 cents to come on the market in recent years.

- 242 1800 S-197. The *Q* variety. Very Fine.

- 243 1801 S-219. The famed *Three Errors Reverse* variety. This coin represents diecutting incompetency's finest hour. There are three different errors: the fraction is engraved as 1/000 instead of 1/100; UNITED is somehow spelled as IUNITED; and one of the wreath stems is missing. Nice F-VF, with the reverse errors very bold.

- 244 1802 S-232. Extremely Fine.

- 245 1802 S-236. Fine to Very Fine.

- 246 1803 S-260. Small date, large fraction. Extremely Fine.

250 1805 S-267. Extremely Fine to AU.

251 Pair of cents: 1805 S-267 Very Fine; 1838 Brown Uncirculated, but with some light pin scratches on obverse. (Total: 2 pieces)

252 1806 S-270. Extremely Fine. A few minor edge bumps separate this from being an exceptional 1806, but it is nevertheless quite desirable.

253 1807/6 Overdate. S-273. Extremely Fine. Some minor verdigris. Quite sharp overall, and with the overdate feature especially bold.

254 1808 S-279. VF to EF. Some lightness of striking, especially at the lower right as is characteristic of this date.

255 1809 S-280. Extremely Fine. Some obverse shallowness due to striking. Reverse bold. A nice specimen of one of the scarcer dates among 19th century large cent issues.

256 1810/09 Overdate. S-281. Very Fine. Some minor granularity on the reverse.

257 1811/10 Overdate. S-286. Sharpness of AU or better. Some light porosity visible under magnification. Attractive claret-brown color. Scarce in such excellent condition.

258 1812 S-288. Extremely Fine. Some minor planchet granularity is scarcely worthy of mention. A very pleasing cent overall. Attractive reddish brown color.

259 Pair of cents: 1813 S-293. Very Fine; 1814 S-294. Crosslet 4. VF, one edge bump. Struck slightly off center. (Total: 2 pieces)

263 1819 Red and brown Uncirculated.

264 1821 Scarce date. Extremely Fine with some claims to AU. A very attractive specimen of this elusive (in this grade) issue.

265 Group of large cents: (1) 1822 Very Fine; (2) 1824 Very Fine, porous; (3) 1825 AU; (4) 1826 VF-EF; (5) 1827 VF-EF. (Total: 5 pieces)

THE AUSTIN COLLECTION -of- FLYING EAGLE AND INDIAN CENTS

The grouping of flying eagle and Indian cents from the Austin Collection contains some of the most important rarities ever offered. There are two specimens of the 1856 flying eagle cent, an Uncirculated example of the very rare 1858/7 overdate, the Robert Marks Collection specimen of the 1864-L Proof cent, one of the two discovery specimens of the 1888/7, and other desirable pieces.

Beautiful Proof 1856 Flying Eagle Cent

280 1856 Flying eagle cent. Struck in copper nickel. Brilliant Proof. Some very minor spots visible under magnification. A pristine coin which has never been cleaned. (Note: the piece could be "dipped" to remove the light spots, if desired - but we think that such pieces should be left in their original condition).

Another Beautiful 1856 Flying Eagle Cent

281 1856 Flying eagle cent. Lovely Brilliant Proof. The obverse with

full Proof surface. The reverse with a semi-frosty prooflike surface as seen on early impressions from the dies. Two microscopic planchet defects on reverse. Some attractive light toning. Another extremely desirable specimen of one of America's most popular coin issues.

282 Set of flying eagle cents consisting of three varieties of 1857 and 1858: 1857 Brilliant Uncirculated; 1858 Small letters. Choice Brilliant Uncirculated; 1858 Large letters. Brilliant Uncirculated, light toning. A nice group! (Total: 3 pieces)

Exceptional 1858/7 Flying Eagle Cent

283 1858/7 Overdate. Choice Brilliant Uncirculated. Sold by us years ago with the notation that it was at that time the *finest example we had seen*. In the intervening years we have not seen any others which exceed the present coin (indeed, it is doubtful if a finer one could exist!) and we have seen only one which can compare to it. The 1858/7 in this grade is one of the most important rarities in the American cent series. Here is a coin worth reaching for!

284 Collection of copper-nickel Indian cents. One of each date: 1859 Choice Brilliant Uncirculated; 1860 Brilliant Uncirculated, a few minor marks; 1861 Choice Brilliant Uncirculated; 1862 Brilliant Uncirculated, some microscopic spots; 1863 Choice Brilliant Uncirculated; 1864 copper-nickel. Choice Brilliant Uncirculated. A very nice selection of far above average quality. The 1859 is important in its own right as a type coin—the only year with the Indian head obverse and laurel wreath reverse. The 1861 is important as a low-mintage date. (Total: 6 pieces)

Gem Proof 1864-L Cent

285 1864-L Indian cent. Gem Proof. The fabulous coin from our sale of the Robert Marks Collection (November 1972) where it was described as:

1864-L Indian cent. Brilliant Proof; a gem. We present one of the highlights of the Robert Marks Collection—a flawless gem Proof specimen of one of America's rarest and most desired Proof coins: the 1864-L cent. The specimen has a brilliant obverse and a lightly toned reverse. The coin has never been cleaned, nor does it have any impairments of any

kind. It is the choicest and most beautiful 1864-L Proof cent we've ever had the pleasure of offering for sale.

Among United States Proof coins struck from 1858, the first year sets were first made available to collectors, until the last year in the old series of Proof sets, 1916, there are the following extreme rarities: 1864-L cent, a specimen of which is offered here. 1864 Small motto 2c piece. 1867 with-rays nickel. 1884 and 1885 trade dollars. Each of the foregoing was struck in exceedingly limited numbers and was not generally included as part of the Proof sets offered for sale. In the instance of the 1864-L, this was the last variety of 1864. Earlier in that year 300 copper-nickel Proof cents and 150 regular bronze cents (without L) were used to fill the cent space in the first 450 Proof sets ordered from the mint. 470 copper and silver Proof sets in all were issued, so just a fortunate 20 sets—presumably the last 20 set orders filled that year—had the 1864-L cent. No record is extant of others having been sold separately, so the mintage remained at just 20 pieces.

How many Proof 1864-L cents are known today? *Scott's Encyclopedia of U.S. Coins* (cf. p.263) estimates that just 7 to 9 are known.

When bidding on this coin, consider the following: (1) Here is the finest specimen we have ever handled of one of America's most famous coins—an issue of which just 7 to 9 Proof examples are estimated to exist today. As such it rates as one of the most desirable of all American classics. (2) The market for prime rarities is very strong, and other coins of comparable rarity have fetched record prices whenever they have been offered. (3) The Proof 1864-L cent is part of America's most popular coin series—small cents—and this is and always has been in tremendous demand.

If the Proof 1864-L cent is on your want list, consider that an equal or finer specimen may not appear on the market again in your lifetime. It has taken us nearly two decades of handling millions of dollars worth of coins to be able to offer this specimen—and once it is sold we know where no duplicate can be obtained, even at a multiple of the realized price. The coin will be sold to the highest bidder—so what it realizes is up to you. We think that an estimated valuation of \$7,500 to \$10,000 may be on the low side.

So ends our original description of this coin as given in the Robert Marks Collection catalogue. The coin was sold into the Austin Collection at \$8,600, which was a new record price.

Since 1972 the market for choice United States coins has sharply advanced. An 1884 Proof trade dollar, a coin of which only about 10 pieces are known, sold for \$30,000 in our recent Stanislaw Herstal Collection sale (February 1974). Other American rarities have sold for record prices above 1972 levels. We think if this 1864-L cent, a superb specimen of one of America's most famous rarities, could be purchased in the \$10,000 to \$15,000 range it would be a really excellent value. Conceivably it could sell for even more, and it would be worth it.

286 1864-L Red and brown Uncirculated. Nearly full original blazing mint brilliance. A never-cleaned, pristine beauty! Worth a premium bid!

287 1864 Bronze. Choice Brilliant Uncirculated.

288 1865 Choice red and brown Uncirculated.

289 1866 Red and brown Uncirculated.

291 1868 Choice red and brown Uncirculated.

292 1869/8 Choice Brilliant Uncirculated. A full mint state example of one of the most desired varieties in the Indian cent series. Very rare in this condition; several times rarer, in fact, than regular (i.e., non-overdate) cents. A rare opportunity for the Indian cent specialist!

293 1869/8 Beautiful red and brown Uncirculated. Another choice and really beautiful example of one of the most elusive varieties in the Indian cent series.

294 1870 Choice Brilliant Uncirculated.

295 1871 Lovely Brilliant Proof with a magnificent golden color.

296 1871 Choice Uncirculated. Light iridescent toning just beginning to form. The Indian cents in the Austin Collection are remarkable for their *quality*—a fact which should be considered when bidding. Such choice pieces do not come up for sale often.

297 1872 Choice Brilliant Uncirculated. Rare.

Rare 1873 Double LIBERTY Cent

298 1873 cent with LIBERTY doubled in the headband. From our magnificent Terrell Collection Sale, Lot 185, where it was described as follows:

1873 Cent with the letters of LIBERTY in the headband completely doubled. First described (to our knowledge) in our October 1958 catalogue in an article by Walter Breen, who noted: "1873 Closed 3 with double LIBERTY. Only one known; collection of the writer. Evidently a result of the same process that produced the 1955 double die cent—two

blows of the same working die were in imperfect alignment. This does not simply have double outlines to LIBERTY—the word appears twice with some overlapping of adjacent letters. There are similar double impressions on the feathers.” Since 1958 we have handled about a dozen specimens, including only two or three equal to or better than the presently-offered one, a sharp Uncirculated example, in full brilliance, which was cleaned a few years ago. Listed in *Scott's Encyclopedia of U.S. Coins* and priced at \$90 Fine, \$150 VF, and unpriced in higher grades, indicating extreme rarity.

So ends our earlier description. The coin fetched \$300 at the Terrell Collection sale. Today it should be worth quite a bit more.

- 299 1873 Closed 3. First issue of the year. Choice Brilliant Uncirculated.
- 300 1873 Open 3. Red and brown Uncirculated, some light rubbing. Nonetheless attractive.
- 301 1874 Choice Brilliant Uncirculated, save for some minute specks.
- 302 1875 Choice red and brown Uncirculated.
- 303 1876 Red and brown Uncirculated. Centennial year.
- 304 1877 Chocolate brown AU. An attractive specimen of one of the most desired of all American small cents.
- 305 1878 Red and brown Uncirculated.
- 306 Date run of Indian cents from the Austin Collection. One of each date from 1879 to 1889 inclusive. Each coin is Uncirculated, with surface coloration ranging from red and brown to brilliant. A nice hand-picked lot! (Total: 11 pieces)

Uncirculated 1888/7 Discovery Coin

- 307 1888/7 Overdate cent. From our Robert Marks Collection sale, then our Terrell Collection sale—from which the consignor purchased it. The coin sold for \$2600 at the Marks sale and \$4000 at the later Terrell event.

The coin is attractive red and brown Uncirculated with prooflike surface in areas. This variety was first identified by James F. Ruddy and announced to the numismatic fraternity in 1970 via a front-page story in *Coin World*, and by stories in *Numismatic News* and other publications. Two specimens were originally found by James F. Ruddy. Both Uncirculated, they had been kept together, possibly since the year of issue, and were found in an old Virginia estate. All known specimens have a end-like die break above TE of UNITED on the obverse. The 1888/7 die apparently failed early in its life, thus accounting for the rarity of 1888/7 and the consequent fact that it had not been noticed by numismatists for a period of over 80 years after its production.

The two discovery pieces were subsequently put on the market by Bowers and Ruddy Galleries, Inc. One went to a prominent Eastern dealer, and the other went to Robert Marks. The Robert Marks specimen came on the market again when we had the pleasure of auctioning Mr. Marks' beautiful collection. The coin was sold for \$2600. The buyer's coins were sold by us later in the Terrell Collection sale, and the 1888/7 fetched \$4000 and went into the Austin Collection—from which it is now offered.

Despite quite a bit of publicity given to the 1888/7 in the four years since its discovery, and despite listing and illustration in the *Guide Book*, the 1888/7 remains a great

rarity. We know of only two Uncirculated pieces: the two discovery coins, of which the present specimen is one. In addition there are perhaps a half dozen other coins in worn grades. For the Indian cent specialist the present offering represents an extremely important opportunity.

- 308 Choice group of Indian cents, each Uncirculated with a red and brown to brilliant surface. The following dates are represented: 1890, 1891, 1892, 1893, 1895, 1896, 1897, 1898, and 1899. (Total: 9 pieces)
- 309 1894 With sharply recut 4 in date. Scarce and interesting variety. Choice Brilliant Uncirculated. One of the finest known examples of this issue.
- 310 Date run of Indian cents. One of each Philadelphia Mint issue from 1900 to 1909 inclusive, each Uncirculated, ranging from brilliant to lightly toned. Each coin is choice. (Total: 10 pieces)
- 311 1908-S First branch-mint one cent piece. Choice Brilliant Uncirculated. Rare so fine!
- 312 1909-S Indian. Choice Brilliant Uncirculated. A lovely specimen of this low-mintage (just 309,000 coined) issue. The reverse is just starting to tone.

ADDITIONAL U.S. SMALL CENTS

We offer a choice grouping of American small cents: select flying eagle, Indian, and Lincoln issues, from the Austin Collection and other properties.

Choice 1856 Flying Eagle Cent

- 313 1856 Flying eagle cent. A very beautiful lightly toned Proof specimen of one of America's most popular rarities. Fewer than 2,000 1856 flying eagle cents were coined, and of that number no more than a few hundred survive today in condition equal to the present example.
- 314 1857 Flying eagle. Brilliant Uncirculated, some light rubbing.
- 315 1857 Flying eagle. AU. Major planchet "flake" on reverse comprises most of the upper left side of the wreath. An interesting mint error!
- 316 Group of cents: 1857 Flying eagle. EF-AU; 1859 EF; 1864 copper-nickel. Choice Brilliant Uncirculated; 1883 toned Proof; 1889 toned Proof; 1895 toned Proof; 1898 toned Proof; 1901 AU; 1959 Brilliant Proof. A nice lot with many attractive pieces in it! (Total: 9 pieces)
- 317 Group of cents: 1857 Flying eagle. Fine; 1858 SL. F-VF; 1859 VF-EF; 1862 EF; 1863 VF; 1866 EF; 1909 Indian. AU (Total: 7 pieces)
- 318 1858 Small letters. Brilliant Uncirculated, with microscopic spotting.

Rare 1858 Proof Flying Eagle Cent —Large letters variety—

- 319 1858 Large letters. Brilliant Proof. Some tiny specks visible under magnification. All in all, this is one of the finest specimens of this issue in existence. It is sharply struck, in full brilliance, and is of beautiful appearance. Probably no more than a dozen or two the equal of this are known. Worth a premium bid!

- 320 1858 Large letters. Choice Brilliant Uncirculated. Prooflike surfaces. Mint-state flying eagle cents are becoming hard to find. Never common to begin with, the demand for flying eagle cents for type sets has attenuated the short supply.

- 321 1859 Brilliant Proof. A gem, save for one scarcely-noticeable lintmark on the obverse. Another "rarest of the rare" item! The 1859 Indian cent is especially important as the only regular issue year with the Indian cent obverse and laurel wreath reverse. A prize for the connoisseur!

- 322 Group of Uncirculated and Proof Indian cents. A nice lot which would make a nice beginning for a top-grade date set: 1860 BU; 1884 Brilliant Proof; 1887 Iridescent toned Proof; 1891 Toned Proof; 1894 Proof, some microscopic marks; 1895 Toned Proof; 1896 Red and brown Uncirculated; 1897 Red and brown Uncirculated; 1904 Brilliant Uncirculated; 1908 Brilliant Uncirculated. (Total: 10 pieces)

- 323 1862 Brilliant Uncirculated. Obverse surface lightly polished to look like a proof. Sharp strike.

- 324 Four choice Brilliant Uncirculated cents: 1862, 1899, 1901, 1903. (Total: 4 pieces)

- 325 1864 Bronze cent. Brilliant Proof. One of just 150 Proofs minted of this issue. Rare, and seldom offered for sale. A prize acquisition for the Indian cent specialist.

- 326 Group of Indian cents, including some rare issues: 1864-L VF; 1865 Red and brown Uncirculated; 1877 Very Fine; 1876 Red and brown Uncirculated; 1891 Choice Brilliant Uncirculated; 1893 Choice Brilliant Uncirculated; 1901 Choice Brilliant Uncirculated. (Total: 7 pieces)

- 327 Trio of Indian cents: 1865 Unc. corroded on reverse; 1899 Toned Proof; 1902 Brilliant Uncirculated. (Total: 3 pieces)

- 328 1867 Lightly toned Proof. One of only 625 Proofs minted this year.

- 329 1868 Choice Proof, save for some microscopic spots. Far above average. One of just 600 Proofs minted this year.

- 330 1869 Brilliant Proof. Some microscopic spots. Very attractive overall.

- 331 1870 Brilliant Proof. A few minor spots.

- 332 1871 Red and brown Uncirculated. A very desirable specimen of this rare date.

A very attractive set. (Total: 62 pieces)

- 338 Set of flying eagle and Indian cents in "Bookshelf" album. Contains one of each date from 1857 through 1909 plus the following additions: 2 varieties of 1858 flying eagle cents; 3 varieties of 1864 cents; 1869/8; 1908-S; 1909-S. Average Very Fine grade. - 341 1912 Matte Proof. "Dipped" long ago.

- 342 1915 Matte Proof. A toned (as nearly always) and very attractive specimen.

- 343 1931-S Brilliant Uncirculated.

- 344 1933-D Cents. Group of choice Brilliant Uncirculated pieces, save for several toned coins. A very nice lot which appears to be the best part of an original bank-wrapped roll! One of the scarcer Lincoln cents of the 1930's. (Total: 28 pieces)

- 345 1955 Double die cent. Extremely Fine. Cleaned and with some spots. A candidate for judicious re-cleaning and retoning (something we usually don't recommend).

Thank You For Your Participation!

UNITED STATES TWO-CENT PIECES

- 351 1864 Large motto. Brilliant Uncirculated. A few spots.

Choice BU 1865/4 Two-Cent Piece

- 352 1865/4 Overdate. From our Terrell Collection sale, Lot 18, at \$450. Described there as:

1865/4 Overdate two-cent piece. Curved top 5 in date. The undertype 4 is visible under and about 50% to the left of the 5 in the date. This specimen, a choice Uncirculated example with full original mint brilliance, displays the overdate beautifully, especially when a light source is held at a low angle relative to the coin's surface. This specimen, the first 1865/4 overdate we've ever offered in our sales, was acquired years ago as a regular 1865 by the owner of the Terrell Collection. The coin is unpriced in the *Guide Book*...

Since the great Terrell Collection sale took place no comparable 1865/4 has appeared on the market. Should bring a nice profit to the owner, who paid \$450, as noted.

- 353 1867 Choice Proof with attractive toning.
- 354 1867 Double motto variety. With the words IN GOD WE TRUST sharply doubled, as on the 1955 double die cent and the 1873 double LIBERTY cent. A very rare variety, and one

which is seldom seen or offered for sale. Lovely red and brown Uncirculated condition. A prize acquisition for the two-cent piece specialist.

- 355 1868 Choice Proof, save for a few microscopic spots. All in all, far above average.

Finest Known 1869/8 Overdate 2c

- 356 1869/8 Overdate. Here is a coin which will be long remembered in the annals of two-cent piece history and research: a choice Brilliant Uncirculated specimen which is far and away finer than any other specimen we've ever seen or heard of.

The 1869/8 2c piece, unpriced in the *Guide Book*, is one of the rarest of all American copper coins. Over the past 20 years we have handled only three or four pieces, and with the exception of the fantastic Austin Collection coin, all have been in well-worn grades. Most leading collections lack this variety in any grade. Indeed, a perusal of "name" sales over the past years will reveal that this is one of America's greatest rarities.

Examination of the present specimen reveals why the 1869/8 is so rare. The obverse die is from a very late state of an 1868 die with an injured center showing certain die wear characteristics to the trained eye. A hairline-fine diebreak, begins at the lower right leaf, extends through the last two arrow feathers, through the middle of the 9/8 digit, through the bottom of the 186 numerals and ends at the border under the left-side arrow feathers. At the 6 numeral another diebreak extends down to the border at the right. At the lower left part of the 6 a small triangular piece is missing from the die, thus having the effect of widening the break at that point, and giving a characteristic "tail" to the 6. The 1 of the date is recut, especially at the left base. Apparently a worn 1868 die was intended for extended life in 1869 by overpunching the 9 digit. The act of doing this, plus strengthening the other date figures, may well have caused the die breaks to develop. In any event, coinage from the 1869/8 die, shattered alone its bottom border as it was, could not have lasted long. Probably only a hundred or so pieces were struck before the die fell apart. We would estimate that no more than 10 to 20 1869/8 2c pieces exist today, and none, to our knowledge, comes even close to the example offered here.

The present coin cost \$4375, and the owner of the Austin Collection considered it cheap at that figure. The offering now of this coin may well represent a once in a lifetime opportunity!

- 357 1869 Attractively toned Proof.
- 358 1870 Choice Brilliant Proof. Rare so fine.
- 359 1871 Prooflike Brilliant Uncirculated. A Gem.

- 360 1872 Choice Brilliant Proof. A really excellent specimen of one of the most elusive issues in the two-cent piece series.

- 361 1873 Closed 3. Proof, toned an attractive red and brown. A very beautiful specimen of the last year of two-cent piece coinage and the rarest date in the series. Only 600 Proofs were minted, and of this figure no more than a hundred or two could be as nice as this!

U.S. NICKEL THREE-CENT PIECES

- 362 Group of nickel 3c pieces, including several scarce issues: 1873 Closed 3. Choice Brilliant Uncirculated; 1878 Brilliant Proof, some minor spots. Rare Proof-only date!; 1881 Choice Brilliant Uncirculated; 1885 Brilliant Proof, some spots; 1886 Brilliant Proof, some spots. (Total: 5 pieces)

- 363 1877 Brilliant Proof. A few minor spots could be removed, if desired. A pristine coin which has never been cleaned. Of importance as the rarest date of the series. Only about 500 1877 nickel three-cent pieces were coined.

- 365 1884 Choice Brilliant Proof. Rare.

Very Rare 1863/2 3c Piece

- 373 1863/2 Overdate. Choice Brilliant Proof. From our Robert Marks Collection sale, Lot 243. A splendid specimen of this rare issue; one of the most elusive silver Proof coins of the 1858-1915 era (the early span of silver Proof coin issuance to collectors). Listed but unpriced in the *Guide Book*, indicating extreme rarity. A major opportunity for the specialist in this series.

U.S. NICKEL FIVE-CENT PIECES

Beautiful Set of Shield Nickels

- 374 Complete date set of shield nickels 1866-1883. One of each date, plus the 1867 with rays. A very attractive set from the Austin Collection. The effort was made to acquire Uncirculated pieces of each issue, when this was possible—the challenge being that for many issues Uncirculated coins are far rarer than Proofs. The set is a beautiful one and contains:

1866 BU; 1867 rays BU; 1867 no rays BU; 1868 cloudy Proof; 1869 BU, polished; 1870 BU; 1871 Proof, rubbing; 1872 Choice Proof; 1873 AU; 1874 BU; 1875 Brilliant Proof;

1876 Choice Brilliant Proof; 1877 Choice Brilliant Proof; 1878 Choice Brilliant Proof; 1879 Choice BU; 1880 Choice Brilliant Proof; 1881 Brilliant Proof; 1882 Brilliant Proof; 1883 BU, bagmarks. A splendid set. (Total: 19 pieces)

- 375 1866 With rays. First design of the shield nickel type. A glittering gem Proof specimen of unsurpassable sharpness and beauty. 1866 Proof nickels are extremely rare, for shield nickels were not released until partway through the 1866 year, by which time many 1866 Proof sets had already been distributed—lacking the nickel. The presently offered coin, certainly one of the finest in existence, should attract a good bid from the nickel specialist or from the type set collector.

- 376 Group of Proof shield and Liberty nickels. Average quality, some with light marks and spots. The lot could benefit from judicious and careful cleaning, and we are sure some gems would result. The issues represented are: 1867 without rays; 1883 Liberty, without CENTS; 1883 Liberty, with CENTS; 1884; 1897; 1898; 1909. (Total: 7 pieces)

- 377 1870 Choice Brilliant Proof.

- 378 1871 Scarce issue. Choice Brilliant Proof, with some subliminal toning just beginning to form. Very attractive!

- 379 1878 Rare Proof-only date. Struck as a Proof, but with the characteristic frosty (rather than mirrorlike) surface as seen on about 75% of the Proofs of this year. Some light spotting. Only 2,350 1878 nickels were made, making this the second lowest nickel mintage for any year from 1866 to the present time (the 1877 is first).

- 380 1879/8 Overdate. Sharp overdate with the undertype 8 very clear. Listed in *Scott's Encyclopedia of U.S. Coins*, but thus far unlisted in the *Guide Book*, an oversight which we expect will be remedied one of these issues. Beautiful and choice Brilliant Proof—which is the only condition in which this issue is found. The 1878 Proof die was overpunched with a 9. Several times scarcer than a regular 1879 nickel. The present specimen traces its pedigree to the Robert Marks Collection sale, Lot 265.

- 381 1882 Choice Brilliant Uncirculated.
- 382 1882 With sharply recut date and prominent obverse diebreak. Brilliant Uncirculated.
- 383 1883 Shield. Struck from shattered obverse die. Interesting and somewhat (but not extremely) unusual. Brilliant Uncirculated.

Beautiful Set of Liberty Nickels

- 384 Complete set of Liberty nickels 1883-1912, including two varieties of 1883 and the mintmark issues of 1912. The Austin Collection set, with emphasis on Uncirculated pieces (which in many instances are rarer than Proofs). This lovely set contains the following: 1883 no CENTS, BU; 1883 with

CENTS, BU; 1884 Br. Proof; 1885 Choice Brilliant Proof; 1886 Br. Proof, some hairlines; 1887 Toned Proof; 1888 Proof, cloudy reverse; 1889 Proof, small spot; 1890 BU, a few marks; 1891 Brilliant Proof; 1892 Choice Brilliant Proof; 1893 BU, light rubbing; 1894 Brilliant Proof; 1895 Brilliant Proof; 1896 Brilliant Uncirculated; 1897 Choice BU; 1898 BU, some marks; 1899 BU; 1900 BU; 1901 Br. Proof; 1902 BU; 1903 BU, rubbing; 1904 BU, some spots; 1905 BU; 1906 BU; 1907 BU; 1908 BU; 1909 Choice BU; 1910 BU; 1911 Choice BU; 1912 BU; 1912-D BU; 1912-S Choice Brilliant Uncirculated. A very attractive set. (Total: 33 pieces)

- 385 1883 Liberty, no CENTS. BU, rubbing.
- 386 3 pieces: 2 pieces 1883 Liberty, no CENTS nickels; 1 piece 1950-D. All BU, (Total: 3 pieces)

- 387 1885 Choice Brilliant Proof. Some microscopic spots. Traditionally the most desired Philadelphia Mint issue of the regular 1883-1912 series.

- 388 1908 Lightly toned Proof.

- 389 1911 Choice Brilliant Uncirculated.

- 390 1913 Type I buffalo. Brilliant Uncirculated with a matte-Proof-like surface on the reverse. A few tiny spots.

- 391 Set of the three type I varieties: 1913, 1913-D, and 1913-S. Each is a choice BU coin. (Total: 3 pieces)

- 392 Trio of nickels: 1913 Type II; 1914; 1915. Each is choice Brilliant Uncirculated. (Total: 3 pieces)

- 393 1913-D Type II. Choice Brilliant Uncirculated.

Note: The Austin Collection offers the buffalo nickel specialist one of the most remarkable selections to come on the market in recent years. Emphasis was on top-quality Uncirculated pieces. The group of nickels offered here took many, many years to assemble.

- 394 1913-D Type II. Another Choice Brilliant Uncirculated.

- 395 1913-S Type II. Choice Brilliant Uncirculated.

- 396 1914 Matte Proof. Rare today.

- 397 1914-D Choice lightly-toned Uncirculated.

- 398 1914-D Brilliant Uncirculated.

- 399 1914-S Choice Brilliant Uncirculated.

PLAN TO ATTEND THE SALE!

Plan to attend the exciting Austin Collection sale in person here in Los Angeles on May 31 and June 1. You'll have the satisfaction and pleasure of participating in one of the most important numismatic events of our time.

Choice BU 1918/7-D Overdate Nickel

- 409 1918/7-D Overdate. Choice Brilliant Uncirculated. In a plastic holder lettered: *The overdate nickel, rare in any condition, is extremely rare Uncirculated. Only 3 or 4 known, of which this is believed to be the most perfect strike. Therefore this is the rarest regular issue nickel ever to be produced at a United States mint . . .*

The Austin Collection coin represents a wonderful opportunity for the buffalo nickel specialist to acquire a choice Brilliant Uncirculated example, a sharply-struck and well-defined coin which is perfect in every respect. Certainly not more than 2 or 3 other 1918/7-D nickels this choice exist in all of numismatics. Deserving of a good bid. Close to a five-figure price (\$10,000) would be a bargain, and even a few thousand dollars over it would be a good buy. This splendid cameo is literally priceless.

- 410 1918/7-D Overdate. Fine.

- 411 1918-D Brilliant Uncirculated. Flatly struck at centers.

- 412 1918-S Choice Brilliant Uncirculated. Rare in this condition. As the specialist knows well, Uncirculated buffalo nickels, especially from branch mints (Denver and San Francisco), are extremely hard to find in the late 'teens and early 1920's. The Austin Collection offers some very unusual opportunities. Your cataloguer has seen many collections formed over the years, and we can say that it is often the *opportunity* to buy the coin that is more important than the price paid so far as choice pieces are concerned. In each of our sales there are many coins which go for record prices. They are hardly bargains at the moment of purchase, but then something happens . . . Soon today's record auction price is yesterday's "old price"—and is an incredible bargain. Just look through our Armand Champa Collection sale catalogue (to mention just one sale of many—we choose this as a random example) of almost precisely two years ago. When the sale was held it was a sensation. Price record after price record fell. "The reference books will have to be rewritten," it was said by many. Now one can look through the Armand Champa Collection sale catalogue and wistfully contemplate all of the bargains—coins which are far, far below wholesale today! The collectors and investors who actively participated in the Armand Champa Collection have the coins now—and in most instances have nice profits to show. Those who said prices were "too high" then still don't own the coins—and now they are even more expensive! While we don't advocate thoughtless bidding, we do advocate studied and considered bidding—with the realization that quality will never go out of style.

- 413 Pair of nickels: 1919 Choice BU; 1920 BU, rubbing. (Total: 2 pieces)

- 414 1919-D Choice Brilliant Uncirculated. An especially sharp strike. Watch a record price be set when this one comes up for bidding!

- 415 1919-S Choice Brilliant Uncirculated. Same comment as preceding.

- 416 1920-D Brilliant Uncirculated.

- 417 1920-S Brilliant Uncirculated, weak strike.

- 418 1921 Choice Brilliant Uncirculated.

- 419 1921-S Choice Brilliant Uncirculated.

- 420 1923-S Brilliant Uncirculated.

- 421 1923-S Choice Brilliant Uncirculated.

- 422 Trio of nickels: 1924; 1925; 1926. Each is choice BU, except that 1926 has a tiny obverse spot. (Total: 3 pieces)

- 423 1924-D Choice Brilliant Uncirculated.

- 424 1924-S Choice Brilliant Uncirculated. An especially sharp strike. An incredible coin!

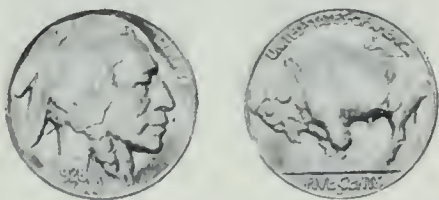

- 425 1925-D Choice Brilliant Uncirculated, save for a few microscopic marks. Sharply struck, which is against the rule for 1925-D nickels. Worth a nice premium!

- 426 1925-S Toned Uncirculated. Weakly struck, as usual.

- 427 1926-D Choice Brilliant Uncirculated. A gem needle-sharp striking. The 1926-D nickel is characteristically the most weakly struck coin among 20th century American issues. 99% of all known Uncirculated examples have the design detail and sharpness befitting a Fine or Very Fine coin of another date, and many aren't even that sharp. The present example is so rare in this condition that we estimate that not more than 5 to 10 other comparable specimens exist! The coin catalogues \$275. That is for an ordinary—that is, weakly struck—specimen. Bear in mind that this sharply struck piece is at least *100 times rarer*. We can safely say that a record price should be set when this lot comes up for bidding!

- 428 1926-S Brilliant Uncirculated, microscopic spotting.
- 429 Group of nickels: 1927; 1928; 1928-D; 1928-S. Each is a Choice Brilliant Uncirculated example. (Total: 4 pieces)

- 433 Group of nickels: 1930 Choice BU; 1930-S BU, rubbing; 1931-S Choice BU. (Total: 3 pieces)

- 434 Group of nickels. Each coin is BU to choice BU: 1934; 1934-D; 1935; 1935-D; 1935-S; 1936; 1936-D; 1936-S; 1937; 1937-D; 1937-S; 1938-D buffalo. (Total: 12 pieces)

- 436 1937-D 3 leg. Attractive BU, light rubbing.
- 437 Group of Brilliant Uncirculated buffalo nickels as taken from original rolls: 1 piece 1929; 1 piece 1930-S; 12 pieces 1935-D; 30 pieces 1936-S. (Total: 44 pieces)
- 438 Set of buffalo nickels 1913 to 1938-D, one of each date and mintmark. No overdate. Includes the 1937-D 3 leg. Early years in the 'teens and 1920's average Fine or better. Later issues are Very Fine or better. (Total: 65 pieces)
- 439 Set of Jefferson nickels 1938 to 1965. One of each date and mintmark. All nice BU save for 1942-D and 1945-S which show spotting. A few others have attractive toning. All in all, a very nice set. In a "Capital" display holder. (72 pieces)

- 442 11 piece BU set of "wartime" silver nickels. (Total: 11 pieces)

UNITED STATES HALF DIMES

1792 Half Disme

- 443 1792 Half Disme. Very Fine obverse. Fine reverse. Some scratches, particularly on the reverse. An attractive specimen overall, and worth what a regular Fine grade piece sells for.

The 1792 half disme is one of the most interesting and historical of all American coins. It is considered to be the first official U.S. coinage issue. In his fourth annual address, November 6, 1792, President George Washington stated:

"In execution of the authority given by the legislature, measures have been taken for engaging some artists from abroad to aid in the establishment of our Mint. Others have been employed at home. Provisions have been made for the requisite buildings, and these are now putting into proper condition for the purposes of the establishment. There has been a small beginning in the coinage of half dismes, the want of small coins in circulation calling the first attention to them."

- 444 1794 Valentine-2. A lovely AU specimen with beautiful light iridescent toning. A very beautiful example of the first year of the flowing hair design type.

- 445 1794 V-1. Attractively toned Extremely Fine plus. A very sharp and desirable specimen of this early issue. Ideal for a top-quality type set.

Gem Uncirculated 1795 Half Dime

- 446 1795 V-4a. Uncirculated, a gem striking. Lovely light gray-toned surfaces enhance the appearance of this exceptional coin. This is one of the most sharply struck early half dimes we've seen. Not one in ten 1795's is this detailed. Obverse with rim die break over TY and the adjacent star. A really outstanding early half dime worthy of "reaching for." Ideal for a type set.

- 447 1795 V-6. Brilliant Uncirculated, some light rubbing and usual adjustment marks. A very attractive specimen of the beautiful flowing hair design type (made in 1794 and 1795). Very elusive in such high condition.

- 448 1795 V-5. Beautiful Extremely Fine. Some minor adjustment marks, usual on early silver coins, are visible with a glass. Another important opportunity for the type set collector.

Exceptional 1797 Half Dime

- 449 1797 V-4. 16-star variety. Very beautiful AU grade, or perhaps even finer. The coin has virtually no trace of wear, but the centers are slightly weak due to striking (as is characteristic of this variety). This specimen is one of the finest known examples of the rare 1797 16-star half dime. The Dr. W.E. Caldwell Collection of half dimes auctioned by us in November 1972, the most outstanding offering of this series in recent times, had just a Very Fine example. The presently-offered 1797 is a prize coin and should sell for a record price.

Beautiful Uncirculated 1800 Half Dime

- 450 1800 V-1. Choice Uncirculated. Some slight lightness of strike on the center portions is mentioned for accuracy's sake, but this is hardly noticeable. The coin has full original mint frost toning to beautiful light brown and gray. Here is a prize for the type set collector. 1800 is the first year of the heraldic eagle reverse style (used 1800-1805) and is in a grade seldom equalled, even in the largest collections.

- 451 1801 V-1. Fine grade. Slight planchet waviness. Scarce in all grades.

- 452 1829 Proof. Unfortunately, the piece has been mishandled and now shows numerous small marks. However, the fields retain their brilliance and at arm's length the piece glitters like a proof of later years. The piece is one of perhaps 10 to 15 pieces struck that year for presentation purposes. Worth several hundred dollars.

- 453 1831 Choice Brilliant Uncirculated, prooflike. With nearly full Proof surfaces to the fields. A magnificent coin. Certainly one of the finest known examples of this date.

Note: The foregoing piece has many characteristics of a Proof of this period, including Proof surface within the shield stripes. However, close examination under magnification reveals the reason why this coin, perhaps better called an "inadvertent Proof" rather than an Uncirculated example, was made. The dies came together without an intervening planchet, with the result that certain features of the reverse die were impressed on the obverse, and vice-versa. This situation was quickly noticed, and the mint polished each die to remove the "clash marks." When this polishing was completed, the clash marks were nearly completely gone, and each die had a brilliant mirrorlike surface.

- 454 1832 Brilliant Uncirculated. An attractive coin which sold into the Austin Collection from our Armand Champa Collection sale, Lot 25.

- 455 Group of half dimes: 1836 Small 5c. Toned EF; 1843 EF; 1844 VF-EF; 1849 EF-AU; 1850-O EF-AU; 1856 EF; 1857 Toned AU; 1859 AU; 1868-S EF. (Total: 9 pieces)

- 456 1837 Liberty seated, no stars on obverse. Small date variety (identifiable by the flat top to the 1 digit). Brilliant Uncirculated. A very pleasing example of this attractive design. A popular and necessary item for type sets!

- 457 1839 No drapery. AU.

- 458 1840-O No drapery. Choice Brilliant Uncirculated. Exceptionally beautiful condition for an early New Orleans Mint half dime. Should bring a record price.

Very Rare 1846 Proof Half Dime

- 459 **1846 Proof.** A very choice example with gun-metal blue toning as acquired over a long period of years. A tremendously important coin for two reasons: (1) 1846 is far and away the rarest Philadelphia Mint issue of the 1840's. Top-grade business strike (pieces made for circulation) examples are virtually non-existent, and (2) as a Proof it is one of not more than a dozen or so known examples of this date. Should sell for a record price.

Note: The preceding coin was a part of an original 1846 Proof set until a few years ago. A leading dealer owned the set and was about to offer it for sale intact when the owner of the Austin Collection learned about the group and wanted to buy the 1846 half dime and dime. A private treaty sale was arranged, and the half dime and dime were sold (and are offered now for sale in this catalogue!). The other pieces were purchased by us at the time and sold into various private collections.

- 460 **1849/6 Overdate.** Brilliant Uncirculated, a little gem. Scarce in such superlative condition.
- 461 **1853 Arrows at date.** Uncirculated, with lovely iridescent toning. From our sale of the Armand Champa Collection, Lot 30. A scarce issue. In great demand for inclusion in type sets.
- 462 **Pair of half dimes:** 1853 Arrows. BU, small obverse planchet defect; 1870 Deeply toned Uncirculated. (Total: 2 pieces)
- 463 **1855-O Choice Uncirculated,** with indescribably beautiful iridescent toning as acquired over the years. Prooflike surfaces. Of special importance and interest as the lowest mintage (by far) of any with-arrows half dime in the 1853-1855 series. A prize. From the Terrell Collection sale, Lot 263.

Rare 1857 Proof Half Dime

- 464 **1857 Brilliant Proof** half dime. A choice example with light peripheral toning. Of great rarity and importance. No more than two dozen 1857 Proof half dimes exist, and often several years will go by before a piece appears on the market. A rare opportunity for the half dime specialist to acquire an 1857 Proof half dime of unimprovable quality.
- 465 **1857-O Attractively toned** Uncirculated.
- 466 **1859 Choice Brilliant** Uncirculated. Very beautiful rainbow toning. An indescribably attractive coin!
- 467 **1859 Choice Brilliant** Uncirculated, prooflike.
- 468 **1860-O Choice** Uncirculated. Beautiful light gray toning. An unsurpassable specimen of the last half dime issue of the New Orleans Mint.
- 469 **1862 Choice** Uncirculated. Iridescent toning.
- 470 **1862 Choice** Uncirculated. Bluish-gray toning.
- 471 **1867-S Gem Brilliant** Uncirculated. "Very rare Uncirculated" notes *Scott's Encyclopedia of U.S. Coins*. No finer 1867-S than the presently-offered flawless pristine gem could exist!
- 472 **1869** Uncirculated. Blue and gray toning.
- 473 **1872 Brilliant** Uncirculated, prooflike. Some bagmarks.
- 474 **1873-S Choice Brilliant** Uncirculated.

UNITED STATES DIMES

Beautiful Uncirculated 1796 Dime

- 475 **1796 Dime. Uncirculated.** An extraordinarily sharply struck coin with full definition on the eagle's breast feathers on the reverse, hair details on the obverse, and other points. Die break at first star, as usual with this variety. Light iridescent toning adds to the beauty of this coin, a piece which is certainly one of the finest 1796 dimes in existence. A prize coin for the dime specialist or type set collector.

Choice Uncirculated 1797 16-Stars Dime

- 476 **1797 16 Stars. Choice Uncirculated,** a gem striking with exquisite design detail. Horizontal diebreak across bottom of the obverse. *Scott's Encyclopedia of U.S. Coins* notes that this coin is extremely rare in Uncirculated grade. Indeed, most of the great sales of the past century have had lesser pieces—Fine, Very Fine, Extremely Fine, an occasional AU, but only rarely an Uncirculated example. Beautiful light iridescent toning adds to the beauty of what certainly is one of the finest early American dimes in existence.

Sharp AU 1797 16-Stars Dime

- 477 **1797 16 Stars. Sharp and attractive AU.** With die break across lower part of obverse as preceding; a heavy break which, in effect, places the date portion on a raised cartouche. A coin of great interest to the dime specialist or type set collector. Very rare in top grades. A prize coin which traces its pedigree to the Armand Champa Collection, Lot 731.

- 478 **1797 16 Stars** as preceding, with diebreak across obverse as usual. Fine with some claims to Very Fine. Several cuts or grooves on obverse and reverse. Worth what an unimpaired coin in Very Good grade would bring.

Uncirculated 1798 Dime

- 479 1798 Uncirculated, with slight traces of friction on the higher areas. With unusual horn-like diebreak extending from nose through Y of LIBERTY. Rare in this high grade. From our sale of the fabulous Armand Champa Collection, Lot 733.

- 480 1807 AU, or very close to it. Much better than average striking for 1807, a date which usually is weakly defined. Last year of the heraldic eagle reverse type.

- 481 1807 Abt. Fine.

- 482 1811/09 Overdate. Brilliant Uncirculated. Some weakness of striking at the top of the obverse and the corresponding portion of the reverse, as often seen on this issue. Reverse struck from shattered die displaying several radial breaks. Interesting. Unusual. Rare (in this condition).

- 483 1814 Gem Uncirculated. Large date. No period after C on reverse. A deep, needle-sharp striking with extraordinary relief and detail. One of the most magnificent early-date dimes in existence. Worthy of close attention by the connoisseur.

- 484 1820 Small 0. Choice Uncirculated. A gem striking with needle-sharp detail. Reverse die is blundered and shows a ghostlike D after the final D in UNITED and just before the S in STATES. The final S in STATES is cut over another letter, perhaps an erroneous N on its side (but not a re-cutting of an S). A very desirable early dime. Worth a generous bid!

- 485 1823/2 Overdate. Large E's in reverse legend. M in AMERICA defective and lacking the left-side upright. Choice Brilliant Uncirculated. A splendid coin. Another prize from the Austin Collection.

- 486 1824/2 Overdate. Choice Uncirculated with magnificent magenta and blue iridescent toning. One of the finest known examples of this scarce issue. A prize coin for the dime specialist!

- 487 1825, Brilliant Uncirculated. Tiny planchet clip at bottom does not extend past the denticles. A very attractive and well-struck specimen.

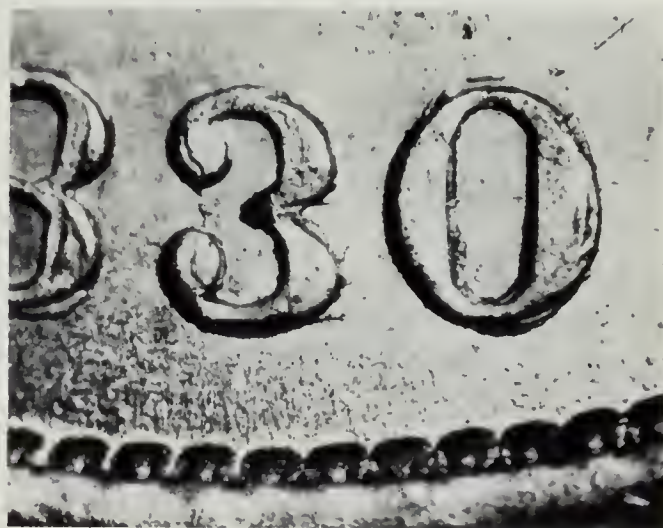

- 488 1827 Uncirculated, some minor rubbing evident on the obverse. Scarce in such high grade.

- 489 1829 Gem Brilliant Uncirculated. Large 10e variety. One of only a half dozen or so known to exist in mint state, the presently-offered coin is of unsurpassable quality. Worth a record price.

Superb 1830/29 Overdate Dime

- 490 1830/29 Overdate. Choice Brilliant Uncirculated, a perfect gem example. This is the *finest known* example of this rarity or is tied for it. Certainly no other coin could surpass this example of perfection! Unpriced in the *Guide Book* in this grade. Another dime for the connoisseur. The selection of choice early dimes offered here has few other equals in the history of numismatics.

- 491 1830/29 Overdate. Choice AU. One of the finest known examples of this rare issue.
- 492 Group of dimes: 1831 VF-EF; 1874 Arrows. VF-EF; 1890 EF-AU. (Total: 3 pieces)

- 493 1837 Liberty seated, no stars. Brilliant Uncirculated, light gray toning. Prooflike obverse. Large date variety with flat top to 3. Dimes of this type are becoming quite elusive due to the great demand for them for inclusion in type sets.

Choice Proof 1846 Dime

- 494 1846 Proof. A very choice example with gun-metal blue toning. From an original Proof set of this year which was broken up several years ago. Refer to our description of the companion 1846 half dime Proof under Lot 459 for additional information.

The presently-offered dime is very significant, not only for its being an exceedingly rare Proof, but also for its being one of the rarest Philadelphia Mint dimes of this era. A prize coin for the dime specialist.

- 495 1853 Arrows at date. Brilliant Uncirculated. A lovely and deeply-struck gem. Struck only during 1853-1855, dimes of this type are in great demand today. Few specimens offered come close to this one in quality. From the Terrell Collection sale, Lot 40.
- 496 1854 Arrows. Brilliant Uncirculated.
- 497 1855 Arrows. Brilliant Uncirculated.
- 498 1872 Lightly toned Choice Proof.

- 499 1873 Arrows. Choice Brilliant Uncirculated. Rare in this condition, for the demand for the with-arrows dimes of 1873 and 1874 far exceeds the supply. This specimen is from the Terrell Collection sale, Lot 42.
- 500 1874 Arrows. Proof, some hairlines in field.

- 501 1874 Arrows. Choice Prooflike Uncirculated.
- 502 Group of dimes, each lightly toned Uncirculated with some rubbing. The dates are: 1875; 1877-CC; 1887. (Total: 3 pieces)
- 503 Group of choice Uncirculated dimes, lightly toned to brilliant: 1884; 1887; 1890; 2 pieces 1891. (Total: 5 pieces)
- 504 Mercury dimes: 1916; 1916-S. Each is choice Brilliant Uncirculated. (Total: 2 pieces)

- 505 1916-D Choice Brilliant Uncirculated. One of the rarest 20th century American silver coins.
- 506 Group of dimes: 1917-D BU; 1917-S BU; 1918 Choice BU; 1918-D BU, rubbing; 1918-S BU. (Total: 5 pieces)
- 507 Group of dimes: 1919 Choice BU; 1919-S BU; 1920 BU, some hairlines; 1920-D BU; 1920-S BU. (Total: 5 pieces)
- 508 1919-D BU. Slightly flat on the head.

- 509 1921 Choice Brilliant Uncirculated. Some die marks in the field (in the die, not caused after the coin was struck). An extraordinarily sharp striking, and of special rarity as such. Worthy of a record price.

- 510 1921-D Choice Brilliant Uncirculated. Lowest mintage issue of the Mercury dime series. Only 1,080,000 were minted.
- 511 Group of dimes: 1923 BU; 1924 Choice BU; 1924-S BU; 1925 BU; 1926 Choice BU; 1926-D BU; 1927 BU; 1928 BU. (Total: 8 pieces)
- 512 1923-S Brilliant Uncirculated.
- 513 1925-S Choice Brilliant Uncirculated.

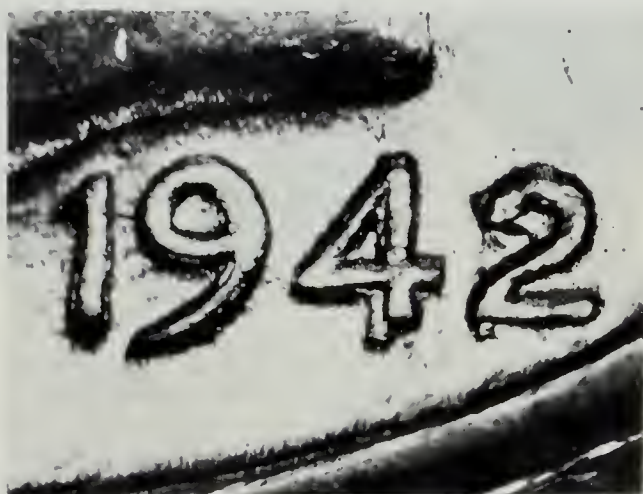

- 514 1926-S Choice Brilliant Uncirculated. Very rare in this outstanding condition.

- 515 1928-D Choice Brilliant Uncirculated.
- 516 Trio of dimes: 1929 Choice BU; 1929-D BU; 1929-S Choice BU. (Total: 3 pieces)

- 520 1941 Brilliant Proof.

Choice Brilliant Uncirculated 1942/1-D Dime

- 521 1942/1-D dime. From our sale of the Terrell Collection, Lot 309, at \$2000. Perhaps the *finest known* specimen of this elusive variety. Should sell for a new record price today.

The rarity of 1942/1-D is explained by the fact that this variety was not generally known to numismatists until Frank Robinson wrote about this coin in the September 1970 issue of *The Numismatic Scrapbook Magazine*. By that time the opportunity to acquire choice pieces had long passed, and the result is that mint-state specimens are exceedingly rare. The 1942/1-D overdate is of different appearance from the 1942/1 Philadelphia Mint issue and is not as easily recognized, thus providing a reason why this variety was not known earlier. As a matter of interest we might mention that the 1942/1 Philadelphia overdate was not recognized until 1943; a year after its first appearance.

The 1942/1-D dime here offered is **Choice Brilliant Uncirculated**. As stated, it is perhaps the *finest known* specimen. We have never seen or heard of a finer one.

- 522 1942/1-D Brilliant Uncirculated, slight rubbing. Worth several

hundred dollars or more. For comparative reasons we might mention that grade the 1942/1-D is far rarer than the 1916-D dime.

- 523 1942/1-D Extremely Fine.
- 524 1942/1-D VF, digs on reverse.
- 525 1942/1-D Very Fine.
- 526 1942/1-D F-VF.
- 527 3 pieces of 1942/1-D: Fine; Abt. Fine; Very Good. (Total: 3 pieces)
- 528 1942 Lightly toned Proof.
- 529 Mercury dime set. 1916-1945, one of each date and mintmark, plus 1942/1. 1916 to 1926 issues are mostly VG to Fine, 1927 to 1937 are mostly Fine to EF, and 1938 to 1945 are mostly BU. Certain pieces grade as follows: 1916-D Fine; 1921 VG; 1921-D VG+, but with planchet defect; 1926-S VF-EF; 1931-D AU; 1942/1 AU. (Total: 75 pieces)
- 530 Mercury dime set. 1916-1945, one of each date and mintmark, plus 1942/1. 1916-1926 are mostly Good or G-VG; 1927-1937 are mostly VG to VF; 1938 to 1945 are mostly BU. Certain pieces grade as follows: 1916-D G; 1921 G; 1921-D G; 1942/1 EF. (Total: 75 pieces)
- 531 Mercury dime set. 1916-1945, one of each date and mintmark, plus 1942/1. 1916-1926 are mostly VG; 1927-1937 are mostly VF to AU; 1938-1945 are mostly AU to BU. Certain pieces grade as follows: 1916-D G; 1921 G-VG; 1921-D G-VG; 1942/1 VF-EF. (Total: 75 pieces)
- 532 Mercury dime set. 1916-1945. One of each date and mintmark. No overdates. Grades vary from Good to AU, with one solitary BU, a 1923-S! Grades of certain pieces: 1916-D G; 1920-S AU; 1921 G+; 1921-D G; 1923-S BU; 1924-D BU, rubbing; 1926-D BU, rubbing. (Total: 73 pieces)
- 533 Roosevelt dime set. 1946-1965, one of each date and mintmark. Brilliant Uncirculated. In "Capital" holder. (Total: 49 pieces)
- 534 1955-S Dimes. Roll of 50 BU pieces. (Total: 50 pieces)

U.S. TWENTY-CENT PIECES

- 535 1875 Choice Proof with beautiful lavender and magenta iridescent toning. A splendid specimen of this scarce issue.
- 536 1875 Brilliant Proof, some minor handling marks scarcely worthy of notice. Light peripheral toning enhances the beauty of this coin.

- 537 1875 Gem Brilliant Uncirculated, prooflike.
- 538 1875-CC Brilliant Uncirculated. An especially sharp strike for 1875-CC, which usually is weakly defined on the reverse. The

only readily collectable Carson City coin of this denomination; the super-rare 1876-CC being available only at infrequent intervals.

539 Pair of 20c: 1875-CC Fine; 1875-S EF. (Total: 2 pieces)

540 Pair of 20c: 1875-CC Fine; 1875-S VF. (Total: 2 pieces)

541 1875-S Choice Brilliant Uncirculated. With sharply double cut mintmark, with the undermintmark being rotated slightly. Interesting!

542 1876 Brilliant Proof, some hairlines, especially on the obverse. Still quite a bit above average. Attractive.

543 1877 Brilliant Proof, some light toning just beginning to form. A few microscopic hairlines. A beautiful specimen of the lowest-mintage Philadelphia Mint 20c issue, a Proof-only coin made to the extent of just 510 pieces.

544 1878 Choice Brilliant Proof. A lovely specimen of one of the rarest issues of the ephemeral twenty-cent piece series. Only 600 were minted, of which no more than a hundred could survive today in condition equal to the present example.

545 1878 Choice Proof. A lovely specimen with blue and gray iridescent toning as acquired over a long period of years. Another prize example of one of the rarest of all twenty-cent pieces.

U.S. QUARTER DOLLARS

Choice Prooflike Uncirculated 1796 Quarter

546 1796 Quarter. The incredible coin from the Terrell Collection, Lot 46, which was described as follows:

1796 Quarter. First year of the quarter dollar denomination and the only year of the draped bust, small eagle reverse design type. The presently-offered 1796 is a **magnificent Uncirculated specimen with prooflike surfaces on the obverse and reverse**. This choice and beautiful coin may well be a presentation piece [for it is said to have been passed down through several generations of the family of a former officer of the Mint]. Considering today's market for choice early silver coins, and considering the spectacular condition of this 1796, we would not be surprised if a new price record were to be set for this piece. Here is a showpiece; a treasure. Among United States coins needed for the completion of a set of major design types the 1796 quarter is one of the most elusive, particularly in higher grades. The owner of the Terrell Collection considered this 1796 to be one of his foremost prizes, and rightfully so.

From the Terrell Collection it was sold into the Austin Collection, where it was appreciated as one of the finest American silver coins of all time. Here, now, is a remarkable opportunity for the discriminating numismatist.

Exceptional 1804 Quarter

547 1804 Quarter. A beautiful Brilliant Uncirculated example with friction on the higher areas. Several years ago our dealer friend Lester Merkin sold a full Uncirculated piece for

\$25,000; a coin which is probably the finest known of this year. The presently-offered 1804 is certainly one of the runners-up and is among the top ten finest known quarter dollars of the 1804 year. For some reason unknown to numismatists, 1804 quarters are rarely seen in grades above Very Fine. Even the appearance of an Extremely Fine specimen would be unusual. The present specimen was acquired years ago for \$3500. Worth considerably more today.

548 1805 Very Fine.

Choice Uncirculated 1806/5 Quarter

549 1806/5 Overdate. Choice Brilliant Uncirculated. A far above average striking (1806/5 is usually very, very weak at the center) with most of the detail needle-sharp. Really an extraordinary coin—perhaps the finest known of its variety. Certainly no comparable specimen has ever been seen or handled by us. A prize coin worthy of a record bid.

Uncirculated 1806 Quarter

550 1806 Brilliant Uncirculated. Weak at the center, as usual for this issue. Very rare in this grade.

Uncirculated 1807 Quarter

551 1807 Uncirculated, with light rubbing on the higher parts. As is usual for 1807, the denticles are weakly struck and the edge milling is absent in portions—giving the coin a plain edge for part of its circumference. The center part of the coin is especially sharply struck, which is unusual for an 1807. Light gray toning enhances the beauty of this specimen, which is certainly a far above average example among the few mint-state pieces remaining of this date. Last coin of the heraldic eagle reverse type.

552 1807 AU. Striking not quite so sharp as the preceding lot. Like it, the presently-offered coin has a partial plain edge. A nice coin for a type set.

Choice Uncirculated 1818 Quarter

553 1818 Uncirculated. A beautiful coin with a Proof obverse and a frosty Uncirculated reverse. Some minor handling marks do not take this out of the choice category. The piece was possibly made as a one-sided Proof. In the early years certain coins were made with Proof obverses and Uncirculated (i.e., regular) reverses—on the theory that the coins lay face-up in a coin cabinet or drawer and that the reverse would not be seen. The present coin bears the hallmarks of such a piece. Another excellent opportunity for the quarter specialist.

Gem Uncirculated 1819 Quarter

554 1819 Small 9. Gem Brilliant Uncirculated. Variety with 5 on reverse double cut and with a colon (instead of a period) after 25 C: A needle-sharp striking with exquisite and perfect detail. Possibly the finest known specimen of this scarce issue.

Choice Uncirculated 1825/3 Quarter

555 1825/3 Choice Brilliant Uncirculated, prooflike. A few microscopic marks are scarcely worthy of notice, for this is among the finest known surviving specimens of this scarce issue.

Lot 556

556 1831 Small letters. Choice Uncirculated, prooflike. One of the finest known examples of this, the first date of the 1831-1838 small-size capped bust series.

557 1831 Small letters. Brilliant Uncirculated gem. Another rare, rare opportunity to obtain a truly classic example of this early issue.

558 1832 Brilliant Uncirculated. Scarce in this grade. In demand for type sets, as are all Uncirculated quarters of the 1831-1838 span.

559 1833 Choice Brilliant Uncirculated. Some rustmarks on the dies, as usual for this variety. Rare in this grade.

560 1833 Brilliant Uncirculated. Another attractive specimen of this scarce issue. Some rustmarks on the dies as usual.

561 1834 Choice Brilliant Uncirculated. Another prize early quarter.

562 1834 Brilliant Uncirculated. Another example of the scarce 1831-1838 style. Quarters of this era are very rare in

Uncirculated grade. The Austin Collection offering is one of the most unusual opportunities of our time.

563 1834 Brilliant Uncirculated, light rubbing.

564 1838 Bust type. Brilliant Uncirculated. Last year of the 1831-1838 bust design. Very rare in this grade—rarer than most of the other 1831-1838 issues, in fact.

565 1853 Arrows at date. Rays on reverse. Brilliant Uncirculated, a gem. An outstanding specimen of one of the most desired coins in the Liberty seated issues. Quarters with rays on the reverse were issued only this year.

566 1853 Arrows at date. Rays on reverse. Choice Brilliant Uncirculated. From our sale of the Robert Marks Collection, Lot 52. A splendid piece with a light golden toned surface. A prize for the type set collector!

567 1853 Arrows and rays as preceding. Extremely Fine, polished.

568 1854 Arrows at date. Choice Brilliant Uncirculated. A splendid coin which traces its pedigree to our Terrell Collection sale, Lot 329.

569 1866 Proof with cloudy surfaces. First year of the IN GOD WE TRUST motto type.

(Check space on your bid sheet)

570 1866 Choice Brilliant Uncirculated. Lightly struck at the centers, as is nearly always the case with business strikes (non-Proofs) of this era. A prize coin which in this grade is far rarer than a Proof.

571 1866 Uncirculated. Light striking at centers as usual. Some bagmarks in the obverse field. Beautiful light magenta toning. A rarity in this grade!

572 Group of quarters: 1866 Extremely Fine; 1869 Extremely Fine; 1871 Fine. (Total: 3 pieces)

573 Group of quarters: 1866 Abt. Good obverse, Good reverse; 1869 Abt. Good to Good; 1869 VG; 1870 Abt. Good to Good; 1870 VG. (Total: 5 pieces)

574 1870 Attractively toned Proof. One of 1,000 Proofs minted this year.

575 1873 Arrows at date. Choice Brilliant Uncirculated. Full frosty and lustrous surface. A prize coin from the Terrell Collection sale, Lot 52. Certainly one of the finest specimens of this coin in existence.

576 1873 Arrows at date. Brilliant Uncirculated, light rubbing. A popular coin for type sets.

577 1874 Arrows at date. Beautiful Proof with light magenta toning. Only 700 Proofs of this issue were made. Very rare and desirable today.

578 1875 Attractively toned Proof. A few hairlines.

579 1875 Choice Brilliant Uncirculated.

580 1879 Attractively toned Choice Proof. Popular low-mintage issue.

581 1880 Attractively toned Proof. A few hairlines. Low-mintage issue.

582 1889 Brilliant prooflike gem. Just 12,000 business strikes were made this year. We doubt if more than two or three dozen survive today in quality equal to the present example.

583 1890 Choice Proof with beautiful lilac toning. One of just 590 Proofs minted, one of the lowest mintages of the period.

584 1891 Lightly toned Uncirculated. Some friction in the obverse field. Last year of the Liberty seated type.

585 1892 Choice Proof, with light toning. A very beautiful specimen of the first year of the Barber quarter design.

586 1892 Gem Proof with indescribably beautiful lilac toning. Another prize item!

587 1892 Choice Proof with light brown toning just beginning to appear. High-quality Proofs such as this are becoming very elusive.

588 1892 Brilliant Uncirculated, with a few minor bagmarks.

589 1892-S Brilliant Uncirculated. Scarce issue.

590 1893 Choice lightly-toned Proof.

591 1893-O Choice Brilliant Uncirculated.

592 1894 Choice Brilliant Proof. Only 972 Proofs minted this year.

593 1895 Choice Brilliant Proof. 880 Proofs were minted this year, and no more than a few hundred could survive in condition equal to this.

594 1896 Gem Brilliant Proof. One of 762 pieces minted this year.

Choice Uncirculated 1896-S Quarter

595 1896-S Choice Brilliant Uncirculated. A superb specimen of one of the most desired and rarest coins in the Barber quarter series. A rare, rare find for the quarter specialist who appreciates the very finest.

596 1897 Choice Proof. Attractive light toning.

597 1898 Choice Brilliant Proof.

598 1899 Choice Brilliant Proof. Some very light toning.

Note: In our opinion Proof Barber quarters are very undervalued. Nearly every date has a mintage of less than

1,000 pieces. The Austin Collection gives you the opportunity to bid on one or many really outstanding examples in this series.

SECOND SESSION

Saturday Morning, June 1. 10 a.m. Sharp Lots 675 to 1084

UNITED STATES HALF DOLLARS

Superb 1794 Half Dollar

- 675 1794 Overton-101. Brilliant Uncirculated, with just the slightest traces of friction on the very highest points. Purchased by the consignor from our Armand Champa Collection sale (Lot 820), this is one of the very finest 1794 half dollars in existence. Adding to its importance and desirability is the status of the 1794 as the first year of issue of the half dollar denomination. A very beautiful coin, and one worthy of a generous bid.

Choice Uncirculated 1795 Half Dollar —With A over E in STATES—

- 676 1795 O-113. Variety with the A in STATES cut over a previous erroneous E. Sometimes called the STATES over STETES variety. The presently-offered coin is a choice Uncirculated example with beautiful light gray and iridescent toning. It is one of the very choicest 1795 half dollars in existence. The diecutting error adds further interest. A prize coin for the type set collector or half dollar specialist!

Choice 1795 Half Dollar

- 677 1795 O-119. Two leaves under each wing. Overall sharpness of AU. Some adjustment marks, not unusual in this series, are visible with a glass. Attractive.

Important 1796 16-Stars Half Dollar

- 678 1796 16 Stars. O-102. Extremely Fine. Some adjustment marks on reverse. An especially sharp strike. Rare and important, the 1797 16-stars half dollar is in demand as a type coin (for half dollars of the draped bust type with small eagle reverse were coined only in 1796 and 1797) and as a rare variety. Apparently only a few hundred of this variety were coined. *Scott's Encyclopedia of U.S. Coins* notes that just 934 half dollars of 1796 were made. Of this number, most were of the 15-stars type. The present Austin Collection specimen represents a rare opportunity to acquire an especially fine example of this prime rarity.

Superb Prooflike 1797 Half Dollar

- 679 1797 Half dollar. O-102. AU, with prooflike surfaces on the obverse and reverse. This coin, one of the very finest 1797 half dollars in existence, is from our magnificent sale of the Terrell Collection (Lot 58) and, before that, from the Westwood Collection. This half dollar is the finest 1797 to appear on the market in recent years, to our knowledge.

The importance of this 1797 cannot be overemphasized. The 1796-1797 design type is the most elusive of all American silver coins needed for a type set. Al Overton estimates that 1600 pieces were coined in 1797. It is our estimate that fewer than 100 pieces of this date survive today, and it is our further opinion that the presently-offered Westwood/Terrell/Austin coin is in the top 5% of these in quality.

The Westwood Collection, the Terrell Collection, and now the Austin Collection were each remarkable for their superb

quality. The buyer of this 1797 will have the knowledge that the opportunity to acquire a finer one in his lifetime is remote.

Superb 1801 Half Dollar

- 680 1801 O-101. First year of the heraldic eagle reverse design. The condition of this specimen is spectacular: **Uncirculated**, prooflike obverse and reverse. Some minor bagmarks and hairline scratches do not detract from the desirability of this coin. This piece is far superior to the *Guide Book* and Overton plate coins and is of a superb quality unmatched by any other 1801 half dollar we have ever seen offered for sale! Noted as "excessively rare in Uncirculated" by *Scott's Encyclopedia of U.S. Coins*. A prize coin from the Terrell Collection, Lot 395.

Choice Uncirculated 1806 Half Dollar

- 681 1806 O-118a. Pointed 6, stem through claw. **Choice Uncirculated**. A beautiful, brilliant, and lustrous coin with subtle light rainbow toning just beginning to form around the edges. *Exceedingly well struck* for a half dollar of this era. From the great Terrell Collection sale, Lot 59, where we noted that "we have never handled the equal of this coin before, and once it is sold we doubt if a companion piece will ever come our way again." A splendid coin for the connoisseur.

Uncirculated 1806 Half Dollar

- 682 1806 O-115a. Pointed 6, stem through claw. **Brilliant Uncirculated**. A few minor adjustment marks hidden in the hair. Struck from a late state of the obverse die, with diebreak linking date and stars to the left. A splendid 1806. Half dollars of the 1801-1807 design are rarely seen so fine.

Plan to Attend the Sale!

We would be delighted to have you attend the sale in person. If we can help in any way with reservations or other information, just let us know!

- 683 1806 O-109. Pointed 6, stem not through claw. One of the most silly-appearing of all early American die blunders! The eagle's talons are carefully curved in a grasping position, and nothing is there! Attractive AU+. Nearly full lustre, and separated from full Uncirculated by a very minimal amount of wear.
- 684 •1806 O-109. Pointed 6, stem not through claw. Duplicate of preceding. VF-EF.

Uncirculated 1815/2 Half Dollar

- 685 1815/2 Half dollar. O-101. **Uncirculated**, with light gray and iridescent surface toning as acquired over a period of years. A virtual tie with the Terrell Collection coin in quality. Several years may well pass before another 1815/2 of this preservation comes on the market again. In great demand, for 1815/2 is the scarcest "date" in the 1807-1836 bust type series.
- 686 1826 O-118. AU.

- 687 1827 Square-base 2. **Gem Brilliant Uncirculated**. A very exciting coin!
- 688 1828 Square-base 2, small 8's in date. O-120. **Brilliant Uncirculated**, some minor rubbing.

- 689 1829/7 O-102. **Choice Brilliant Uncirculated**. One of the finest known specimens of this scarce overdate. Worthy of close attention from the specialist.

Brilliant Proof 1829 Half Dollar

- 690 1829 Brilliant Proof. A few trifling handling marks do not detract from the beauty of this, one of the most important half dollars to appear on the market in modern times. The coin is a full authentic Proof with complete Proof surface on obverse and reverse, including within the shield stripes. From one of the 10 to 15 specimen Proof sets made this year for presentation to government officials and other dignitaries. A prize coin!

- 691 1831 O-103. Choice Brilliant Uncirculated.

- 692 1833 O-108. Choice Brilliant Uncirculated.

- 693 1835 O-106. Brilliant Uncirculated, lightly toned. Very attractive.

- 694 1837 Variety with "inverted G" in AMERICA. The C in AMERICA has a crossbar at the top, giving it the appearance of a mirror-image inverted G. Choice Brilliant Uncirculated. One of the finest known examples of this rare variety.

- 695 1837 Choice Brilliant Uncirculated, with light iridescent gray toning just beginning to form. A pristine 1837, and one worthy of a top bid.

- 696 1838 Brilliant Uncirculated, light rubbing. First year of the 1838-1839 style with HALF DOL. on reverse. Rare in higher grades such as this.

- 697 1838 EF-AU, polished.

- 698 1839 Liberty seated. No drapery at elbow. Choice Brilliant Uncirculated, weakly struck at the centers as nearly always is the case. One of the choicest specimens of this variety to appear on the market in recent years. Of importance as the first Liberty seated half dollar.

- 699 1839 Liberty seated. No drapery at elbow. Brilliant Uncirculated, light rubbing.

- 700 1840 Medium letters. Very scarce issue with the reverse style of '38; entirely unlike the delicate letters of the "small letters" style. Scott notes: "Always flatly struck. Very rare in Uncirculated grade." The presently-offered AU coin is one of the finest we've seen in recent years.

- 701 1841 Brilliant Uncirculated gem. Liberty seated half dollars of this quality are very infrequently seen. Worth a record price.

- 702 Group of half dollars: 1846 tall date. AU; 1866-S no motto. Very Fine. Scarce issue; 1875 Extremely Fine. (Total: 3 pieces)

Gem Uncirculated 1853 Half Dollar

—With arrows and rays—

- 703 1853 Arrows at date. Rays on reverse. Brilliant Uncirculated, a gem. An exceedingly choice specimen of one of the most desired of all 19th century American type coins. In great demand by type set collectors, the half dollar style with rays on the reverse was made only during this year.

Another Gem Uncirculated 1853 Half Dollar

Proof 1855/4 Half Dollar

- 712 1855/4 Overdate half dollar. Arrows at date. Brilliant Proof. From our sale of the Robert Marks Collection, Lot 623, where it was described as follows:

This is only the second 1855/4 overdate half dollar we have had the pleasure of handling, and it is by far the finest in condition. The 1855/4 overdate is easily identifiable: the crossbar of the undertype 4 is sharply visible and extends from above the knob of the final 5 to the inner curve of the 5. In addition the tip of the bottom left serif of the 4 is visible within the lower right inner curve of the 5.

This spectacular Brilliant Proof coin, while possessing Proof credentials (the interior shield spaces are of Proof finish as are the protected areas within the star points, letter spaces, etc.; although several stars are flat at the centers—but this is not unusual for Proof silver issues of the 1840's and early 1850's), this coin was probably unintentionally made as such. The obverse die was evidently given a highly polished Proof finish when the die was re-prepared with the 1855 date. This polishing served to remove most of the final 4 digit. The combination of this obverse with a Proof reverse die, something that would have been unnecessary for regular coinage (that is, coinage for circulation) purposes leads us to believe that once the beautiful strikings for the obverse were seen, a Proof reverse die was combined with it—and the resultant coins were used as presentation pieces. This is, of course, conjecture—for the actual story will never be known. However, the coin speaks for itself: it is a fantastic appearing coin; a gem. Here is a classic offering which will forever be remembered in the annals of half dollar history and specialization. We have never seen the equal of this coin, and once it is sold, we doubt if we ever will again. This may truly be a once-in-a-lifetime opportunity.

Since the above description appeared in the Marks sale a New York collector informed us that he owns a similar Proof as part of an original 1855 Proof set. So, it is now evident that the Mint did consider these to be Proofs and sold them as such!

- 713 1855 Arrows at date. Uncirculated. Attractive light natural toning. From the Terrell Collection sale, Lot 510.

- 714 1855-O Arrows at date. Brilliant Uncirculated.

- 715 1860-S Half dollars, 3 pieces, VG to Abt. Fine average. (Total: 3 pieces)

UNITED STATES SILVER DOLLARS

The following offering of Morgan and Peace type silver dollars affords the collector and investor the opportunity to bid on one of the largest selections we've ever had in one of our sales. The chance is given to bid on rare single pieces, interesting groups, and on large lots and sets. Morgan and Peace dollars have always been a very popular series. Seldom does such an interesting purchase opportunity occur!

Grading is by the Sheldon or Mint State system, as explained earlier in this catalogue. MS-60 is equivalent to basic Uncirculated; MS-65 is equivalent to choice Uncirculated; MS-70 is equivalent to gem Uncirculated.

765 1878 Group of different varieties, including duplicates: 1878 8TF MS-65; 1878 7TF MS-65; 3 pieces 1878-S MS-65; 1878 7/8TF MS-65; 1878-CC MS-65. A nice group, all in hand-picked far above average condition. (Total: 7 pieces)

766 1877 7 over 8 tail feathers. Group of 10 pieces. Average grade is BU with rubbing to MS-60, but several are MS-60/65. (Total: 10 pieces)

Note: When the Morgan dollar was first issued in 1878 some ornithologically-inclined numismatists noted that the eagle had an even number of feathers in the tail, with no central feather. To remedy this oversight the design was changed to 7 feathers. The curious and very interesting 7/8TF was produced (in several minor die varieties, by the way) by impressing a previously-made 8 tail feathers die with the new 7 tail feathers hub.

767 Group of 1878, 1879, and 1880 dollars. A fine lot of hand-selected pieces of high quality: 1878 8TF MS-65; 1878 7TF MS-65 prooflike; 1878 7/8TF MS-65; 1878-CC MS-60/65; 1878-S MS-65; 1879 MS-70; 1879-O MS-65; 1879-S MS-65+; 1880 MS-70; 1880-O MS-65; 1880-S MS-70. (Total: 11 pieces)

Rare 1895 Morgan Dollar

808 1895 Morgan dollar. Brilliant Proof, but with numerous hairlines in the field; the result of some injudicious cleaning years ago. The specimen still retains its full sharpness and frostiness on the higher spots. The fields are fully mirrorlike. Though not a choice Proof, the present specimen is still in the top 50% in quality of the perhaps 500 or so known Morgan dollars of this date, a coin often called the "King of Morgan Dollars."

Another Rare 1895 Morgan Dollar

809 1895 Morgan dollar. Struck as a Proof (as were all authentic 1895 dollars known to numismatists today), but impaired by heavy cleaning with an abrasive substance years ago. Apart from the fields, which are cloudy, the coin retains the sharpness of a Proof example. An excellent item for the silver dollar specialist who wants an attractive and sharp 1895 without having to pay the price of a fully choice Proof example.

OPPORTUNITY

Opportunity is where you find it. The Austin Collection gives you the opportunity to bid on many choice and rare United States coins and coins of the world. Your participation is invited—either by mail or in person.

UNITED STATES GOLD COINS

We offer an outstanding selection of United States gold coins including major rarities in the \$2½, \$3, \$5, \$10, and \$20 series. These coins, carefully collected over a period of years, are coming on the market at a time when the scarcity, beauty, and value of rare American gold coins is beginning to be recognized. As such, this offering should attract wide attention.

U.S. GOLD DOLLARS

- 983 1854 Type II. Scarce Indian princess design with small head as produced mainly during the 1854-1855 years. In strong demand for type sets. Extremely Fine.
- 984 1855 Scarce type II design as preceding. Extremely Fine.
- 985 1855 Type II as foregoing. Nice Very Fine to EF.
- 986 1857 AU.

- 987 1870 Brilliant Uncirculated, a gem. A splendid specimen of one of the scarcest gold dollars. Only 6,335 1870 gold dollars were minted. Probably no more than 100 pieces in Uncirculated grade exist today.
- 988 1874 Extremely Fine.

U.S. QUARTER EAGLES (\$2½ GOLD)

Choice AU 1796 No-Stars
—Only 963 minted—

- 989 1796 No stars on the obverse. One of the rarest of all quarter eagles; a coin of which only 963 pieces were minted. Of extreme significance for several reasons: (1) The low mintage makes it one of the rarest coins in the series; (2) It is the first year of the quarter eagle denomination; (3) It is the only year in which the no-stars design was used, thus making the coin needed to complete a type set of gold coins. Magnificent AU condition with nearly full mint lustre on the reverse. Sharply struck and well centered. A really choice specimen of one of the most important early American gold coins.

Rare 1798 Quarter Eagle

- 990 1798 Wide date, 5 berries on reverse. Adams and Breen No. 2, and noted by Walter Breen as a coin of which just 8 or 9 specimens are known. Beautiful Extremely Fine. A prize coin for the gold specialist.

Rare 1806/4 Quarter Eagle

- 991 1806/4 Overdate. Exceedingly rare variety. Although precise figures are not known, it is estimated that fewer than 1,000 pieces were minted. No more than a few dozen exist today. The presently-offered coin is a beautiful and nearly fully lustrous AU specimen. Some usual weakness of striking at the center reverse and a tiny rim nick must be mentioned, but this notwithstanding, the present coin is one of the finest known examples of this rarity. A really beautiful coin!

Rare 1824/1 Quarter Eagle

- 992 1824/1 One of just 2,600 minted of this variety. Sharply struck and very desirable AU. Small rim nick on obverse. One of the finest known examples of this rare early issue. An important opportunity for the specialist.

Uncirculated 1827 Quarter Eagle

- 993 1827 Brilliant Uncirculated. A beautiful and fully frosty coin. Only 2,800 quarter eagles of this date were minted. Most were quite flatly struck (cf. *Scott's Encyclopedia of U.S. Coins*, page 130). The present coin is sharply struck and is certainly among the finest known examples of this date. In years of searching, the consignor never encountered an equal specimen.

Important 1831 Quarter Eagle

- 994 1831 Brilliant Uncirculated, prooflike. Some minor handling marks on the surfaces. Nearly completely prooflike, and probably struck from the dies used to coin presentation Proofs this year. A really outstanding specimen of this rarity. Only 4,520 were minted.

Rare 1833 Quarter Eagle

- 995 1833 Brilliant Uncirculated, with rubbing on the surfaces. Traces of prooflike areas in the fields. An extraordinarily sharp strike. Two minor rim marks on reverse. Rare!

- 996 1834 No motto. Choice Brilliant Uncirculated, prooflike. An outstanding specimen of the first year of issue of the short-lived 1834-1839 design. Very rare in this outstanding condition.

- 997 1834 No motto. Extremely Fine.

- 998 1835 EF-AU. "X" scratch in reverse field.

Sale Conducted by the
AMERICAN AUCTION ASSOCIATION
Division of Bowers and Ruddy Galleries

Directors: James F. Ruddy/Nancy Ruddy/Q. David Bowers

- 999 1845-D Choice Brilliant Uncirculated. Extremely rare in this condition. Dahlonega quarter eagles of all dates are rare in all grades. AU specimens are exceedingly rare. Uncirculated pieces are virtually nonexistent. No more than a half dozen 1845-D quarter eagles the equal of this exist, and even this estimate may be on the high side.

1848 CAL. Quarter Eagle

- 1000 1848 CAL. variety. Struck as a *commemorative* coin from the first shipment of Mother Lode metal to reach Philadelphia. Only 1,389 pieces were minted with the distinctive "CAL." countermark, which was placed there at the Mint to provide collectors, historians, and others with the first American coinage from "Gold Rush" metal. The presently-offered coin is a nice Very Fine specimen.

- 1001 1853 Extremely Fine.

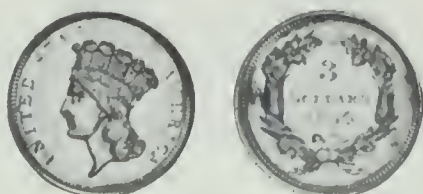

- 1002 1877 Rare date. Brilliant Uncirculated, light rubbing. Seldom offered for sale in any grade.

- 1003 1907 Choice Brilliant Uncirculated. The last coin in the long-lived Liberty head type which was produced from 1840 until that year.

- 1004 Group of quarter eagles, all EF to AU: 1908; 1910; 1911; 1915; 1926; 1927; 1929. A nice group! (Total: 7 pieces)

- 1005 1914-D AU.

U.S. THREE-DOLLAR GOLD PIECES

- 1006 1854-O The only New Orleans Mint coin of this denomination. Brilliant Uncirculated, some minor handling marks. Of

extreme rarity in this grade. Walter Breen notes that 1854-O is "not known to exist in strictly mint state, although Very Fine examples are plentiful." *Scott's Encyclopedia of U.S. Coins* observes that the coin is "very rare in Uncirculated grade." The present example was purchased by the consignor as *the finest known 1854-O*. While we hesitate to use the term "finest known" as liberally as some others do (believing that no one person or firm can see or know of all things), we do know that it certainly is *among the finest known* and is a major rarity in this grade. Worthy of a liberal bid.

- 1007 1855 Choice Brilliant Uncirculated. 50,555 minted. Scott notes this coin is "very rare in Uncirculated grade." The presently-offered piece is certainly among the top ten finest examples known of this date. A prime rarity in this condition. Worth a record price.

- 1008 1855 Extremely Fine. Loop removed at top.

- 1009 1856-S Medium S. Brilliant Uncirculated, some rubbing. Quite scarce in higher grades such as this. 1856-S is usually only seen in lower grades such as Very Fine and Extremely Fine. An important opportunity for the specialist.

- 1010 1859 Choice Brilliant Uncirculated. Very rare in this grade.

- 1011 1860 Choice Brilliant Uncirculated. Only 7,155 pieces were minted, and of this number there could be no more than a dozen or two comparable specimens in existence today.

- 1012 1860-S AU. One of the finest known examples of this variety. No strictly Uncirculated specimens of this coin are known to exist (cf. the Scott and Breen works), despite the *Guide Book* valuation of \$750. This AU piece should easily exceed that figure. A find for the gold specialist!

- 1013 1862 Brilliant Uncirculated, a few minor marks. Only 5,785 minted this year.

- 1014 1863 Choice Brilliant Uncirculated. A beautiful specimen of one of the rarest issues in the series. Walter Breen notes that just 5 or 6 Uncirculated pieces are known, and that 1863 "is a very rare date and is grossly undervalued in all grades."

- 1015 1864 Choice Brilliant Uncirculated. One of just 2,680 pieces minted. Exceedingly rare in this grade. Among the top dozen finest non-Proofs known.

- 1016 1865 AU. Just 1,165 minted of this year. Very rare so fine.

- 1017 1866 Brilliant Uncirculated, some light rubbing. Very rare in this condition.

- 1018 1867 Brilliant Uncirculated, prooflike. Struck from Proof dies, but intended for circulation. A splendid specimen of this low mintage (2,650) date.

- 1019 1869 Brilliant Uncirculated. Some bagmarks. Very rare. Only 2,525 pieces minted this year.

- 1020 1870 Brilliant Uncirculated, some marks. Just 3,525 minted. This sale gives the gold specialist the opportunity to acquire

many rarities in the gold series. The consignor endeavored to obtain Uncirculated (rather than Proof) examples of as many \$3 pieces as possible.

- 1021 1871 Choice Brilliant Uncirculated. A gem striking of exquisite sharpness. Only 1,330 pieces were minted of 1871, and probably fewer than a half dozen business strikes survive in condition equal to the present example. A superb coin!

- 1022 1872 Brilliant Uncirculated, some surface friction. Small lint-caused planchet defect on jaw. Scarce date. Only 2,030 minted of this year.

- 1023 1874 Extremely Fine.

- 1024 1877 AU, prooflike. A very attractive specimen of one of the most elusive issues of the later date \$3 pieces. 1,488 minted—a figure which in itself makes this a rarity. However, it has been our experience that 1877 is even rarer than the low mintage would indicate. Here is the opportunity to acquire an outstanding specimen!

- 1025 1878 AU, or a bit better. A very pleasing coin.

- 1026 1879 Gem Brilliant Uncirculated. A splendid and unimprovable specimen of this scarce year. Just 3,030 pieces minted.

- 1027 1880 Choice Brilliant Uncirculated, prooflike. One of just 1,036 pieces coined. Exceedingly rare in this superb condition. Another opportunity for the gold coin specialist.

- 1028 1881 Proof with rubbing. A Proof specimen which spent a month or two in circulation. 1881 is exceedingly rare as a date. Just 500 business strikes plus 54 Proofs were made. One of the most important coins in the \$3 gold series.

- 1029 1882 Brilliant Uncirculated, prooflike. Some friction in the fields. Only 1,576 \$3 pieces were minted this year.

- 1030 1883 Brilliant Uncirculated. Some prooflike surface. An exceedingly important coin; one of the few \$3 pieces with a mintage below 1,000. Just 989 pieces were coined.

Choice Proof 1884 \$3 Gold

- 1031 1884 Choice Brilliant Proof. A superb specimen of this rarity. Only 1,106 1884 pieces were made; a figure which is composed of 1,000 business strikes and 106 Proofs. The presently offered coin could not be exceeded in quality. Worthy of a record price, and undoubtedly it will bring that.

- 1032 1884 Brilliant Uncirculated. A magnificent specimen of this rare date. Just 1,000 business strikes were made, and it is doubtful if more than a few dozen exist in mint condition today.

- 1033 1885 Brilliant Uncirculated, prooflike. Struck from polished Proof dies and having most of the characteristics of a Proof. Exceedingly rare date. Only 801 pieces were made for circulation — an incredibly low figure. A prize coin worthy of a record price.

Beautiful Proof 1886 \$3 Gold

- 1034 1886 Beautiful glittering Proof. A splendid specimen of one of the rarest of all \$3 issues. Only 1,000 business strikes plus 142 Proofs were minted of this date. Only rarely does the opportunity to acquire a top-grade specimen occur. Worthy of a liberal bid!

Another Splendid Proof 1886 \$3 Gold

- 1035 1886 Brilliant Proof as preceding. Another specimen of this rare and highly-desired issue. Only rarely does the chance to bid on a single 1886 in any grade occur. The offering of two Proofs in this sale is remarkable!

- 1036 1889 Choice Brilliant Uncirculated. A very attractive specimen of the last year of \$3 coinage. Just 2,429 pieces minted.

U.S. HALF EAGLES (\$5 GOLD)

Choice 1795 Small Eagle \$5 Gold —S over D in STATES—

- 1037 1795 Small eagle reverse; the first design in the half eagle series. The reverse depicts a delicately-formed eagle perched on a palm frond. The presently-offered coin is the scarce and

interesting variety with the final S in STATES over an erroneous D; a variety which can also be described as STATES over STATED. The coin here offered is a **Brilliant Uncirculated** specimen with some rubbing in the fields. The surfaces are prooflike in areas. The coin is sharply struck, and the S/D error is well defined. A prize early half eagle!

Sharp 1795 Small Eagle \$5 Gold

1038 1795 Small eagle reverse style. A sharply struck **prooflike AU** specimen. Of great importance as a type coin to illustrate the first half eagle design. Only rarely is a 1795 half eagle the equal of this offered.

1798 \$5 With 13-Star Reverse

1039 1798 Large 8 in date. 13 stars on reverse. Breen variety 3-E, with reverse stars arranged symmetrically and in so-called "abnormal" style. Sharply struck and very beautiful AU. An important coin for the half eagle specialist.

1040 1804 Small 8 over large 8 variety. Attractive VF-EF.

1041 1806 Pointed 6. Breen 1-A (Rarity 6). **Brilliant Uncirculated**, some prooflike surface. Light adjustment marks on high areas of obverse. A beautiful specimen of this early issue.

Thank you for your Participation!

1042 1806 Round 6. A beautiful **gem Brilliant Uncirculated** specimen. Early half eagles in this grade are extremely rare. An important opportunity for the gold specialist or the type coin collector.

1043 1813 Choice Brilliant Uncirculated. Important as the first year of the capped head to left type with head separating stars (issued 1813-1819). Outstanding condition for this early coin.

1044 1813 Extremely Fine.

Extremely Rare 1834 With Motto \$5

1045 1834 With E PLURIBUS UNUM on reverse. Plain 4 in date. **Choice Brilliant Uncirculated**. Exceedingly rare in this condition. Walter Breen could trace only two mint-state specimens of this: the Hall-Green coin and the Clapp-Eliasberg piece. The presently-offered coin, a splendid specimen of the last year of the 1820-1834 type and a very rare issue in all grades, should attract wide attention.

1046 1834 No motto. Plain 4. Brilliant Uncirculated, prooflike. Some minor surface contact marks, but still an exceptional specimen. First year of the short-lived 1834-1838 design.

1047 1834 No motto. Extremely Fine.

1048 1835 Choice Brilliant Uncirculated, prooflike. Some normal light handling marks. An exceptionally nice coin.

1049 1838-D Brilliant Uncirculated, some bagmarks in fields. First issue of the Dahlonega Mint, and the only Dahlonega coin of this design. Rare in all grades. Especially rare in the outstanding condition offered here.

1050 1847-D Choice Brilliant Uncirculated, prooflike. Some minor bagmarks. "Extremely rare in Uncirculated grade" notes *Scott's Encyclopedia of U.S. Coins*. All Dahlonega coins in AU or Uncirculated grades are quite rare. This is an exceptional coin.

1051 1877 Prooflike Uncirculated, but mishandled. A coin which spent several months in circulation. 1877 is exceedingly rare. Only 1,132 business strikes were made, plus 20 Proofs. It is doubtful if more than a few dozen 1877 \$5 pieces are known today in all grades.

1052 1881 AU.

1053 Pair of \$5 and \$10: 1887-S \$5 Very Fine; 1847-O \$10 VF-EF. (Total: 2 pieces)

1054 1893 Very Fine.

1055 Pair of \$5: 1899 Brilliant Uncirculated; 1913 Extremely Fine. (Total: 2 pieces)

1056 1899 Brilliant Uncirculated, light rubbing.

1057 1911 Extremely Fine.

U.S. EAGLES (\$10 GOLD)

Choice 1795 \$10 Gold

1058 1795 First design of this denomination, with eagle perched on a palm frond. Variety B-1-A, the very first die variety of the series. Brilliant Uncirculated, with some very light rubbing. Exceptionally choice in all aspects: striking, sharpness of detail (including the eagle's breast feathers), centering, absence of adjustment marks, smoothness of fields. Here is one of the finest known examples of the first coin in the \$10 gold series. Worthy of a generous bid.

Exceptional 1797 Large Eagle \$10

1059 1797 Large eagle. Brilliant Uncirculated, some light rubbing. B-2-C. One of the finest known specimens. Breen mentions one Uncirculated piece, then next an AU, followed then by an Extremely Fine example. A prize coin for the gold specialist.

1060 1800 AU. An attractive specimen of this issue. Low mintage of just 5,999 pieces.

Uncirculated 1803 \$10 Gold

- 1061 1803 Choice Brilliant Uncirculated. Handling marks, which are usually heavy on these early large gold coins, are minimal in this instance. A nice coin for a type set.

Rare 1804 Eagle

- 1062 1804 AU. Very rare; the most elusive of all 19th century eagles of this design, in fact. The presently-offered coin is one of the finest 1804 eagles to come on the market in recent years. More usual grades for the 1804 are Very Fine to Extremely Fine. Another important opportunity for the gold coin specialist.

- 1063 1838 Brilliant Uncirculated, some handling marks—including minor rubbing and a few light rim marks. The first year of the new Liberty head type. Only 7,200 minted. Extremely rare in higher grades.

- 1064 1839 Large letters. Type of '38. With large letters on the reverse. Obverse with neck truncation very curved, and with truncation point ending over the 13th star. Style made in 1838 and the early part of 1839. Extremely Fine. Scarce.

- 1065 1839 Small letters. New style with small letters on the reverse. Obverse with redesigned head of Liberty, with the truncation much less curved and with the point ending to the left of the 13th star. Extremely Fine, some surface granularity. Probably a coin recovered from an undersea treasure wreck, for the surface is similar to that seen on other similar finds known to us. Rare in higher grades.

- 1066 1846-O. Possibly a state of the so-called "1846/5" die (cf. Scott, page 144). Dot-like raised area, possibly the ball of a previous 5, within final digit of date. Very Fine.

- 1067 1854-S AU. First \$10 issue of the newly-opened San Francisco Mint.

- 1068 1858-O EF-AU.

One of the Finest Known 1860-S Eagles

- 1069 1860-S From our Matt Rothert Collection sale, Lot 1149, where it was described as follows:

1860-S Brilliant AU, some minor pin scratches on obverse. One of just 5,000 minted of this variety. 1860-S is rarely seen in grades better than Extremely Fine, and even EF examples are very rare. Scott notes that this variety is "unknown in Uncirculated." The present specimen, one of the finest known examples of the 1860-S, should attract wide attention from gold specialists.

- 1070 Group of \$10: 1881-S VF; 1896-S VF; 1910-D EF; 1911 EF-AU; 1912 BU. (Total: 5 pieces)

- 1071 1913-S AU.

- 1072 1932 Choice Brilliant Uncirculated. Formerly the property of silent screen star Harold Lloyd, whose *Safety Last*, *The Freshman*, and other comedy films of the 1920's are classics.

U.S. DOUBLE EAGLES (\$20 GOLD)

- 1073 1856 Uncirculated. With slightly granular surfaces as acquired from a century's exposure to sea water. This and the following lot were recovered from a ship which sank in the Atlantic Ocean off the eastern U.S. coast. Aboard were a number of gold coins, mainly newly-minted pieces of the 1850's, enroute to a military garrison to pay the troops there.

- 1074 1856-S Uncirculated. With matte surfaces as preceding. Mint-state double eagles of the early 1850-1866 design type are very rare.

Sharp EF-AU 1861-S Paquet \$20

- 1075 1861-S Paquet. With the distinctively-styled reverse by Anthony Paquet. In 1859 and 1860 Paquet prepared several patterns for the double eagle denomination. Early in 1861 new double eagle reverse dies with tall, narrow letters on the reverse were sent to Philadelphia, New Orleans, and San Francisco. It was anticipated that \$20 pieces from this time forth would be of the new Paquet style. On January 5, 1861, two pieces were struck at the Philadelphia Mint. It was noted that the reverse die was slightly too large for the obverse and that the reverse border, being too narrow, would not strike up properly. In addition, there would be abnormal wear on the dies when the coins were struck. The Director immediately countermanded any further use of the dies. The message was wired to New Orleans and arrived before any coins were struck there. The order to the San Francisco Mint was sent overland, there being no telegraph west of St. Joseph, Missouri, at the time. Before the Director's orders arrived (in February 1861) 19,250 1861-S Paquet double eagles had been struck. Apparently most of these were melted and recoined into regular (pre-Paquet design) style pieces. The existence of 1861-S Paquet double eagles was not known to numismatists until many years later. Today the 1861-S Paquet is one of the most desired of all \$20 issues. The variety is very scarce. In addition, it has the distinction

of being a separate design type with an interesting story. The present specimen, a very nice EF-AU example, is one of the finest known examples. Most other Paquet double eagles range from Fine to Very Fine.

- 1076 1883-CC AU. A very attractive coin of far above average sharpness of striking. Scarce so fine.

Choice Uncirculated MCMVII \$20

- 1077 MCMVII (1907) High relief design with Roman numerals. Flat edge variety. Choice Brilliant Uncirculated. An outstanding specimen of this scarce, beautiful, and popular issue.

Historical note: President Theodore Roosevelt, desirous of improving the artistry of United States coin designs, engaged the services of noted sculptor Augustus Saint-Gaudens to prepare designs for the \$10 and \$20 gold issues. Following a small mintage of \$20 pieces in extremely high relief, 11,250 "regular" high relief double eagles were struck in 1907. These differed from later designs by having the date in Roman numerals (MCMVII) and by having a deep and very bold relief—almost a sculptured effect. It was soon found that the high relief necessitated having each coin struck three or four times (instead of the customary single strike needed for high quantity coin production) in order to make all of the designs fill the die. It was further found that the average citizen could not read the Roman numeral date quickly. Thus the high relief design was soon discontinued, and the later low-relief Arabic numerals pieces became the standard.

The MCMVII high relief double eagle remains today as an outstanding example of the American coinage art; a coin which many consider to be the most beautiful design ever struck for circulation.

- 1078 MCMVII (1907) Roman numerals, high relief variety. With wire rim or edge on obverse and reverse; the wire rim being unusually prominent in this example. Brilliant Uncirculated, with some rubbing, but bereft of any major defects. All in all a very, very attractive specimen of this beautiful design. A prize coin!

U.S. TERRITORIAL GOLD COINS

- 1085 Carolina gold. \$5 CAROLINA. RUTHERFORD. C. Bechtler coinage. 140 gr. 20 carats. AU, prooflike surfaces. Slightly dish-shaped at center. Certainly one of the finest-preserved examples of this issue.

- 1086 1849 Norris, Grieg & Norris \$5. Reeded edge. Sharp and lovely AU with some prooflike surface in the fields. One of the sharper specimens we have handled of this scarce issue.

Note: Struck by the firm of Norris, Grieg & Norris at Benecia City, once the capital of California. Benecia City was considered to be California's city of the future until San Francisco, more favorably situated with respect to shipping, prospered with the Gold Rush trade.

- 1087 \$10 1852/1 Augustus Humbert, U.S. Assayer of Gold, California. Sharp AU. With diagonal diebreak on reverse as usual; a feature which undoubtedly accounts for the scarcity of this variety.

Rare 1860 Mormon \$5

- 1088 1860 Mormon \$5. Lion on obverse. Eagle and beehive design on reverse. Sharp EF-AU. Of importance not only as a rare issue but also as the only variety of this distinctive design.

Note: For a fictionalized view of life in the Land of the Saints around 1860 the reader may wish to acquire a copy of A Study in Scarlet, the first narrative in the Sherlock Holmes series.

- 1089 \$20 1860 Clark, Gruber & Co. Pattern \$20 with Pikes Peak appearing as a pyramid with vertical rifts. This style was made only in pattern form. Copper, gilt. Extremely Fine. Scarce.

- 1090 1854 \$20 Kellogg & Co. San Francisco. Brilliant Uncirculated, some light rubbing and a few light marks. An extraordinarily sharply struck specimen of this scarce issue. Not one in ten known pieces approaches this in quality. A rare find for the territorial gold specialist.

UNITED STATES PATTERN COINS

We offer an interesting selection of patterns, including some very important rarities and a number of popular issues. All attributions are to "U.S. Patterns" by Dr. J. Hewitt Judd.

- 1100 1854 Pattern 1c. J-161. Style similar to the large cent of the period, but on a smaller and lighter (92.0 grains in the instance of the specimen here offered) planchet and with a slightly differing design. Important as the first step which eventually led to the elimination of the cumbersome large cent—in favor of the later copper-nickel format. Attractive red and brown Uncirculated. An exceptionally nice specimen.
- 1101 1855 Pattern 1c. J-170. Struck in copper-nickel (80% copper, 20% nickel) composition. Flying eagle design. 111 grains. Extremely Fine or better. A coin with very little actual wear.

- 1102 1858 Pattern 1c. J-191. Copper-nickel. Obverse: regular flying eagle design with small letters. Reverse: Style of '59 with laurel wreath. An important *transitional* pattern, and of special interest as such. Brilliant Proof. One of the nicest specimens we've seen of this variety.

- 1103 1858 Pattern 1c. J-192. Obverse: regular flying eagle design with small letters. Reverse: oak wreath. Copper-nickel. Brilliant Proof, but cleaned with a light abrasive and now showing numerous hairlines. Nonetheless quite sharp.

- 1104 1858 Pattern 1c. J-198. Copper-nickel. Obverse: small flying eagle. Reverse: oak wreath with ornamented shield. Lightly toned attractive Proof.

- 1105 1858 Pattern 1c. J-208. Obverse: Indian head as regularly adopted in '59. Reverse: laurel wreath as regularly adopted in '59. *Transitional* pattern: a coin exactly like a regular 1859 Indian cent in every respect except the date! Proof, some cloudiness.

- 1106 1858 Pattern 1c. J-211. Copper-nickel. Obverse: Indian head as adopted in '59. Reverse: oak wreath. Toned Proof.

Note: Pattern cents of 1858 come in many different varieties and die combinations. These were exceedingly popular with collectors in the 1860's—the cradle years of numismatics in America—and many endeavored to acquire sets of these interesting issues.

- 1107 1858 Pattern 1c. J-212. Copper-nickel. Obverse: Indian head design as adopted in '59. Reverse: oak wreath with ornamented shield. Toned Proof. Scarce, as are all 1858 patterns.

- 1108 1858 Pattern 1c. J-213. Copper-nickel. Obverse: Indian head as adopted in '59. Reverse: agricultural wreath as used on flying eagle cents 1856-1858. An important *transitional* pattern. Brilliant Proof from especially highly polished dies. A tiny spot on the obverse border is scarcely worth mentioning. One of the rarer 1858 issues.

- 1109 1859 Pattern 1c. J-227. Obverse: Indian head as regularly used this year. Reverse: oak wreath with ornamented shield. Uncirculated, some rubbing.

- 1110 1859 Pattern 1c. J-228. Obverse: Indian style as regularly used this year. Reverse: oak wreath with shield as regularly used beginning in '60. An important and interesting *transitional* issue. Considered by some (e.g., Wayte Raymond, Don Taxay) to have status as a regular issue, for pieces were mostly struck in Uncirculated rather than Proof grade. This specimen is a Choice Brilliant Uncirculated.

- 1111 1859 Pattern 1c. J-228. Duplicate of preceding transitional issue. Nice AU.

- 1112 1869 Pattern 25c. J-734. Standard Silver issue. Silver. Plain edge. Choice lightly-toned Proof.

Important 1916 Pattern Half Dollar

- 1113 1916 Pattern half dollar. J-1798. Acquired by the owner of the Austin Collection from our Robert Marks Collection sale, Lot 1081. The piece is somewhat similar in design to the regular Liberty walking issue, but with many important differences. The figure of Liberty is smaller. IN GOD WE TRUST is placed lower on the obverse. The reverse legends of E PLURIBUS UNUM and HALF DOLLAR are in different positions. Rarity 8. The present coin is one of just two or three known to exist. Superior to the Scott and Judd plate coins. Brilliant Uncirculated, matte-like surfaces. Probably a once-in-a-lifetime opportunity for the pattern specialist. The importance and rarity of this lot cannot be overemphasized.

Unique 1866 Pattern \$5

- 1114 1866 Pattern \$5. J-545. Obverse with the portrait of President George Washington. Reverse with the reverse of the \$5 gold without IN GOD WE TRUST. White metal. Extremely Fine or better. Lightly struck along lower left obverse edge and corresponding area on reverse, but not affecting the design. This is the Judd plate coin as pictured on page 93 of *U.S. Patterns*. The coin is listed as unique — just one specimen known to exist.

Here is a coin with several appeals: (1) to the pattern specialist; (2) to the gold coin specialist; (3) to the collector of Washington items. Whether or not you own J-545 in your lifetime could well depend upon your success in bidding on this lot. A most important opportunity.

Magnificent 1877 \$50 Gold Pattern

- 1115 1877 Pattern \$50 gold. J-1549. Sold into the Austin Collection from our Robert Marks Collection sale, Lot 1085.

\$50 or "Quintuple Eagle." A massive coin with general legends and devices somewhat similar to the \$20 gold coins of this era. Struck in copper; reeded edge. Gem iridescent Proof. No finer specimen could exist! Dr. Judd notes that this coin is Rarity 8, and that just 2 or 3 are known to exist. One of these is impounded permanently in the Smithsonian Institution.

The planned striking of regular \$50 gold coins in 1877 was abandoned when it was proven that coins of this thickness and large size could be altered more easily than the smaller and thinner pieces. The Adams-Woodin pattern reference states (cf. p. 151):

"In this year [1877] were struck at the Mint two of the rarest and most interesting pattern coins of the whole series. They were of a denomination higher than any coin of regular issue, being of fifty dollars value, and are regarded by all collectors as the most desirable coins ever issued at the United States Mint."

The 1877 \$50 issues were inspired by the large and impressive \$50 gold "slugs" which circulated in California a decade or two earlier. Senator Gwin of California in 1854 presented a bill to Congress to coin \$100, \$50, and \$25 gold pieces to be called the "Union," "Half Union," and "Quarter Union," and noted that "the 'Half Union' should only be struck for the present."

Why it took until 1877 for this "Half Union" to be produced would be a good subject for research. Perhaps in 1877 a general awakening of interest in art and beauty of coin design (as evidenced by the spectacular series of 1877 pattern half dollars of many different artistic designs) prompted mint officials to re-evaluate this earlier proposal. Edgar H. Adams and William H. Woodin devote 3½ pages of their book to these 1877 \$50 gold pieces; more background information than is given to any other issue! The two specimens struck in gold sold at \$10,000 each in 1910—by far the highest price ever paid for a coin up to that time. These were traded to the United States government by Woodin (who later became Secretary of the Treasury under Franklin D. Roosevelt) for some "trunks full of patterns" of earlier dates—a treasure trove which became the origin of most pattern coins now in the hands of collectors. It is estimated that these patterns today would have an aggregate value of many millions of dollars. If one of the two gold coins (each of which is now permanently impounded in the Smithsonian Institution) were available to collectors, we believe it would sell for several hundred thousand dollars—and there would be many buyers for it. We believe that the presently-offered copper specimen, a gem Proof and a coin considered by many to be the "most wanted pattern," might now have a value of between \$20,000 and \$30,000.

ADDITIONAL UNITED STATES COINS

—Various series and denominations—

- 1116 1795 Half cent. Plain edge. No pole to cap. Cohen-6a. Sharp AU grade. Struck slightly off center to the left, a feature which makes the denticles unusually prominent on the right-side obverse and reverse. Fields nearly flawless, save for an old scratch on the left side of the obverse. A really outstanding example, and a fine possibility for a choice type set.

- 1117 1797 Half cent. 1 over 1 variety. Cohen-1. Struck from a shattered obverse die, which was responsible for a corresponding weakness at ICA of AMERICA on the reverse. VF-EF, some old surface marks.

- 1118 1804 Half cent. Plain 4. Stemless wreath. Brown Uncirculated. Some minor (and perhaps removable with judicious cleaning) spots. Light kegmaks. A pristine example of a truly Uncirculated half cent of the 1800-1808 design. A nice type set coin!

- 1119 Group of half cents: 1826 EF; 2 pieces 1834 EF; 1855 EF. (Total: 4 pieces)

- 1120 1793 Chain AMERICA cent. Sheldon-2. Sharp Extremely Fine, but much of this sharpness was gained by retooling the fields long ago—probably in the 19th century when retooling of usually-weakly-struck 1793 cents was widely practiced. Attractive light brown surfaces.

- 1121 1793 Wreath cent. Vine and bars edge. S-9. Abt. Very Fine overall. Some surface marks keep it out of the strictly Very Fine class. Well struck and sharp in all respects. An important coin for type sets.

- 1122 1793 Wreath cent. Lettered edge. S-11c. Fine to Very Fine. Some minor surface marks. Another attractive specimen of one of the most desired coins for a complete U.S. type set.

- 1123 1798 Cent. Reverse of '96. Sheldon-155. Extremely Fine. Strengthened long ago by retooling.

- 1124 1803 Cent. The scarce large date variety. Large fraction on reverse. Sheldon-265. Attractive VF-EF. Dark toned glossy surfaces. Small planchet chip under chin. A very attractive specimen of this popular variety.

- 1125 1806 Cent. S-270. Extremely Fine, some light porosity. 1806 is one of the scarcer 19th century dates in the large cent series.

- 1126 1858 Flying eagle cent. Large letters variety. Brilliant Proof. Some microscopic handling marks. Still quite desirable, and with a pleasing overall aspect. Quite rare. Only a few dozen Proofs of this issue are known.

- 1127 1914-D Cent. Brilliant Uncirculated, just beginning to lightly tone. A very sharp specimen of this rare branch mint issue.

- 1128 1867 Two-cent piece. Extremely Fine.

- 1129 1870 Three-cent silver piece. Scarce date. Very Fine.

- 1130 1866 With-rays shield nickel. Brilliant Proof. A very beautiful specimen of this scarce issue. Proofs of this design are very rare for they were included in just some (the ones made later in the year after the nickel denomination, new in 1866, was introduced) 1866 Proof sets and a few 1867's. In tremendous demand as a type coin. Worthy of a generous bid!

- 1131 1797 Half dime. 13 obverse stars. Valentine-1. F-VF. A nice specimen of the draped bust with small eagle reverse design—a type minted only in 1796 and 1797.

- 1132 1803 Dime. Very Fine or a bit better. Some microscopic marks visible with a glass. Scarce in all grades.

- 1133 1833 Dime. A really beautiful and choice gray-toned Uncirculated example. Dimes of this type are becoming very scarce.

- 1134 1801 Half dollar. Abt. Extremely Fine. A sharp specimen of this rare date—an issue rarely seen in grades better than Very Fine.

- 1135 1806 Half dollar. Pointed 6, stem through claw. O-116. Attractive AU, with much vestigial mint lustre. Some weakness at centers as struck. A nice candidate for a type set!

- 1136 1871 Silver \$1. Brilliant Proof, but with handling marks in field. Acquired by the consignor from B. Max Mehl in 1956, the last year of that famed Texas dealer's career.

- 1137 1880 Silver \$1. Brilliant Proof. One of 1,355 Proofs minted this year. Scarce in this grade.

- 1138 1876 Trade dollar. Proof with hairlines, due to careless cleaning years ago. 1,150 minted. Important as a centennial year coin.

- 1139 1877-S Trade dollars. "Roll" of 20 pieces. Average Extremely Fine grade. Includes regular-size and microscopic "S" varieties, the latter being about 3 to 4 times scarcer. (Total: 20 pieces)

- 1140 1854 \$3 gold. First year of issue, and the only year with the word DOLLARS in very small letters. Brilliant Uncirculated. A nice type set coin!

Thank you for your Participation!

The foregoing set represents a nice compromise among grade, completeness, and price. The next owner may want to replace a few pieces and add others. Some far above average coins—and the choice 1865 dollar comes to mind in this regard—could be sold and would provide the funds to upgrade the several cleaned pieces. In any event, here is a set which should attract wide attention. Worthily of a generous bid! (Total: 31 coins)

United States Currency

- 1161 \$1 Legal Tender, series 1862. Signatures of Chittenden and Spinner. Friedberg-16; Donlon-101-1T3. Interesting palindromic serial number: 42424. New, one tiny pinhole and some light brown stain spots. A popular type.

- 1163 \$1 Legal Tender, series 1869. Allison, Spinner. F-18; D-101-4. New, well centered and colors bright. Minute corner crease, visible only on reverse, does not detract from this note.
- 1164 \$1 Legal Tender, series 1875. Allison, New. F-20; D-101-5. Colors bright. Small paper imperfection on the back is hardly discernable.

- 1165 \$2 Legal Tender, series 1862. Chittenden, Spinner. F-41; D-102-1T2. While technically New, the top edge is rough and the corners have been slightly rounded off. Still desirable.

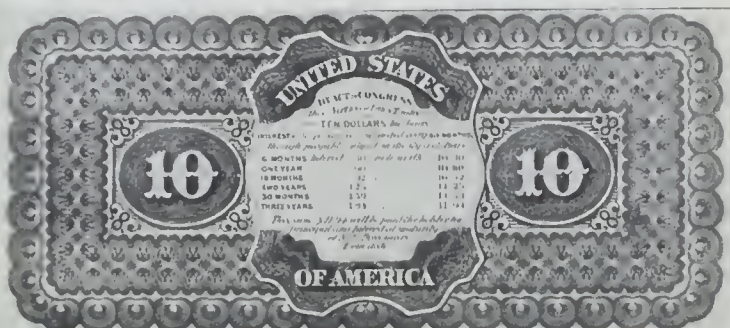

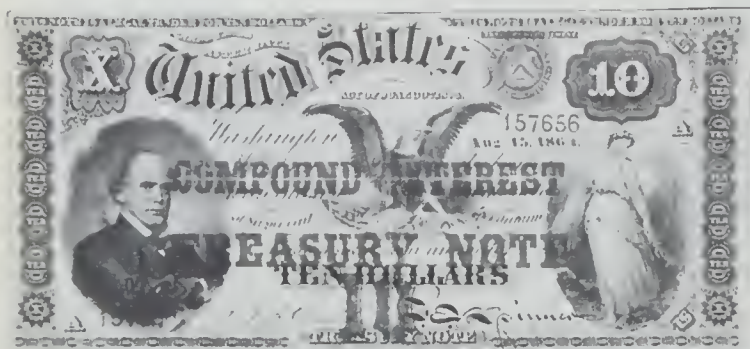

- 1166 \$2 Legal Tender, series 1875-B. Allison, New. F-46; D-102-5B. A scarce variety. Extremely Fine.
- 1167 \$2 Legal Tender, series 1878. Allison, Gilfillan. F-48; D-102-7. New, a bit yellowed.

- 1169 \$10 Legal Tender, series 1880. Rosecrans, Huston. F-107; D-110-14. The so-called "jackass" note, after the similarity to a donkey's head appearing when one inverts the note and looks at the small eagle upside-down. Extremely Fine.

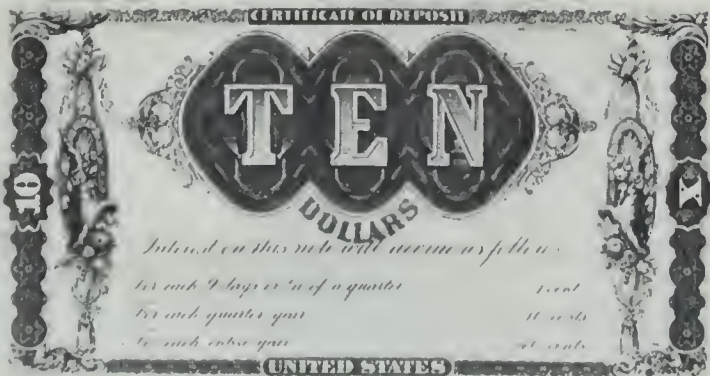

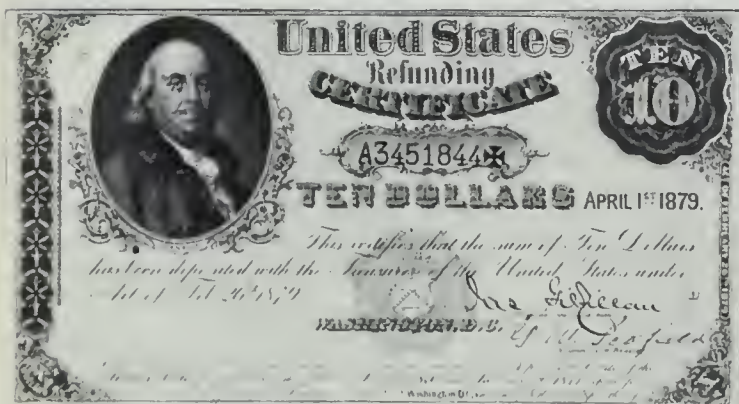

- 1170 \$10 Legal Tender, series 1901. Lyons, Roberts. F-114; D-110-20A. The popular "Bison" note. New, colors bright. Small (2mm.) tear at bottom and one pinhole.

Rare Compound Interest Treasury Note

- 1172 \$10 Compound Interest Treasury Note. 1864. Colby, Spinner. Redemption value \$11.94. F-190; D-910C. This rare note is from Stack's 1963 *George O. Walton Collection*, where it was described as "Extremely Fine". Portrait of Chase left, eagle with flag in cents [ed. center], lady of peace at right. A numismatic and historical rarity." A rarity it is indeed. Save for a tiny repaired hole at left, the note is flawless. Should command a record bid.

Very Rare, High Grade, Refunding Certificate

- 1173 \$10 Refunding Certificate. April 1st 1879. Schofield, Gilfillan. Large red seal. Uncirculated, creased once along lower edge. This note was examined by the late Robert Friedberg and was considered by him to be *unique* in this condition. Worthy of inclusion in the best of collections.

- 1177 \$2 Silver Certificate, series 1891. Tillman, Morgan. F-246; D-202-17. Portrait of William Windom. An interesting and rather ironic note. William Windom was an advocate of the gold standard during the rather uproarious debates between free silver and gold standard political factions in that era. Windom died in 1890, and his portrait was used, undoubtedly in commemoration to him, but ironically, on the series 1891 *Silver Certificate*. A short-lived and interesting issue, to be replaced by five years later by the "Educational Series" note. This note is in *Extremely Fine* condition and should command a good bid.

- 1182 \$20 Silver Certificate, series 1878. Signed by Schofield and Gilfillan and countersigned by A.V. Wyman as Assistant Treasurer U.S. Payable at Washington, D.C. Large red seal. Instead of the usual "XX" below the words "Silver Dollars" this is the rare variety with TWENTY spelled out! F-307A; Donlon-220-8 T3. The reverse of the note has blue fibers in the paper along the top half. This is not mentioned in published works and must be considered a separate variety from the normal plain paper. Despite a few tiny pinholes and one 4mm repair at bottom reverse, this rare note grades a nice Choice Fine. Worthy of a generous bid.

Presentation Fractional Currency Shield —With extra notes and Spinner autograph—

1201 Presentation fractional currency shield with extra notes and with official seal and autograph of Francis E. Spinner.

Over the years we have had the privilege of handling perhaps fifty to one hundred fractional currency shields: shields with gray, pink, and green backgrounds; shields in varying degrees of condition and preservation. To our knowledge the presently-offered item is the "King of Fractional Currency Shields" and is absolutely unique.

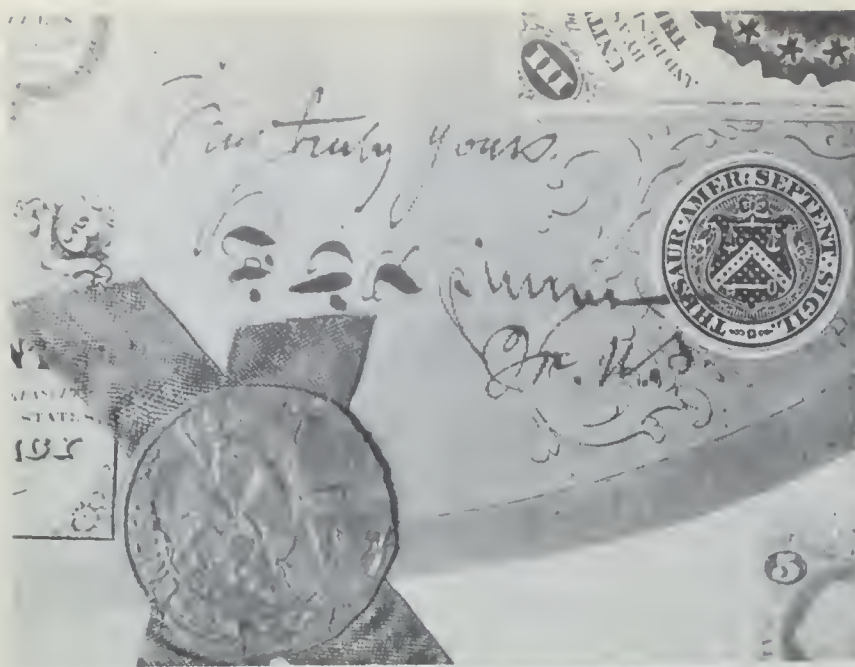

The shield consists of a gray-background type, Friedberg No. 1382, in the original frame with gilded inner frame. A normal fractional currency shield has affixed to it 39 notes. The present shield has the normal 39 notes plus 6 others, giving it a total of 45 notes. Each note is carefully and officially affixed to the shield within a finely-inscribed brown-line frame prepared beforehand for the purpose. These notes, not otherwise represented on the shield, are: obverse and reverse of 10c F-1261; obverse only of 15c F-1271, 25c F-1307, 50c F-1375, and 50c F-1377.

Lot 1201 is illustrated on the next page.

Illustration of Lot 1201 – Presentation fractional currency shield with red wax Treasury seal and ribbons.

In addition there are the following U.S. stamps which were affixed at the same time at the Bureau of Printing and Engraving: 2c brown 1873 U.S. postage issue, Scott-157; 3c green 1873 U.S. postage issue, Scott-158; 2c orange, Internal Revenue, Scott-R-15; and 5c faded red, Internal Revenue, Scott-R-27.

In addition the shield bears the autograph signature and sentiment of Francis E. Spinner: "Very truly yours, F.E. Spinner, Tr. U.S."

Beneath the Spinner signature is an official U.S. Treasury Department orange wax seal affixed over two ceremonial red silk ribbons.

The extra notes represented on the shield are from the series of 1869 to 1875. Certain of the stamps were last made in 1871. This gives the 1869-1871 years as the date of issue.

In discussing the shield with John Jay Ford, Jr., who has made a study of shields over the years, we learned that there is one other known specimen with a Spinner signature, but this shield, owned personally by Mr. Ford now, lacks the official U.S. Treasury Department seal and ribbons and the extra notes and stamps.

The present shield is a one-of-a-kind presentation piece, obviously made up at great extra effort by the Bureau of Printing and Engraving at the request of Francis E. Spinner, who probably presented it to an important government official or close friend.

The shield is in excellent condition, apart from ageing. The colors of the notes are unusually crisp and bright. Measurements are 32" high by 27½" wide. The value of this shield is difficult to estimate. Lot 1485 in the Matt Rothert Sale, an "ordinary" shield but in quite excellent condition, sold for \$2600 on a top authorized bid of \$3500. What this shield is worth will be learned at the sale. Suffice it to say that it is a gem of gems, a chance of a lifetime for the advanced collector of fractional currency.

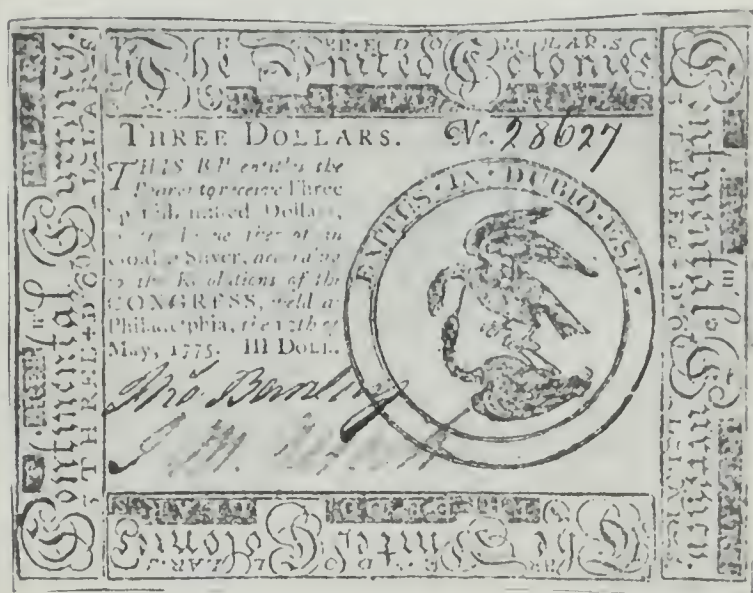

- 1202 Fractional currency shield with gray background. Normal type, Friedberg No. 1382, with 39 notes. In ornate oak frame measuring about 28½" high by 24" wide. Colors of the notes are crisp and bright. There are numerous stains around the

margins of the shield, due to long-ago dampness. The Treasury Department basement flooded, and most fractional currency shields were water-stained as a result (today nearly all shields show some stain evidences). Not the equal of Lot 1485 of the Rothert Collection sale at \$2600, but nevertheless quite attractive. Worthy of a nice bid!

1206 Group of 22 pieces of "spiel marks" and game counters. Counters, spiel marks and jetons were originally used as an aid to "counting" beyond the limit of one's fingers and toes (this in ancient times). Gradually, counters assumed the use in accounting only in games, especially the card games of whist and poker, and thus merged into the poker chips of today. Most of the American counters were made in England and Germany. A catalog of the best known of the counters is found in the *TAMS Journal, Official Organ of the Token and Medal Society*, December, 1972 (part two). Descriptions are by the Rulau-Fuld numbering system:

1251 1826 Erie Canal medal. Hibler-Kappen No. 1. Struck in pewter. Beautiful Proof. Exceptionally choice for this medal.

Of this issue, Hibler and Kappen in their *So-Called Dollars* book, have this to say:

This medal was issued by the Common Council of the City of New York; designed by Archibald Robinson; engraved by Charles Cushing Wright (one of America's most prominent diesinkers); struck by Malthby Pedetrau.

The ground for the Canal was broken on July 4, 1817, at Rome, New York. Over 8 years and \$7,000,000 later the Erie Canal stretched 364 miles from the Hudson River to Lake Erie.

The formal opening was October 26, 1825, with the vessel "Seneca Chief" carrying Governor DeWitt Clinton from Buffalo. The boat arrived in New York City on November 4th. Early in 1826 there was a huge celebration in New York City. "Several hundred" white metal (pewter) medals were presented to guests and officials.

Hibler and Kappen note that "today the silver medal is uncollectable, and the pewter [white metal] medal is extremely rare."

- 1252 1826 Erie Canal medal as foregoing, but struck in silver. A choice Proof specimen with beautiful iridescent toning. A superb specimen of this great rarity. With it is the bottom half of the original box of issue. The box has a chip removed (but still with it). The paper label is intact. The Erie Canal medal, one of the most prized of all so-called dollars, is noted as being *uncollectable* by Hibler and Kappen (see our citation under Lot 1251). An opportunity of great importance!

Note: Lot 163 in the Parke Bernet sale of November 11, 1969, was similar and sold for \$680.

The copper medal is a lovely Proof. The rubber medal, which may be *unique*, is in condition as issued. Rare. From the estate of Henry Chapman. (Total: 2 pieces)

- 1254 Pair of Henry Clay medals by C.C. Wright. Massive 66 mm. diameter. One is a copper Proof; the second is in rubber and is in condition as issued. With the rubber piece is the original Chapman tag marked "Unique." The obverse of each portrays Clay. Reverse depicts a hand on a charter titled "American System." (Total: 2 pieces)

- 1255 Henry Clay medal. Massive 95 mm. copper medal. Obverse with Henry Clay. Wreath border. Reverse with description of Clay's accomplishments. Dies cut by C.C. Wright. Exceedingly rare. Proof. From the Chapman estate, and accompanied by Henry Chapman's note stating that the original publication or issue price of this medal was \$30, a fact which accounts for its extreme rarity today.

Rare 1876 Centennial Large Silver Medal
—One of just 10 struck—

- 1257 1876 Centennial memorial medal authorized by Congress. Large 75 mm. size in silver metal. Beautiful Proof. Some light

marks, but nothing of detriment. Attractive light toning enhances the beauty of this rarity.

On page 63 of the January 1876 issue of the *American Journal of Numismatics* H.W. Holland notes that specimens were struck in copper, copper gilt (gold plated), and silver—and of the silver impressions, only 10 were made. Henry Spangenberg, prominent dealer in the field of medallic art and related artifacts, advises us that no records of a silver impression having been sold in the past 20 years are known to him. No pieces have gone through our hands during that interim. The present piece, certainly one of the most important numismatic items from the great centennial celebration, should bring in the range of: (\$3000-\$4000)

Photo 1/2 original size

- 1258 1879 Mint medal. Massive 101 mm. copper medal. Lovely Proof. The obverse depicts A. Loudon Snowden. The reverse depicts in 3-dimensional relief the U.S. Mint at Philadelphia. The obverse is signed by Morgan; the reverse, by Paquet. A highly desirable medal due to its condition, its motif, and the extraordinary relief of the surfaces.

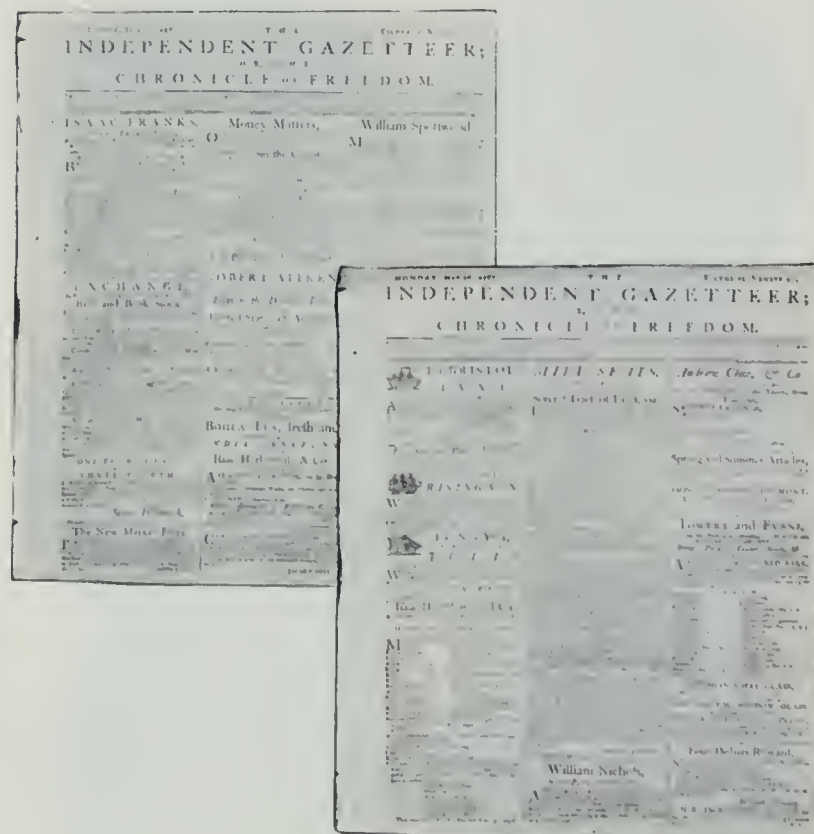

- 1259 Sons of the American Revolution badge. Obverse: white enameled Maltese cross with bust of Washington in center, surrounded by legend: LIBERTAS ET PATRIA. Reverse with minuteman and SONS OF THE AMERICAN REVOLUTION inscription. Eagle suspended above the badge and below a decorative ribbon. The eagle is stamped "14K." An interesting item, especially in view of the coming bicentennial.

- 1260 Military Order of the Loyal Legion of the U.S. Founded on April 15, 1865, this association promoted the remembrance of the Civil War. Offered now is a small badge suspended from a red, white, and blue ribbon. The badge, in the form of a Maltese cross with added rays at the intersections, has a heraldic eagle at the center of the obverse. Surrounding is the legend: LEX REQIT ARMA TUENTUR. The reverse center depicts a fasces with a liberty cap above and crossed swords below. Surrounding is the name of the order and the founding date. Extremely Fine.
- 1261 Original autograph letter signed of noted sculptor Augustus Saint-Gaudens. One and one-half pages 16mo. size, New York, April 23rd, no year. In French and addressed to "Cher Saglio." Andre Saglio was a member of the Ministry of Public Education and Fine Arts, and the Art Commissioner for Expositions at Home and Abroad, during the period of the Paris Exposition of 1900. The letter concerns an introduction for a Mr. and Mrs. Turle who are eager to visit some artists' studios while in Paris. Saint-Gaudens will be most grateful to Saglio if he will aid them in satisfying their wishes. Fine condition. (\$75-\$150)

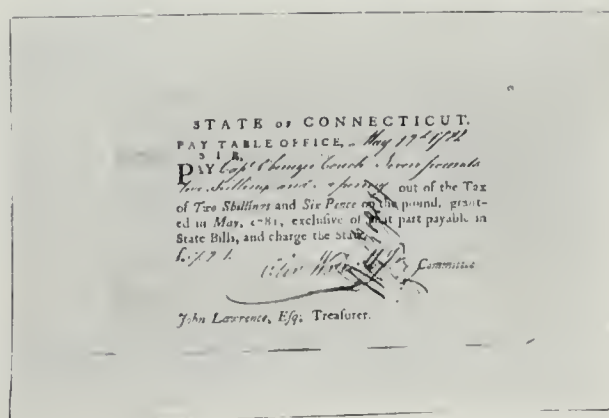

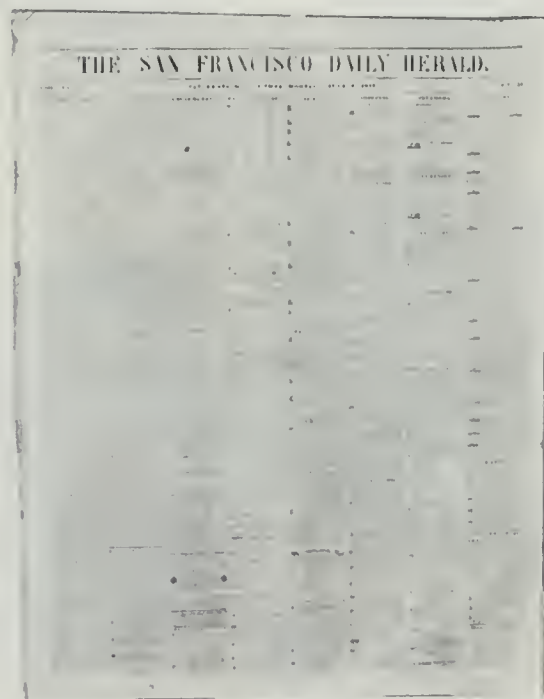

- 1262 Original historical newspapers and a pay document. Group of three pieces as follows:

(Early numismatics). Complete original newspaper, May 28, 1787, *The Independent Gazetteer or Chronicle of Freedom*, Philadelphia. 4 pages. Fascinating reporting of the first news from Congress that 300 tons of copper coins "of the federal standard" will be contracted for and coined. This is a reference to the beginning of the Fugio cent coinage. Other news concerns a slave ship from Algiers and deplores that monstrous trade for depriving poor, unhappy Africans of their liberty; sales of western territory lands; advertisement of Jewish patriot and merchant Isaac Franks; etc.

(Early numismatics). Another issue of the same paper, but dated May 29, 1787. Contains satiric letter about Negroes as a medium of exchange: "I observe an ad . . . of a plantation to be sold in Maryland for 'Negroes, merchandise, or cash.' From this it appears that Negroes are to be introduced in that state instead of paper money as a medium of commerce. To save trouble in counting, calculating, the value of this new black flesh coin, I beg leave to furnish dealers in it with the following table, which will be current thereafter in Maryland . . ." Then follows a scale of values as to different ages and sizes of slaves and various values of parts of their bodies.

(Emergency money) Pay-order document paying Continental Army Capt. Ebenezer Couch for military services in the War for Independence. State of Connecticut, May 22, 1782. 7 pounds, 2 shillings, 1 penny.

All of the preceding items are in Very Fine condition. (Total: 3 pieces)

King of William, banker and assayer turned newspaper editor (of the *San Francisco Bulletin*). Also 2 checks on D.J. Tallant & Co., another banking house, dated 1850 and 1851.

(2) *Independent Chronicle*, newspaper, Boston, October 10, 1788. Masthead from a design by Paul Revere (see p. 147 of Eric P. Newman's *Early Paper Money of America*). Notice to "beware of counterfeits. A large quantity of counterfeit bills, of the following emissions of Continental bills, has lately been sent out of New York, . . . The counterfeits are of the following emissions . . ." Then follows a list of issues and salient points for detecting the forgeries. Also in the same issue: John Adams arrives in Paris, dines with various dignitaries, and takes a house near Ben Franklin. Adams assures France that the American Congress has resolved "not to listen to any proposition of peace, from the part of Great Britain, without the participation of the House of Bourbon." Col. Butler, with his own men and some of Morgan's rifle corps, conducted operations against the Indians, et al at Ononguaga and Tunadilla.

(3) Same newspaper, February 11, 1779. Masthead by Revere. Congress orders the issuance of new paper money in 16 denominations "according to a Resolution of Congress of the 14th of January 1779," with proof sheets to be distributed to prevent counterfeiting. Plus various Revolutionary War news. Small piece torn from top of the paper.

(4) Same newspaper, February 25, 1779. Revere masthead. Congress passes a series of resolutions to deal with new bills to be exchanged for old Continental currency and issues a statement explaining the action: Congress had, "from necessity, embraced the expedient of emitting paper money on the faith of the United States, for the expenses of the war . . . Large issues of money were of consequence indispensably necessary, and the paper currency multiplied beyond what was competent for the purposes of a circulating medium. This alone could not fail to discredit it in some degree." British counterfeiting of the old American currency was a major problem and forced the calling in of the old and the issuance of a new currency. A frank, candid, and revealing statement!

(5) Same newspaper, November 5, 1779. Revere masthead. Greatly detailed description of counterfeit \$60 bills dated September 26, 1778. Plus various war news, letters from correspondents, advertisements, etc.

(6) *Alta California*, newspaper, San Francisco, February 14, 1852. Moffat & Co. report they have received permission from the Treasury Dept. to issue gold ingots and will issue ingots of .884 fine gold in \$10 and \$20 denominations. "No more coins will be manufactured bearing the stamp of Moffat & Co., and that already issued will be redeemed wherever demanded." They will also "receive gold dust for melting and assaying, and return the same in bullion, at a charge of 1% of its value." Many interesting ads, etc.

(7) *San Francisco Daily Herald*, newspaper, January 19, 1854. Ad stating that Kellogg & Richter, formerly with the U.S. Assay Office of Gold, have "opened an office for melting and assaying gold . . ." Also a letter of commendation from Curtis & Perry and Augustus Humbert. A run upon the banking house of Adams & Co. by 1200 persons resulted in \$416,000 in gold being paid out.

(8) Same newspaper, February 22, 1854. Kellogg & Richter comply with the request of many bankers to resume minting of private gold coins.

A very nice group of historical association material for the museum or collector seeking to "go beyond the coin" and display related interesting material.

Extremely Rare Egypt Half Obol

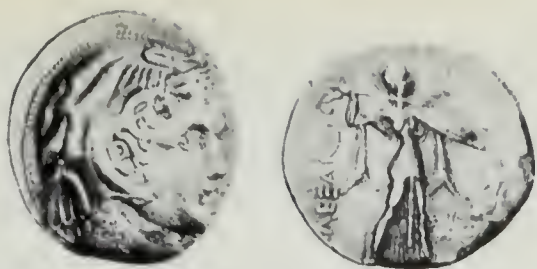

- 1273 Pharaonic Egypt. Nectanebo I (378-361 B.C.). Half obol. This small coin has been assigned by scholars to the reign of the first Nectanebo. It appears to be the earliest coin that can be definitely attributed to the Pharaonic period. The obverse shows a crude head of Athena. The reverse has the famous Athenian owl right, with an Egyptian hieroglyph (see photo). This is the only known specimen ever to be sold in the Western Hemisphere, according to Col. James W. Curtis, an expert in this area who wrote an article on the coinage of Pharaonic Egypt. (*Journal of Egyptian Archaeology* Oxford, 1957.)

This is one of only a half-dozen coins of this general classification known to exist outside of the British Museum. Ex-Mabbott collection. Extremely Fine condition with sharp details. Should command a good premium. (\$650-\$1300)

PLAN TO ATTEND THE SALE!

- 1274 **Egypt.** Ptolemy I as governor, 323-285 B.C. Silver tetradrachm struck c.313 (dated by O. Zervos). Head of Alexander the Great in elephant's skin. Rev. Athena Promachos standing right. Pozzi-3185; Svoronos pl. II-20. Some crystalization, otherwise VF+. This is a specimen of the earlier, heavier issue of Attic-weight coins (RR); it is not quite as heavy now as when struck due to slight corrosion on the right side. 15.34gm. (\$200-\$275)

Extremely Rare Roman Bronze of Egypt

- 1275 **Roman Egypt.** Antoninus Pius (138-161 A.D.). Bronze drachma, struck in Alexandria in the tenth year of his reign. BMC-1052v; Mil-1913-v. This coin is one of the famous "Labors of Herakles" and depicts the Garden of Hesperides. Often considered the final labor, this tale concerns Herakles's efforts to secure the holy golden apples of the Hesperides. After difficulties in locating the garden, Herakles could not pick the apples. He got Atlas to do this for him by holding the sky on his own shoulders. Atlas, however, was so delighted to be free of his heavy burden that he did not wish to return to the task. Herakles finally tricked him into handing him the apples and resuming the sky upon his shoulders. The attractive design of the reverse of the bronze drachma depicts Herakles reaching for an apple, while the serpent Ladon, who had opposed him, hangs dead from the branches of the tree, an arrow through his neck.

Col. James Curtis, a recognized expert in this area and author of *The Coinage of Roman Egypt: A Survey* states that this is in all probability the finest known specimen of this rare coin. The coin grades a magnificent Extremely Fine and has beautiful patina. (750-\$1500)

- 1327 1768 J.R. C-13; E-3. Charles III. Pillar dollar. Very scarce date. Sharp EF, some evidence of light peripheral corrosion having been expertly removed. (\$125-\$150)

- 1328 1769 V. Potosi. 8 reales, crude round cob. Charles III. Cal-1233; YL-1121. Abt. VF, some flatness. (\$50-\$100)

- 1329 1770 J.R. 8 reales. C-13; E-6. Charles III. Gun-metal grey toned EF-AU. Aficionados of early 8 reales will agree that we have graded this modestly. The edge is unusually nice and the overall appearance is really attractive. Whoever purchases this coin will be glad he bid. (\$275-\$325)

Rare Pattern Proof Cent

- 1431 Canada-Newfoundland. 1864 Pattern Proof. Charlton E-69; Bowman-24. A superb lightly toned Proof. Extremely rare as this is the very first (and only coin dated 1864) from Newfoundland. Regular coinage began in 1865, thus making this the most sought-after early pattern. Less than 10 specimens known! (\$1000-\$1500)
- 1432 Canada-Newfoundland. Pair of cents: (1) 1880 oval O. Fine, with two light scratches that do not impair the design; (2) 1940 re-engraved date. EF. These are the two key Newfoundland cents. (Total: 2 pieces) (\$70-\$100)

1865 5c Proof

- 1433 Canada-Newfoundland. 1865 5c silver, plain edge pattern. Charlton E-71. Very rare. Only a few known examples. This one is a majestically toned gem Proof. Worth (\$700-\$1400)

- 1435 Canada-Newfoundland. 1946 5c. A major Newfoundland rarity with only 2,041 struck! Sharp Extremely Fine+ with prooflike fields. (\$175 up)

- 1436 Canada-Newfoundland. 1870 10c. The key dime with only 30,000 minted. Overall Fine. Typically weak in the center of the reverse. (\$125-\$175)

- 1446 Chile. 1801 A.J. (Santiago mint) 8 reales. Charles III. C-61; E-54. Lustrous about EF, with 2 small pin marks in the field above the head at 12 o'clock. In our opinion much of the flatness on this coin is due to the striking and is not wear. A really choice coin in all respects. (\$275-\$325)

- 1447 Chile. 1815 F.J. 8 reales. C-81; E-73. Ferdinand VII. Delicately toned AU, a couple of marks in the field on the obverse and a light rim mark on the reverse keep this nice specimen out of the choice category. An above average specimen for this scarce type. (\$250-\$285)

German Porcelain Coins and Medallions

This fascinating series of numismatic items was a result of shortages of all types of metal in post-WWI Germany. Emergency money made of porcelain was issued from 1917 to 1923. The coins of this material were so popular that many types of commemorative medallions were produced in this same material—mostly in the 1920's and 1930's, and a few have been produced since WWII. Porcelain is an excellent material for producing high relief because of its extreme malleability and many of these pieces show to a high degree the artistic ability of the artists of the Meissen state porcelain factory, where most of these were produced.

The pieces offered in the following lots are from a single collection formed over a period of many years. Included are many scarce items of great historical significance as well as beauty. This is by far the largest and most interesting group of porcelain pieces we have ever handled. All items are as issued or nearly as issued unless otherwise noted. Catalogue numbers are from Karl Scheuch's book "Münzen aus Porzellan und Ton," 1965.

The Very Rare and Famous Cincuentines

Actual Size

- 1749 Spain. 1620 50 reales (Cincuentines). Calbeto-1812; D-566. Philip III. Toned Extremely Fine and sharp!

This large and magnificent silver piece was struck on a planchet of about three inches (73mm.) and with an approximate weight of six ounces (168.5 grams). Coins of this type were coined in the royal mint of Segovia under Philip III, Philip IV, and perhaps Charles II. Because of the tremendous size of these coins, they were struck on roller dies rather than by a hammer such as the other mints used at this time. Because of the great pressure that the rollers exerted over the planchet, often the planchet surface is cracked and wavy. This specimen has only the minutest evidence of this cracking which can be noticed on the obverse above the lion in the upper right and portion of the arms.

As with most multiple talers of Europe during this period, these coins served other purposes than strictly monetary. The

leading theory is that these pieces would be used to demonstrate a direct relation between the owner and the monarch. Very few people had access to the palace during this time in history, and anyone related directly to the crown was respected and perhaps even feared by the common people. Therefore a cincuentinas would serve as a recognition of exceptional service rendered to the king by persons of important stature and also served as a form of currency which allowed its owner to enjoy credit for acquisition that at a later time he would pay for in common money. As Gabriel Calbeto, in his famous *Compendium of Eight Reales* states, that if the foregoing theory someday confirms, it may be said that a cincuentinas was a 17th century equivalent of a present-day credit card, with a romantic touch of royalty.

We are very pleased to offer this magnificent specimen and we are sure that it will attract spirited bidding. (\$4000-\$6000)
